The task of making a selection of trees adap-ted to all the purposes of ornamental planting, of pleasure grounds, of lazors, and in the streets of cities, would require a more extensive hnowledge dent of the Cincinnati Horticultur To the Pres ber is in no wise inferior to its predecessors. For pleasure grounds, especially if extensive, scarcely any trees selected from our native forests will come amiss, if planted in groups, or promiseuously arranged, always having regard to circumstances as locality, shape of the surface, aspect, character of the soil, &c., avoid-ing as much as possible straight rows, which are unsightly, and we think should eccarcely were be allowed, except along the streets of cities and villages, and on each aide of roads and public highways in the country. to afford the fullest instruction to those who have not the assistance of the oral teacher, by Elias Longley. Allowed, Shoft a start is the of roads and public highways in the country. We can conceive nothing that would contrib-ute more to beautify the scenery, and yield con-fort and pleasure to the traveler, than the grate of shades of continuous rows of graceful Elms, of Silver Maples, of Sugar Maples, of Talip-trees, or even the common Locust, when planted in extended lines along the road-sides. In ad-dition to these we would recommend the plant-ing of our native Oaks of every species, where the land is suitable, either for shade or orna-ment. No trees are hardier, or present a more beautiful or classic of times suited to planting along the streets of cities in this climate, we shall confine ourselves to the consideration of those only that have been planted and fairly test-ed in and about the city of Cineinnati within the list twenty years, for the purpose of affording ornament and shelter from the incesse hast of an almost tropical summer's sun.
