We have noticed somewhat extensively the great Corn-Sheller, and, in common parlance, "it takes every man down who sees it;" but a couple of items, more than confirming all the statements of the press, have just come to hand.

A gentleman (whose name is left with us to use if wanted) on Market street bought Butler and Lawrence counties, and sent out a machine with Mr. Joseph Allen to the Fairs, seven days since. In both of these counties premiums were awarded, and he returns to-day with orders for over one hundred machines, and says more than fifteen hundred could be sold if they were made.

Messrs. Warwick. Attleborough & Co., of Birmingham, as good mechanics as any in the country, have made aside all their regular foundry and machine business and employed their entire force in manufacturing these machines.

We are credibly advised that counties are daily chang hands at enormous advances. A few "progressive men" have found out this to be just what it appears to be, and are acting as shrewd men always do—making money out of the best and most available thing in the country for carriages from the most scientific and best men in the country, see another column.—*Evening Chronicle.*

DICKERSON'S CORN SHELLER.—The following certificates constitutes a mass of credentials that cannot be gainsayed. The gentlemen whose names are appended are among the most capable in the whole country, a judge of the working capacity of this ingenious machine, our farmers may rest assured that it is the most perfect and efficient affair that has ever been presented for public favor. There can be no question of its superior excellence, in point of adaptedness to the object, in every possible respect. A child can work it, and it is not liable to get out of order, while the price is unexceptionable. Read the views of the most scientific men of our country whose reputation is as wide as civilization itself. These are no bogus certificates got up for effect. The originals are placed in our possession for the examination of the sceptical.—*Pitts. Eve. Chron.*

COMMITTEE OF ARBITRATION, FOR OCTOBER.
GEO. W. CASE, V. P.—ISAIAH DICKEY, T. B. UTHERS, SAMUEL DILWORTH, J. B. CAMFIELD.

REVIEW OF THE PITTSBURGH MARKET.

For the Week ending October 9, 1855.

Business is tolerably brisk, in all departments, the fall trade being in full tide. The produce, grocery and jobbing merchants are all well employed, and the manufacturers are all busy.

The river remains in excellent condition, and the transportation business is going on quite briskly. The receipts of flour, grain and produce are largely in excess of any previous year, the main part being intended for the east. The Pennsylvania road carries off all consignments as fast as they arrive.

The active demand in the east for flour and grain comes from foreign buyers, who are taking large amounts for export. It is now ascertained to a certainty that the crops were short in France and Germany and that the European demand will be active enough to absorb our whole supplies. There is not much present prospect, therefore, of a decline in breadstuffs, but there is not on the other hand, any tendency just now to a further rise.

The active demand for money in the eastern cities continues. The N. Y. Courier says:

Money is scarce even at 7@8 ₰ cent. on first class business paper at 60 days, and 8@9 on 4 months' paper of a similar grade, showing that our money lenders prefer short papers. We know what may occur within the coming two months. There are the rate of 1,000 millions of paper, while the second and third grades the terms vary from 1,000th to 1,000th part of the amount. Good and Federal Street is reported at Portsmouth up to noon yesterday.—Four deaths and 11 new cases occurred within the last three days. The Rev. Wm. Devlin, Catholic minister is very ill.

The southern mail brings Orleans papers of Monday and Tuesday. They contain details of the intelligence from the Rio Grande the substance of which was received by telegraph from New Orleans.

SPRINGFIELD, Mass. Oct. 9.—Messrs. Rumville & Shumway's extensive gold chain manufactory was completely destroyed by fire this evening. The loss is heavy, and there was no insurance. Sixty workmen have been thrown out of employment.

NEW ORLEANS, Oct. 8.—The latest advices from New York by mail are to the 29th three mails being due. The weather has been cool for several days. The deaths for the past week were 162 including 46 from yellow fever. The fever is abating.

MIDDLETOWN, Ct., Oct, 8.—The Hon. Samuel D. Hubbard, ex-member of Congress and Postmaster General under President Fillmore died at his residence in this city last evening.

ELECTION RETURNS.
