PENNSYLVANIA FINANCES.—We published the other day the annual statement of the finances of the Commonwealth, for the past year. It presented a very favorable view of the pecuniary condition of the state; and if this favorable aspect can be kept up, the tax payers of Pennsylvania may be congratulated upon the dawn of a better day.

The total receipts last year, were $5,058,670, 66, including $735,435 67 from loans; and the expenditures $5,424,988 29, including $235,888 of loans paid and $84,456 66 to the Sinking Fund. This year the total receipts were $5,-890,474 11, including nothing from loans, and the expenditures $5,885,705 62, including $816,-550 60 of loans paid off, and $260,838 to the Sinking fund. The net receipts last year, therefore, were $5,218,234 99, and the net year $5,390,-474 11, showing an increase of $172,289 12. The expenditures this year were $89,277 77 less than last year, notwithstanding the loans paid off and the contribution to the sinking fund amounted to $307,042 54 more than last year, showing that the net expenditures were $846,-220,31 less than in 1854; adding the net increase in receipts to this net saving of expenses, we have a total of $518,559 48 as the aggregate addition to the means of the state during the year.

The tax on Bank dividends and Corporation stocks has increased $87,315; on real and personal estate, $210,711; and on tonnage $42,920; the total of licenses of various kinds has fallen off $145,461 19, the principal falling off being in tavern licenses, which is about $105,-000. The Public Works yielded $1,942,876 71, against $1,918,606 80 last year—an increase of $23,770, notwithstanding the drawing off of the transportation lines. The expenditures on the Public Works were $1,838,791, against $2,294,857 last year, being a saving of $455,666. The expense of keeping up the Public Works, while thus largely reduced, were still within a fraction of the total receipts from them.

The temporary loans of the State being paid off, and the annual payment to the Sinking Fund reaching over a quarter of a million, we may properly regard the work of paying off the State debt as fairly begun; and if the expense of maintaining the main line of the canal is cut down in proportion to the loss of business upon it, we may, if no imprudent legislation be fastened upon us, look forward to even a greater net saving of expenditures next year than this.

THE OREGON INDIANS appear to be sinned against as well as sinning. They have taken up arms and will ultimately be extinguished, beyond doubt; but if the history of Oregon ever comes to be fairly written, it will be found that the poor natives of the soil were the victims of many gross outrages before they resorted to making war upon the whites. The following paragraph in a postcript to superintendent Palmer's letter, dated Dayton, Oregon, October 19, is in reference to the murder of a number of Indians by the whites:

"A gentleman of undoubted integrity arrived this morning with intelligence that companies of miners and others organized and commenced an indiscriminate slaughter of all the Indians found on Table Rock reservation; that they had already killed *one hundred and six* men, women, and children."

The victims of this outburst of fury, it is said, were all friendly Indians; but their tribe is now turned into a hostile foe, and this outrage has probably tended as much as any thing else to stir up the whole Indian population. Thus bad begins and worse remains behind.

THE SUB-TREASURY.—The Democratic papers are just now exulting over the following item from the Boston *Post*:

"It is said that Mr. Guthrie has effected all those of the government during the past year, not only without expense to his department, but under arrangements which have yielded a *profit* of $10,000!" What an outcry was made against the sub-treasury on account of the immense expense the carting of specie, would cost!"

The amount of profit may be correctly stated; but it has not resulted from the "carting of specie." It is the consequence of the departure from a distinctive feature of the sub-treasury by Mr Guthrie, by which he substituted exchange drafts between the several sub-treasury points, instead of transferring the coin; and that exclusively hard-money institution has thus come to imitate, in some degree, and so take the place of, the old United States Bank. We hope to see Mr. Guthrie extend the system, to the general improvement of the national exchanges; but we hardly expected the Democratic press to become jubilant so soon over such an abandonment of a leading feature in the original sub-treasury policy.

THE SPEAKERSHIP.—At the organization of the First Congress, in 1790, Hon. F. A. Muhlenberg, of this State, was elected Speaker, and from that period up to 1801 the Speaker's chair was occupied by Northern men; Mr. Muhlenberg served two terms, Mr. Dayton, of New Jersey, two terms, Mr. Trumbull, of Connecticut, one term, and Mr. Sedgewick, of Mass. one term.—Since then, a period of 54 years, the North has had but four Speakers—Mr. Varnum, of Mass., Mr. Taylor, of New York, Mr. Davis, of Ind., and Mr. Winthrop of Mass., the latter two serving but one term each. Yet the Southern members of this Congress are now doing their utmost to prevent the election of a Northern Speaker, and denounce the members from the free States as "sectional!"

For the Pittsburgh Daily Gazette.

MESSRS. EDITORS.—Dr. Durbin's lecture, on Tuesday evening, before the Pittsburgh Young Men's Christian Association, at Lafayette Hall, on "The Turkish Empire, or Christianity in the East," was truly interesting. He traced Mahometanism from its rise in the 7th century down to the present time, and impressed upon his hearers its singular decay. He stated (and he spoke from actual observation, having traveled through the countries) that the difference between Western Europe and the Turkish Empire, was as great as the difference would be between the Hall in which he was lecturing, this evening, was it during the night burned down. It is estimated he continued, that the city of Constantinople is burned up every fifteen years, for the Mahometans think it is a sin to put the fire out; that it is a visitation from God, and that it would consequently be doing violence to his will to attempt, in any way, to arrest the flames. (Other cities the Reverend Doctor observed, were built of various materials exhibiting the unmistakable evidences of decay. He gave too as a startling fact, that there were grave yards near Palestine which covered hundreds of acres, and showed that it was the Mahometan portion of the population and not the christian that filled these grave yards, as the Mahometan population two hundred years ago was 70,000,-000 and is now but 35,000,000. He also showed that the trade of Turkey had decayed; that the common ornaments of the Turkish mothers and maidens had gone to England to buy goods. He showed conclusively, that the decay of the Turkish Empire, dater from the loss of the fanatic valor which led the Mahometans when imbued with this spirit to surmount all opposition. But when they lost it—when fired no longer, as they supposed, with the idea that they were fighting for God, their strength failed.—One secret of their immense power, was found in depriving all who did not profess their creed of the right of citizenship, but millions of christians through ten long dark dreary centuries never faltered.

The origin of the existing war he contended lies in a difference of interest and probably a difference of opinion between Russia and Prussia, and Turkey, France and England.—Austria don't know which side to take. Turkey he remarked finally must inevitably become christian, but how? This war may solve the question, but if it does not it is very evident that if the Mahometan population decayed in the same ratio as it did in the last two hundred years that Turkey in a short time will become christianized.

Altogether the lecture was a good one, and the citizens of this city will doubtless be happy to learn that he delivers three more lectures on his "Travels in the East" at the same Hall.

THEMPSON.

TREASURY ESTIMATES.—The Secretary of the Treasury estimates the appropriations for the ensuing year at $69,460,492 84, divided as follows:

On the last ballot for Speaker, on Monday, all the opposition members from Pennsylvania except Fuller, Millward and Broom voted for Banks. The seven votes gained on that day from the vote on Saturday, were Messrs. Edie, Pearce, Tyson and Kunkel of Pennsylvania, Oliver of New York, and Bishop and Clawson of New Jersey. The northern men holding out against Banks, besides the three from this State, are Harrison, Ball and, Moore, of Ohio, Dunn and Scott of Indiana, and Clark and Haven of New York. These votes would have elected Mr. Banks on any of the ballots on Monday.

Last winter, and at the late November election, the "Americans" carried nearly every city in Massachusetts, and Boston was theirs by a very decided majority. At the municipal elections held on Monday last, they were defeated in every instance; in Boston by an overwhelming majority, and in the other places by decided votes.

The Philadelphia *News*, which a few weeks since was apparently very anxious for a union of the opposition, denounces the members of Congress who are voting for Banks, because he acts with the Republicans and makes Slavery the paramount issue! The *News* will undoubtedly come good speed in uniting the opposition in this way.

The councils of Philadelphia have passed an Ordinance to borrow $1,000,000 to pay floating liabilities, and to issue bonds to the Sunbury and Erie Railroad for $1,500,000, and to the Northwestern Railroad $625,000. The debt of the city, with the proposed additions, is set down at about $22,000,000.

SQUATTER LAW.—The editor of the Cincinnati *Gazette* makes the following statement on what he considers good authority:

"With respect to this Coleman, we have a word to say. A gentleman from Kansas called on us yesterday, and told us that Coleman had "jumped" the very claim from which he had just been driven, having, with his gang of bullies, driven away two families, who had settled there, destroying one of their houses, and uprooting the other. He had made preparations to build a house on the same spot, and expected to "keep tavern." Our informant says there are not sixteen houses in that neighborhood, and we understand him to say he had recently passed through it. If this statement be true, and we believe it is, then the people of Kansas have only been executing "squatter law" upon Coleman. No administration has yet been able to repeal this law, and we think Gov. Shannon and President Pierce will find it a very hard thing to do."

If the slaves were not kept by their owners they would perish. They cannot take care of themselves.

(*Explains' Speech.*

John Little, a fugitive slave, who went into the Canadian woods without a dollar, has raised crops this year that will bring him $2400!—He thinks he will be able to "take care of himself."—*Ab. Ex. Jour.*

THE Berlin correspondent of the London Times, says:—"The insufficiency of the harvest in Russia, as the *Journal de St. Petersburg* lately stated it, is further proved by the circumstance that considerable quantities of corn are being imported by the Russian Government from this country for the supply of the Western Provinces. In Courland, Livland, and Finland the harvest is understood not to suffice even for the wants of the population."

It is stated that the English government has now some 200 iron gun-boats and mortar-boats in course of construction, all to be propelled by steam. These will doubtless open a new chapter of the war on the opening of spring. Great activity continues to prevail in the English dockyards and military establishments. The government has now under contract about 240 steamers and 200 sailing ships.

DURING the search "instituted" by the editor of the Newark Times for female compositors, it is reported that the following short dialogue took place:

Printer—"Good morning Mr. Hemphck: have you got any daughters that would make good type-setters?"

Mr. Hemphck—"No; but I've got a wife that would make a very fine devil."

THE Tribune, speaking of the enormous city expenses of New York, says: "The amount of money wanted to grease the machinery of Government for 1856 is nearly *six and a half millions of dollars*, or more than *ten dollars* per head for every man, woman and child in the city."

SPECIAL NOTICES.

Derangement of the Liver is one of the most common, as well as the most formidable of diseases known to American latitudes. It had for years attracted the closest attention of the medical faculty in all parts of the United States, and yet up to the time of the discovery of Dr. M'Lane's great specific, it was almost beyond the reach of medical skill. Thousands had perished without even a hope of relief, and although thousands still linger, yet be destined to feel the direful effects of this most complicated disease, it is now, thanks to the research of Dr. M'Lane, most energetically brought within the scope of medical control. The proprietors of the Liver Pills are confident that they offer a remedy which has been fully tested by time, and which has never failed of success when fairly tested.

☞Purchasers will be careful to ask for DR. M'LANE'S CELEBRATED LIVER PILLS, and take none else. There are other Pills, purporting to be Liver Pills, now before the public. Dr. M'Lane's Liver Pills, also his celebrated Vermifuge, can now be had at all respectable Drug Stores in the United States, and Canada.

The Greatest Medical Discovery OF THE AGE.

Mr. Kennedy, of Roxbury, has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst form to a common Pimple.

He has tried it in over three hundred cases, and never failed except in two cases (both thunder humor.) He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston.

Two bottles are warranted to cure a running sore mouth

One to three bottles will cure the worst kind of pimples of the face.

Two to three bottles will cure the worst case of blotches on the skin and stomach.

Three to five bottles are warranted to cure the worst case of ringworm.

Three to five bottles are warranted to cure salt rheum

Five to eight bottles will cure the worst case of scrofula

Scaldhead in children, whose flesh was sore and flabby, restored to a perfect state of health by one bottle.

To those who are subject to a sick headache, one bottle will always cure it. It gives great relief to catarrh and dizziness. Some who have been victims for years, have taken and been regulated by it. Where the body is sound, it work quite easy, but where there is any derangement of the functions of nature, it will cause very singular sensations, but you must not be alarmed—they always disappear in from four days to a week. There is never a bad result from it. On the contrary, when that feeling is over you will feel yourself like a new person. I heard some of the most extraordinary accounts of it that ever ever listened to. No change of diet is ever necessary—eat the best you can get. I have likewise an herb, which, when steamed in sweet oil, dissolves scrofulous swelling of the neck and under the ears. Price 50 cents. Price of the Medical Discovery $1 per bottle.

DIRECTIONS FOR USE.—Adult, one table-spoonful per day. Children, over eight years, dessert spoonful; children from five to eight years, a teaspoonful. No directions can be made applicable to all constitutions, take enough to operate on the bowels once a day.

MR. KENNEDY gives personal attendance in bad cases of scrofula.

Sold, wholesale and retail, at Dr. KEYSER'S, 140 Wood street, corner of Virgin alley.

Speaking What They Know.

These gentlemen take pleasure in testifying in regard to R. A. Fahnestock's Vermifuge, because two of the firm are well known to them in their private practice as physicians for a number of years, and they have known it, by observation, to be good.

New Albany, Ind., July 6th, 1855.

R. A. Fahnestock & Co.—

GENTLEMEN—Having sold your valuable Vermifuge for some time, and having seen it used for many years, we would recommend it to all who will use a Vermifuge, and for all cases of worms. In no instance have we ever seen any evil results following its administration, but always have it to answer the purpose for which it was intended, and been entirely satisfactory.

Believing that everything that has been set forth in regard to its virtues is strictly in accordance with our observations, and only as precautionary, but as cases of business, we would unhesitatingly say to all who read this, that it is the best Vermifuge now in use, and that its virtues are best known when tried.

Important to Farmers.—New Discovery.—VEGETABLE CATTLE POWDER.—These powders are put up in one pound packs, and are really a good article, and only for the diseases incident to horses, cows, sheep and other animals, but they are likewise an excellent article to improve the condition of hogs for market.

For Milch Cows, they not only improve the condition of milch cows, but they increase the quantity as well as improve the quality of milk and butter. The proprietors say that it increases the quantity of butter from half a pound to a pound a week to each cow while those persons who have tried it say a pound and a half to two pounds per week, with the same kind of feeding as before. For sale by one or two packs, all who use it in one will use it all time, and save money by the operation as well as improve the appearance of their stock. Price 25 cts. a paper; 5 papers for $1.

PATENT GROUND SAWS.

HAVING purchased from Mr. Wm. Southall his Patent Right, for grinding circular and other Saws, for which he has long had a large run, and we are the sole proprietors of this patent. We will reveal and impart giving information of infringements on the same. This is the only Machine ever invented that will grind a Saw perfectly even in the corners.

They will require less sets—will not heat while running—will run smooth—save lumber—and keep an edge longer than any other saws made—and are not liable to become untrue.

All our Saws are made from an Extra Quality of Cast steel, imported expressly for our own use, at much higher cost, and warranted not to Saw.

We respectfully intend all manufacturers of Lumber, that no Saw will be sent from the Establishment but what is of superior Steel and workmanship; the Temper will be found more even and uniform than any now in use.
