GAZETTE CITY DEPARTMENT.

PITTSBURGH:

WEDNESDAY MORNING, NOV. 21, 1855.

THE STEAM FIRE ENGINE OF MR. LOWRY.—THE TRIUMPHANT SUCCESS.—Yesterday afternoon, the Steam Fire Engine was fully tested on Liberty street at the corner of Wayne street. Large crowds witnessed its operations. Many prominent citizens were present.

The universal opinion seemed to be that the Engine fully proved itself to be all that its most ardent friends desired; and we heard the hope repeatedly expressed that those interested would immediately incorporate it with our Fire Department. For the honor of our city, for the sake of struggling mechanical genius, for the increased safety of property, we heartily join in the hope.

The Engine has not been docked with outside adornments and gilding as yet, and is consequently not very prepossessing in appearance, but that is a matter of minor importance. The Engine does its work nobly—that is all important.

The Boiler is 48 inches in diameter and eight feet four inches long or high. The lower eighteen inches are occupied as the furnace which is circular in form and being composed of iron plates like the boiler proper, aids greatly in the generation of steam. The next four feet is occupied by two hundred and fifty three flues, each two inches in diameter. The balance of the boiler is taken up by the steam chamber and smoke box. Above the boiler is the chimney so adjusted as to be raised or lowered at pleasure.

The cylinder has sixteen inches bore and two feet stroke, the valve supplying the steam itself. It is balanced and is of novel and peculiar form. The pump has eleven and five sixteenths inches bore, with the same stroke as the cylinder.

The Engine rests on four wheels, which embrace seven feet of ground. The entire length of the carriage is fourteen feet. The weight of the whole is about 9000 pounds.

The Pump has capacity for throwing *thirteen hundred gallons per minute*, when making sixty-six revolutions. The openings through which the throwing is done are five in number. One of these is four inches in diameter—for the larger attachments, and the other three two and a half inches.

The noxzles are three inches, two and a half inches and one and three quarters in diameter, but any other sizes may be used if required. So that the water of one or twelve of the city plugs may be used as occasion or convenience may require. The Engine is so constructed that the momentum of the water as it comes from the plugs is not lost. It has also sufficient surplus power to supply herself from a pond, canal or river if necessary.

Three men, besides the Hoseman (he who holds the pipe,) are sufficient to man and keep the Engine in full operation for hours.

Yesterday, steam was up, and the Engine was in operation in precisely ten minutes after the first smoke issued from the chimney.

Experimental throwing was then had through the different sized nozzls, and in all she gave the completest satisfaction. Her greatest feat was in throwing water two hundred feet through an inch and three-eighths nozzle. This is hard to beat. In all the tests applied, she came off conqueror, and we congratulate Mr. Lowrie upon his triumph.

We are requested to publish the following resolutions which were passed by the Temperance Meeting on Monday night:

WHEREAS, Laws are an expression of the will of the people in a constitutional form, and as such, in a republican form of government are entitled, not only to the implicit obedience of the people, but to the prompt and willing support and aid of every good citizen; and whereas, the executive officers of the law are but the sworn servants of the people, to perform that which the people collectively cannot conveniently do; and whereas, the constables and others, servants of the people, reluctantly and inefficiently perform their duties under the Act of 14th April, 1855, in restraint of the sale of liquor, it becomes the imperative duty of every good citizen to do that which their unfaithful public servants fail to do, and in discharge of such duty the Temperance League of Allegheny county are now engaged, therefore be it

Resolved, That the "Tempprance League of Allegheny County" not only deserves our highest commendation, but shall command our aid and assistance in purse and person.

Resolved, That a conscious and fearless discharge of executive and official duty in the administration of the laws, irrespective of their purpose and effect, is the surest safeguard of life, liberty and property.

Resolved, That the justice and duty require and demand the aid, influence and support of every good man in behalf of this law, the clergy of the cities be requested to afford their several congregations an opportunity to contribute to the funds of this Association.

Resolved, That the public morals, public decency, and public decorum, were outraged and violated by the triumphal march of "discharged convict poison venders through the streets, under the blushing folds of the national banner and to the rebuking strains of national air."

A LEGAL SQUABBLE.—When the case of O'Hara vs. Pennsylvania Rail Road Company, certiorari from the Common Pleas of Allegheny county, came up for argument in the Supreme Court on Tuesday, Thomas Williams, Esq., counsel for the plaintiffs in error, addressed a note to the Court protesting against the reception of the Paper Book of Mr. A. Stokes, Esq., attorney for the defendants in error, on the ground of its scurrility and abusive character.

The Paper Book of Mr. Stokes is in answer to that of Mr. Williams.

Mr. Stokes addressed the Court at length in his own vindication, and reviewed the Paper Book of Mr. Williams for the purpose of showing it to deserve all his animadversions.

Mr. Williams replied in his own defence. Mr. Stokes made a rejoinder.

The Court will decide this morning whether or not the Paper Books shall be suppressed.

This matter created considerable excitement at the Court House yesterday, and is the topic of general remark among the members of the Bar. We have no disposition to enter into the details of the affair. It is unfortunate that such difficulties should occur and the less publicity they obtain the better for all the parties.

BRAKEMAN KILLED.—A brakeman on the Ohio and Pennsylvania Railroad, named Frank Seboy, was missed from the Fast Train due here at 12 o'clock on Saturday night, when a few miles this side of Massillon. His body was found in a creek a short distance from Massillon, on Sunday afternoon. It seems that as the bridge spans the creek, the engineer had given the sig-nal to "down break," which was done by Seboy, and it is supposed that, as is the custom, he had caught the iron railing, after tightening the brakes, and swung his body out for the purpose of looking forward to see if there was any obstruction ahead, when he came in contact with a portion of the bridge. He body was taken to Louisville, Stark county, O., where he had been residing. He was unmarried, and aged about twenty-six years.

SUPREME COURT.—Before Chief Justice Irwin and Judge Knox, Lowrie and Black.

TUESDAY, November 20.

Nimick & Co., et al. owners of the steamboat Susquehanna vs. William Hanna.

Same vs. King.

Same vs. Leech, McAlpine & Co.

These are three insurance cases which per agreement filed were to be argued together and the decision on one to govern all. Argued by G. P. Hamilton for plaintiff in error.

This was the only case argued yesterday.

The Court meets this morning at nine o'clock.

We would call the attention of our readers to the fact that S. M. Ogden M. D., surgeon, and Physician for diseases of the throat and lungs now stopping at the Perry Hotel, will remain in our city only until the first of December, and the success which is attending the treatment of diseases of these organs by medicate Inhalation warrants us in recommending all those afflicted with afflictions of these organs to call upon him at an early day.

FOUND.—The trunk containing $55 and considerable clothing which was stolen by burglars from the boarding house of Mrs. Kinney, on the bank of the Allegheny river below the upper bridge on Sunday night, was found yesterday in a stable in that vicinity. The money and clothing still in it. It was restored to the owner, Mr. John Young.

BORING FOR COAL.—Several wealthy gentlemen of this city, are preparing to institute an investigation into the depth of location and thickness of strata of the coal vein known to lie beneath our city. The boring experiment will be made in the vicinity of Messrs. Shoemberger's iron works in the 5th ward. The names of several of our wealthy iron manufacturing firms are mentioned to us as interested in the investigation.—*Dispatch.*

VALUABLE REAL ESTATE.—This evening at 9 o'clock Mr. Davis will sell at the Merchants Exchange a valuable property on Liberty St. in the 5th Ward.

Also by order of the Trustee of Gen. Larimer, fine Country Seats at East Liberty and a Farm on the Youghiogheny River, near McKeesport.

FATHFUL SUICIDE.—Mr. James Fleming, a tavern keeper at New Brighton, committed suicide on Monday evening about dusk, by cutting his throat. He died almost instantly.—Mr. Fleming formerly kept the Bull's Head Tavern in Allegheny. We understand his wife committed suicide some years since.

THE play of Uncle Tom's cabin is to be produced at the Theatre on Thanksgiving day.

The Panorama of New York City exhibits this afternoon at 3 o'clock. Tomorrow it exhibits three times, at 10½, 3 and 7½ o'clock, also every evening this week and Saturday afternoon at 3 o'clock. It drew an overflowing house last evening. Take your family to Masonic Hall and let them see how the greatest city in America looks.

THE locomotive *Allegrippus* while drawing a heavy freight train up the grade west of the Canal Bridge yesterday, broke the main wrist of her pitman rod, and was disabled. The *Latrobe* came to her relief, but she, too, failed to get over the grade, and the train had to be taken over by piecemeal.

PANORAMA OF THE EASTERN WAR.—Hanington's celebrated Dioramic Panorama opens tomorrow afternoon at the City Hall. From the very high character the exhibition has attained a rich treat may be safely anticipated by a visit to the City Hall.

THE water was to have been let into the canal last night. The boatmen detained at the break near Tarentum turned in and assisted the laborers to repair the breach and consequently the work has been done in a much shorter time than was anticipated.

UNITED STATES CIRCUIT COURT.—The Cambria county ejectment case is still on trial in this Court, and will probably occupy the attention of the Court during the present week.

WE would call the attention of the public to an important communication from Doctor Liscombe, of Cincinnati, relative to Corn Shellers, to be found in our telegraphic column.

TELEGRAPHIC.

[For the Pittsburgh Daily Gazette.]

CINCINNATI, Nov. 20.—The public would do well to be on their guard in buying the old fashioned cylinder Corn Sheller, even though they do have a patent spiral spring. There is one here costing only four dollars to manufacture, that will put all cylinder and concave corn shelling machines into the shade, in point of speed, neatness and ease of operation, though of course far inferior to the great Dickinson Sheller.

DOCTOR T. D. LISCOMBE.

BALTIMORE, NOV. 20.—The Southern mail tonight brings New Orleans papers of Monday and Tuesday last, which furnish details of the late advices from Mexico. The report that Gen. Alvares had resigned the Presidency is positively contradicted. Gen. Connonfort had offered his resignation as Minister of War, but it was not accepted. Gen. Vidaurs had addressed a protest to Mr. Marcy relative to the invasion of Mexico by Texian Rangers; he charges the commander of Fort Duncan with firing on the town of Piedras Negras. Gov. Pease of Texas recommends to the Legislature to accept the act of Congress for the adjustment of the Texas debt.

WASHINGTON CITY, Nov. 20.—According to present determination no copies of the President's Message will be sent abroad for newspapers, as heretofore in advance of its delivery at the commencement of the Session of Congress.

BALTIMORE, Nov. 20.—The southern mail of this morning brings no papers south of Augusta, Georgia.

The two branches of the Alabama Legislature met in joint ballot yesterday, and on the first ballot the Hon. Benjamin Fitzpatrick was re-elected to the U. S. Senate for the term of six years. The vote stood Fitzpatrick 79, Prior 45.

PHILADELPHIA, Nov. 20.—Ex-Governor Crittenden was serenaded last night at the Girard House. He was introduced to a very large concourse by Mayor Conrad, and made an eloquent speech, returning thanks for the honor conferred and the cordiality of the welcome given here.

NEW YORK, Nov. 20.—The firm of Wells Butterfield & Co. Express man paid the United States Treasury to-day the $60,000 belonging to the Government, which amount was stolen from their express in transit from Dubuque to New York.

CHARLESTON, S. C., Nov. 19.—The schooner Victory from Wilmington for Trinidad, foundered at sea yesterday off this port. The Captain and crew were taken off by the schooner Manada and arrived here this morning.

REVIEW OF THE PITTSBURGH MARKET.

For the Week ending November 20, 1855.

The supply of money is as large and as free as usual but the demand for it is greater. The banks are discounting pretty well up to the extent of their ability. Such first class paper as finds its way to the street goes at 1 per cent. a month, and second class, and paper less known at 1½@2. No alteration in the rates of exchange.

Business is moderately active, the chief attention being paid to produce operations and the forwarding business. The jobbers and grocers appear to have a fair amount of orders on hand.

The heavy rains of Saturday last have given us a splendid stage of water, the rise coming almost simultaneously from both the Allegheny and Monongahela. The large fleet of coal boats, which have been loading since June, have thus an excellent opportunity of getting out safely. It is too soon yet to ascertain their number, but the ship' ment of coal on this rise is fully up to that of any previous one.

The fine navigable condition of the rivers is bringing forward freight from below quite freely. The receipts of flour are well kept up, but wheat is not arriving in as large quantities as in the early part of the season. Rye is also falling off in the amount of receipts. Other articles of produce, however, take their place.

The winter rates of freight on the Pennsylvania road go into operation on Monday next, the 26th inst., instead of Dec. 1st, as before announced. The rates are, first class, $1.00 ₱ 100 lbs; Second Class, 75; Third Class 60; Fourth Class, 50. Flour $1.00 bbl. Grain in sacks comes under the Fourth Class, but has to be loaded and unloaded at cost of shipper.

The aspect of commercial affairs has not changed much during the past week. Advices from Europe, while it indicates that prices are well maintained, shows that they are not advancing, and that continental purchasers can buy at easier rates in Liverpool, as the latest date, the 14th inst., which would leave it a little unsafe to purchase at present prices in New York, and leaves no margin to operate on at present rates in Cincinnati. It follows, then, that without a further advance in England it will be found hard to maintain prevailing quotations, especially in the west, after the prospective advance in freights. The local demand, however, may keep up figures.

The money market is still stringent in the eastern cities, although improving. The New York Commercial says:

The week closes with a decidedly better feeling in the money market, but without much change in the rates, though there are instances where the banks are disposed to be discounting more liberally than they were last week, and are not quite so tenacious as to the time that paper has to run. In a few instances, where about forty thousand dollars of six months paper, finished off in convenient sums, was offered by a single institution, a private circles the supply is larger than it was, and there is no great difficulty in negotiating the amount. As to the first class paper may be quoted at 10@12 ₱ cent, the latter being the most genuine, and only the very best of business men being able to negotiate at the former.

The New York Post says:

One bank in this city has recently received the drafts of one more capitalists in the west, drawn on one of our banks, for $600,000, all in broadstuffs. $100,000 of this was paid yesterday.

The drafts were all of one day's sight, the paper re-discounting himself on England. As produce continues to be sent forward largely—and when the shipping, the same as the last largely—it was seen that the whole of the transactions by a great amount, in produce and other produce consigned or according forward, money continues to work easier. The supply of money is much as to-day.

The exports of specie from New York last week were.....$32,640,45

Total for 1855.....$26,514,119.15

The Tribune of Monday says:

The money market is easier to-day than for any of the last thirty. The banks are in some cases lenders again. The tone in the street is a little better. The amount of which names are more easily passed at inside figures. We still quote 1@2 ₱ cent for first class signatures. Call loans are not easier to obtain.

The imports of General Merchandize at New York for the week are about $400,000 larger than for the same week of last year, being $1,067,320 against $1,276,655. The exports of specie for the week's is

	1854	1855
Dry Goods	$71,122	1,202,651
General Merchandize	1,125,274	1,074,250
	$1,846,777	2,887,991
Previously this year	160,561,261	127,406,200
Total	$162,408,128	130,294,191

The exports of the week have been very large, $2,542,173 which is the largest week we remember for a very long time. The same week last year was $959,760. The aggregate for the year has been

	1854	1855
Week ending Nov. 16	$956,150	$2,542,173
Previously	91,600,111	84,132,614
Totals	$45,786,539	$86,674,477

The Cincinnati Gazette of Monday says:

Eastern Exchanges was very dull and heavy to-day, and Banks and Bankers did not pay over par, but the rates of discount remain as before. The inquiries were, however, that the rates on Monday would be par buying ¼ prem selling. Drafts on the East and on New Orleans sight is par and ¼ buying, and ¼@¾ prem selling. New Orleans bills are in good demand at par. Eastern and Southern bills are taken at interest or for 30 and 60 day prime signatures. Coin it dull at A premium.

There is now no New Haven Bank Note which may be quoted steady at $6,50. The indications of coin wealth in the Eastern section impaired much to the trade. Gold Dust is offered for $17 for new; green seals are nominally 15¾@16; fine silver bars, 16@16¼; Mexican dollars, 15¾@16; five dollar pieces, 15¾@16; few sellers below the latter rate.

Sales have been made of old Spanish doubloons at $15 per bush; Spanish ounces, $16; Timothy is dull at $2,50 for prime on arrival. Hops are heavy at 10c for Indiana, and 12@15c for Western New York.

The shipments of flour and grain to Great Britain since the first of September last are represented by the commercial circulars, and compared with the three preceding years as follows:

	Flour	Wheat	Corn
1855	194,000	1,244,628	44,656
1854	1,000	14,453	1,082,333
1853	254,000	2,361,357	111,587
1852	227,000	1,268,134	29,172

The Baltimore American says:

The Coffee market has again been quiet. The trade are still holding off, but holders are very firm in their views and ask $10@$10,50, to the retail and country trade. Codfish are steady sale at 5, by the bbl. Glibed Herring are in fair demand at $6,50 ₱ bbl. Mackerel—White $10,00@$10,50 ₱ bbl. Trout $2,50@$3,00; half bbls White, $5,00@$6,25; do Trout $4,50@$4,75.

FLOUR—during the week prices declined, a shade, and sales of sour are reported at $7,75@7,87½, but yesterday the market had recovered its tone, and sales ranged $8,0 0@8,25 for superfine and extra on wharf and $8,50 for choice extra; from store, steady sales of extra at $8,62 @8,75. Only a few barrels arrived at wharf.

GRAIN—Wheat is firm at last week's quotations, with sales of 200 bus White yesterday at $1,80, and 1000 six pcins Tennessee last week at $1,87½; the latter being choice lots and very scarce. Rye is quiet, the supplied in the sales are $1,70@$1,80. Rye is duller, with steady sales at 80@83, the inside figure ruling. A sale of new Corn was made on Monday at 46; but it is hardly quotable above 60@63. Only a few steady sales on arrival at 30@33.

GROCERIES—the news of an advance in Sugar at New Orleans has stiffened the views of holders, and sales are making at 8¼@8¾ by the hhd to the country trade, and 8¾@9 by the bbl. Molasses rather dull at 42@43. Coffee firm at 12@12¾, and Rice at 6¼@6¾ by tierce and bbl.

The money market is still stringent in the eastern cities, although improving. The New York Commercial says:

The week closes with a decidedly better feeling in the money market, but without much change in the rates, though there are instances where the banks are disposed to be discounting more liberally than they were last week, and are not quite so tenacious as to the time that paper has to run. In a few instances, where about forty thousand dollars of six months paper, finished off in convenient sums, was offered by a single institution, a private circles the supply is larger than it was, and there is no great difficulty in negotiating the amount. As to the first class paper may be quoted at 10@12 ₱ cent, the latter being the most genuine, and only the very best of business men being able to negotiate at the former.

The New York Post says:

One bank in this city has recently received the drafts of one more capitalists in the west, drawn on one of our banks, for $600,000, all in broadstuffs. $100,000 of this was paid yesterday.

The drafts were all of one day's sight, the paper re-discounting himself on England. As produce continues to be sent forward largely—and when the shipping, the same as the last largely—it was seen that the whole of the transactions by a great amount, in produce and other produce consigned or according forward, money continues to work easier. The supply of money is much as to-day.

The exports of specie from New York last week were.....$32,640,45

Total for 1855.....$26,514,119.15

The Tribune of Monday says:

The money market is easier to-day than for any of the last thirty. The banks are in some cases lenders again. The tone in the street is a little better. The amount of which names are more easily passed at inside figures. We still quote 1@2 ₱ cent for first class signatures. Call loans are not easier to obtain.

The imports of General Merchandize at New York for the week are about $400,000 larger than for the same week of last year, being $1,067,320 against $1,276,655. The exports of specie for the week's is

	1854	1855

The Cincinnati Gazette of Monday says:

Eastern Exchanges was very dull and heavy to-day, and Banks and Bankers did not pay over par, but the rates of discount remain as before. The inquiries were, however, that the rates on Monday would be par buying ¼ prem selling. Drafts on the East and on New Orleans sight is par and ¼ buying, and ¼@¾ prem selling. New Orleans bills are in good demand at par. Eastern and Southern bills are taken at interest or for 30 and 60 day prime signatures. Coin it dull at A premium.

There is now no New Haven Bank Note which may be quoted steady at $6,50. The indications of coin wealth in the Eastern section impaired much to the trade. Gold Dust is offered for $17 for new; green seals are nominally 15¾@16; fine silver bars, 16@16¼; Mexican dollars, 15¾@16; five dollar pieces, 15¾@16; few sellers below the latter rate.
