The Hand Sewing Machine,
F. E. ROBINSON & S. H. ROPER,
OF HOWARD & DAVIS, BOSTON.
THIS Machine actually sews; uses but a single thread; forms its own needle, and takes the stitches as formed in the cloth. The stitches are formed in a kind of chain, except in the perfection of their accuracy and regularity, cannot be distinguished from hand work. The work is performed with of least six times the rapidity while being of vastly superior quality to the best Hand Sewing.

The American Watch
IS now on sale by the principal dealers throughout the country, and the public are invited to examine and test the quality in comparison with the
AMERICAN WATCH
Invented and patented by the PATENT LEVER FUNCTIONARY, at long trial and approved with such success as to warrant the Manufacturers in saying that experience has demonstrated to the public that the AMERICAN WATCH is guaranteed to be the most perfect TIME KEEPER ever manufactured for the money.
The Manufacturers warrant the AMERICAN WATCH to be a perfect timekeeper in all respects, and to perform more work and more perfectly than any other watch, and that no part of the movements will require repairs for many years; &c., have been sold to individuals in this place, and that a certain store has been dealing largely in the same articles. This system of rascality and plunder has been carried on successfully for years, and there is no calculating the extent to which the Government has been robbed. Public suspicion points to various individuals, here and elsewhere, in connection with this matter, and a legal investigation will no doubt lead to some interesting developments. There are evident manifestations of uneasiness exhibited in certain quarters, and if current rumors be true, not without good reason. The principals in this affair have said and done a great deal, but the officers of justice are "on their track," and will no doubt succeed in "spotting" them.
