CHILD ATTACKED AND BITTEN BY A RAT.—A most singular circumstance occurred in the house of Mr. William Crawford (formerly keeper of the ol dSt. Charles,) on Pennsylvania Avenue, last Monday night. A young daughter of his, a mere infant, was lying in the bed asleep, when she was attacked by a huge Norway rat, which began to inflict bites on her arm and hand. A little boy in the same bed awoke and endeavored to drive the animal away but he too was bitten in three or four places on the hand. The girl's hand from the wrist to the end of the thumb was bitten in a dozen different places and she is quite seriously injured. The screams of the children attracted the mother to the bed and not until then did the vile beast leave them.—He was afterwards caught and summary vengeance executed on him.

BURGLARY.—TWO HUNDRED DOLLARS WORTH OF GOODS STOLEN.—Sometime during Saturday night, or at an early hour on Sunday morning, burglars entered a dry goods and grocery store belonging to Jacob Higgins, and situated on the Steubenville pike, in Chartiers township, about three miles distant from the city, and stole therefrom a considerable quantity of dry goods, groceries, &c., amounting in value to about $200. Mr. Higgins, on Monday came to this city and gave information of the robbery to the Mayor, who issued search warrants and dispatched two officers to the vicinity of the occurrence. The officers searched in all some twenty-five houses, but failed to discover any of the stolen property. The burglars effected an entrance through the front door of the building, which they forced open with a crow-bar.—*Chronicle.*

CHILD SEVERELY BURNED.—On Monday afternoon about three o'clock, a little girl aged about four years, daughter of a Mr. and Mrs. Gill, residing near the weigh lock, Fourth Ward, Allegheny, was so severely burned, that no hopes of its recovery are entertained. The mother of the child, we learn, went to the house of a neighbor on an errand, leaving the child alone in a room, and on returning found the little sufferer completely enveloped in flames, its cloths having taken fire by to close proximity with the fire in the grate. The mother succeeded in extinguishing the flames, but not until the child had been dreadfully burned about the head, face and different parts of the body.

Isaac B. Wall, collector of the Port of Monterey had been murdered near San Luis Philippe, together with a companion named Thomas Williamson.

The murder of Gen. Richardson had caused intense excitement at San Francisco, and strenuous efforts were made by certain parties to get the assassin out of the hands of the authorities, for the purpose of lynching him, but the attempts were frustrated by the firmness of the Sheriff.

Mr. Williamson, who was killed in company with the collector was the assessor of Monterey county. The murderers of the latter gentlemen were supposed to be a party of Mexicans, one of them named Garcia. Pursuit was made by a party of Americans under the Sheriff of the county. COMMITTEE OF ARBITRATION, FOR DECEMBER.—GEO. W. CASS, V. F.—JOHN GRAFF, HENRY LAMBERT, JOHN S. CORGRAVE, JAMES O'HARA.

REVIEW OF THE PITTSBURGH MARKET.

For the Week ending December 11, 185..

Business is growing dull, and while there is a fair amount of trade going on, there is no special activity to note. The rains of Saturday last brought up the river to a good stage, but we are now having real winter weather, and a continuation of this must soon put an end to navigation.

The river last night had risen to eight feet, and the large boats in port were getting ready to go out.

Money is in steady demand, with a regular supply from bank sufficient in the general way to absorb the mass of good paper afloat. Such No. 1 paper as finds its way to the street is taken at 12 ₰ cent. and other grades from 18 @24. There is no alteration to note in the rates of Exchange. Eight cheets on the East are at par, and 30 day bills ½ discount and interest off.

There is very little alteration to note in the face of mercantile affairs. Prices of breadstuffs have slightly fallen off, but seem to be rallying again; and a prospect of a severe winter, with the water courses closed, would undoubtedly tend to stimulate figures. There are so many other influences at work, however, which bear upon prices, that all speculation as to future probabilities is rendered of little value. We notice one fact, notwithstanding, which calculators may take into account or not, just as they please, to wit: that the shipments from the lake ports to New York are not nearly as much in excess of last year as is generally supposed. There has been a great rush forward during the last month or two of the season; but taking the whole season together the increase is by no means heavy. The largest proportionate increase is over the Pennsylvania road and Baltimore & Ohio Railroad. During the winter the amount carried eastward must depend almost altogether upon the capacity of these two roads and the two New York roads. Some shipments are now making, however, and will continue to be made, by the New Orleans route.

The imports, at New York, other than dry goods, for the past week show quite a large decrease on the same week last year, having been $894,497 against $1,511,517. The aggregate of the week is considerably below last year, as will be seen:

	1854.	1855.
Dry Goods,	$681,483	$781,540
General Merchandize,	1,511,517	894,490
Total,	$2,193 000	$1,676,241
Previous this year,	155,742,900	155,727,466
Total,	$157,941,900	$157,608,180

The exports of the week show an increase of about $200,000 over the same week of last year—$2,054,229 against $1,731,516. The figures for the year are:

	1854.	1855.
Week ending Dec. 11,	$1,731,516	$2,036,000
Previously this year,	91,367,284	79,383,144
Total since Jan 1,	$93,098,800	$81,421,194

Among the exports were Flour, $847,366; Wheat, $813; Sili Corn, $74,228; Rye, $22,667; Beef, Pork and Lard, $64,200.

The market for Sterling Exchanges is again up to the specie point, leading bankers asking 8¾@9, a consequent export of specie is looked for. The N. Y. Tribune of Monday says:

We have no change to note in the money market. If anything, there is a greater supply of capital offering. It is generally thought that the Specie by the Wednesday steamer, but there is a general impression that the Specie by the Saturday steamer will be small. Material extent, and that in January these are likely to be considerable sums withdrawn.

The Money market at Philadelphia and Boston is stringent, ranging from 12@24 ₰ cent. The banks in both places are laboring to strengthen themselves. The Cincinnati Gazette of Monday says:

The Money market continues stringent, but a general disposition to accommodate on the part of the Banks, has led to a large falling off in the demand. The movement in favor of contraction in business. The payments for produce have been made pretty freely since the rise in rates for money in this business have been chiefly taken out from the Banks, and nothing up to the present time, reaches at least 100,000 head of hogs, to pay for which over $2,000,000. Of this sum, it is estimated two millions has been distributed in the interior, and it will be some weeks before it finds its way through the usual channels of trade.

The Exchange market is dull at par@¼ prem. for Eastern. Bills are freely offered at rates equal to par for sight. For sale by M. DE LANGE & Co., 55 Liberty st., opposite the head of Wood.

SHINGLE MACHINE.

KENDALL'S

Patent Double Acting River and Shaver.

THE attention of Shingle and Lumber dealers, speculators and others, is directed to this invaluable invention, which is now presented to the public as the first and only practical machine extant, for Riving and Shaving Shingles.

Two of these valuable and saving machines have been invented for making Shingles, but it is a well known fact that only one of them ever went into general use. Last year a factory for rooting purposes, Numerous machines have recently appeared for Riving and shaving, and these have all been condemned, as worthless. Many of their inventors, after a fair trial of riving, which consists of splitting from the sides of the block last one shingle, which almost invariably runs off. This difficulty is entirely obviated by

KENDALL'S MACHINE.

Which first splits from the side of the block a piece thick enough for two shingles, which is separated in the centre, through a pair of approximating knives, which completes the operation; these products are two shingles at every revolution.

This machine will rive and shave from the block three two and shingles per hour, of uniform thickness and taper, superior in solidity and durability to those made by hand or any other process.

The operations are by no means confined to pine and other soft wood, but are equal to equal advantage on oak, walnut and every other description of timber that can be split.

The workings of the machine can be examined at H. H. Hunter's Planing Mills, Pitch st., Pittsburgh.

To timber owners, shingle dealers, and others, this machine presents a new field for speculation, as there is no similar invention extant.

The machine occupies but a small space, is of durable construction, and costs but about two hundred dollars. A man and two boys can make from 25,000 to 30,000 shingles per day.

For rights of territory, or machines, enquire at No. 81 Fifth st., over the City Hotel.

All needed information will be forwarded by letter when desired. O. R. CHAMBERLIN, Agent.
