A Sinistral Squire at Central America.

A committee of gaulemen in New Orleans, "regarding the events now transpiring in Central America so of vast importance to the country at large, and to the interests of the South especially, and believing the present moment to be a critical one, which calls for prompt and energian action on the part of the friends of the American movement in Ricaragua, and of the ulterior objects to the forwarded by that movement," have invited Hon. Pierre Soule "to lay before them such suggestions as he may think fitting, relative to the present state of affairs in Central America," &c. Mr. Soule has consented to do so, and he says, in his reply to the invitation: "It is troe, theo, though entirely unconnected with the schemes and fortune of the gallant adventurers, who so nobly defends the rights of an oppressed people against the tyranny of a handful of petty despots, who hold them in abject and almost beastly abjection, I have watched his course with intense solicitude, and perhaps your pathwise deeply with his aspirations. But I can hardly see anything in this to enable me to judge with any sort of actiority of the probable issue of the strongle in which he is egaged."

This Tooks like the commencement of a movement towards the annexation of Nicaragua, for we can hardly suppose that the "ulterior objects" hinted at can have any other meaning.

The Costs Ricans are in persession of Virgin Bay and San Juan del Sur, and even if these passengers could reach the Pacific ocean there is no steamer there to take them to their destination. If they return to Greytown their case is but little bettered. There are feare entertained here that they are still detained on the river and that many of them will fall victims to the climate and to hunger.

RAILMOAD LEON AND RUYLLANS.—Last Saturday night the America arrived from New Orleans, bringing about eighteen hundred bars of iron for the Illinois Central Railroad. She was detained about twenty-four houre discharging it. She also brought up about two hundred of the most despicable ruffians and out-throats we were raw. They halled from Alabams and the sand hills of Georgia, and said they were going to Kansas to vots, and return after the election. Each was armed with a bowe-knife and revolver, which he seemed to take great delight in exhibiting to everybody. On Sanday night about fifty of them went out on the Mississippi Laree, fell upon two or three men, shot at them several limes, and beat one of them in a most or use manner. The next morning as the beat was going up to Mississippi river, several young men were standing on the bank looking at her, when the brave sand hill cranes deliberalely drew their pistols and commenced firing at them. Several shots came pretty close, but no one was butt. If these Georgians do not exhibit most bear of the south are counted as only three privates and commenced firing at them. COMMUNIAL ADVENTURE.—The Buffulo Republic relates that recently a false hearted married man in Detroit attempted to elope from his lawful repouse with another woman, to Canada. The grilly couple crossed the river in one steam; while the injured but spunky wife pursued them in another; and just as the train was leaving Windsor the latter sprung upon the rear car made and ran through the ceaches until abe found the runaway couple, quietly reated side by side. She upbraided the man for running away from his lawfully wedded wife, and insisted that he should leave the cars and return with her. This the hubband stoutly refused to do, when the wife specaled to the conductor, and produced the necessary wonchers of her identity. The conductor, with much good sense, decided that a woman was cutilted to her hubband, and informed the man that he would be under the necessity of delivers his would be under the necessity of the strain of the ment of the ment have been the necessary would be under the necessary would be necessary would be necessary would be under the necessary would be necessary would be necessary wou

Totten, dated Aspinwall, April 20th, states that all was then quiet at Panama and the transit considered as eafe as it over was. In order, however, to be prepared for any future disturbance, he has sent to New York for fifty of Sharp's rifles to arm the soveral stations. We see it stated, too, that secratary Dobbin has promptly ordered the United States steamer Fullon now at Pausscola, to proceed to Aspinwall. The New York Tribune, in connection with this subject, says:

We understand the steamer Orizaba will not return to San Jung, and as the Uncle Sam and Cortex are at Panama waiting orders. Nicaragua appears to be out off from direct steamer com-

Suprension of the Bible in Madrid.—The Spanish cabinet has declared that a lible printed without notes or comments being necessarily taken from "the Holy Fathers"—may not be dirculated in Spain. This has been declared over and over again, from the days of Charles the Fifth until now, and the law, of the Inquisition has been enforced scoordingly, so far as practible. Yet the Bible is said to circulate in Spain each year more and more, and this, not withstanding the watchful dilligence of Vicarias, Adrianeros and Carabineros, and all maner of collesiasilesia suthorities from pope to sexton.
