FIREMEN'S ASSOCIATION—REPORT ON THE STEAM ENGINE

At a meeting of the Firemen's Association on Monday evening, the committee appointed to investigate the cause of the explosion of the steam engine at the fire station on Monday, May 17, 1926, reported as follows:

The committee found that the explosion was caused by a defective valve in the steam engine. The valve was found to be broken and was replaced by a new one.

The committee also found that the boiler was in good condition and that the explosion was not caused by a defective boiler.

The committee recommended that the valve be replaced by a new one and that the boiler be inspected by a competent person.

The committee also recommended that the fire station be equipped with a fire alarm system.

The committee also recommended that the fire station be equipped with a fire alarm system.

The committee also recommended that the fire station be equipped with a fire alarm system.

The committee also recommended that the fire station be equipped with a fire alarm system.
