DISEASES OF THE LUNGS.

DR. ROBERT HUNTER desires to announce that for the information and guidance of those who are suffering from affections of the Throat or Lungs, he has established a family medical periodical entitled the "Specialist and Journal of Diseases of the Chest," in which will be found a full exposition of his views on every subject connected with pulmonary diseases.

The February number contains, in addition to much information which should be read by every one predisposed to or suffering from either Catarrh, Bronchitis, Asthma or Consumption, an extended explanation of the method of treatment by Inhalation.

Dr. Hunter would also announce that he has opened branch establishments for the treatment of these diseases at Philadelphia Baltimore and Washington. These will be conducted under the professional charge of skilful and accomplished resident physicians, who have enjoyed in association with him long and successful practice in the treatment of pulmonary diseases. Patients, resident in either of these cities, will therefore in future enjoy all the advantages of Dr. Hunter's advice and treatment under the most favorable auspices.

These arrangements are rendered necessary by the Empiricisms practised under the name of *Inhalation*, both by wandering quacks, who, in many instances, use Dr. Hunter's name for their own purposes, and by the sale of *Inhaling Apparatus* in the Drug stores throughout the country. Inhaling is not being followed out in this way in practice and to discourage persons from availing themselves of this, the only scientific and successful mode of treating diseases of the Respiratory Organs.

In chronic affections of the Throat and Lungs it is of no difficulty attending the treatment of cases by correspondence, and for the convenience of those wishing to avail themselves of his treatment, Dr. Hunter has prepared a list of questions which will enable them to give a more full and explicit statement of their cases. This list, together with a number of the Specialist will be forwarded on application to either of the following addresses: New York, Dr. Robert Hunter, No 823 Broadway; Philadelphia, Dr. F. Norton, No. 8?2 Walnut st; Baltimore, Dr. J B Williams No. 1?26 North st. Charles st.

Note—Dr Hunter can always be consulted personally, as well as by letter, at No. 823 Broadway, New York.

The Specialist is published at \$1 a year in advance.

A specimen number will be sent gratis on addressing the publishers, SHERMAN & CO., Astor House, New York or the editor, Dr. ROBERT HUNTER, mh22:1eldAwT

FARM LANDS FOR SALE.

THE ILLINOIS CENTRAL RAILROAD COMPANY
ARE NOW PREPARED TO SELL
GIVE TWO MILLIONS OF ACRES
FARMING LANDS,
in Tracts of 40 Acres and Upwards,

On long credits and at low rates of interest.

These lands were granted by the Government to aid in the construction of the Railroad, and include some of the richest and most fertile Prairies in the State, interspersed here and there with magnificent groves of oak and other timber. The road extends from Chicago, on the north-east to Cairo at the south, and from thence to Galena and Dunleith, in the most west extreme of the State, and as all the lands lie within 15 miles on each side of the road, ready and cheap transportation are afforded by it for transporting the produce of the lands to any of those points and from thence to eastern and southern markets. Moreover, the rapid growth of flourishing towns and villages along the said line, and the great increase in population by immigration will afford a ready and growing home-de-and for farm produce.

The soil is dark-rich mold, from one to five feet in depth is gently rolling, and peculiarly fitted for grazing cattle and sheep, and for the cultivation of wheat, Indian corn, &c.

Economy in cultivating and great productiveness are the well known characteristics of Illinois lands. Ts se are not required to be cut down, stumps grubbed, or stone picked off, as is generally the case in cultivating new lands in s e older states. The first crop of Indian corn planted on the newly broken sod, usually repays the cost of plowing and fencing.

Wheat sown on the newly turned sod is sure to yield very large yields, often fifty bushels per acre, and yields of that will break even and a half to two acres per day. Contracts can be made for breaking land for corn and wheat, at \$2 to \$3 per acre. By judicious management land may be ploughed and fenced the first, and under a *fair state of cultivation* the second year.

Corn, fresh, cattle, et y will be forwarded at reasonable rates to Chicago, the Eastern market, and to Cairo for the Southern. The larger yield on the cheap lands of Illinois over the high-priced lands of the Eastern and Middle States, is known to be much more than sufficient to pay the difference of transportation to the Eastern markets.

Bituminous coal is mined at several points along the road, and is a cheap and desirable fuel. It can be delivered at several points along the road at \$1,50 to \$4,00 per ton Wood can be had at the same rates per cord.

Those who think of settling in Iowa or Minnesota, should bear in mind, that lands there, of any value, along the water courses, and for use in miles inland, have been the cheapest of—that the those located in the interior, there are no conveniences for transporting the produce to market. Railroads are being built, but time will be required to send the produce of those lands, one or two hundred miles by waggon to market, would cost more than the whole expense of cultivating them and hence, Government lands thus situated, at \$1.25 per acre, are also so dear in reality at the land or this company at the prime fixed.

The same remarks hold good in relation to the lands located and for sale by, so although vacant lands may be found near the water courses, the distance to market is far greater, and every hundred miles the produce of those lands are carried either in waggons, or interrupted water communications, increases the expenses of transportation, which must be borne by the settlers, in the reduced price of their produce, and to that extent lessens the proportion of their income from their farms, and of course on their investments, annually and every year reduced.

The great fertility of the lands now offered for sale by this company, and their consequent yield over those of more Eastern and Middle States, is sufficiently ample to pay the difference in the cost of transportation, especially in view of the difference in the price of the lands. In view of the foregoing facts, the operations of which are not in accord by the low water of summer, or the frosts of winter.

PRICE AND TERMS OF PAYMENT.

The price will vary from \$5 to \$20, according to location, quality, &c. Contracts for deeds may be made during the year 1856, providing the purchase money to be paid in five annual instalments, the first to become due in two years from date of contract, the others annually thereafter for the last payment will become due at the end of the sixth year from date of contract.

INTEREST WILL BE CHARGED AT SIX PER CENT PER ANNUM, with payments semi-annually. Interest must be paid in advance, and if not paid when due, will be added to the principal and bear interest at the same rate as the principal.

As a security for the performance of the contract, the first two years' interest must be paid in advance, and at the end of each year after 1856, stipulating for the purchase money to be paid in five annual instalments, the first to become due in two years from date of contract, the others annually thereafter. The last payment will become due at the end of the sixth year from date of contract.

As a security for the performance of the contract, the first two years' interest must be paid in advance, and if not paid when due will be added to the principal and bear interest at the same rate as the principal.

Deeds will be executed as soon as the first payment is made, and a like deed executed for each succeeding payment as it becomes due.

Persons wishing to purchase will be supplied with descriptive circulars, containing numerous instances of successful farming, stirred by responsible and well known gentlemen, living in the neighborhood of the Railroad lands, throughout the State—also the cost of fencing, price of cattle, and other information relating to agriculture, by contract—or any other information will be cheerfully given, on application either personally or by letter, in English, French or German, addressed to JOHN WILSON,
Land Commissioner of the Illinois Central R R Co.
Office, 1st st. foot of Lake st. Chicago.
N. B.—Old Prairie farms taken in exchange at their cash value after that date at the Passenger Depot, foot of Lake st. Water st., Chicago. mr16dw3

Parkersburg Mineral Wells.

THE undersigned, proprietor, respectfully announces to his friends and the public that this well known watering place is now open for the reception of invalids and visitors generally. Since last season, considerable additions and improvements have been made, and the establishment is prepared to entertain a larger number of guests than ever before. Or the virtues of these waters, its merits have already undeniably proved by many persons, it is unnecessary to say anything; the Wells are widely celebrated by many persons of remote situations, who have effected. Let it suffice that, in cases of dropsy dyspepsia and hindered diseases, they are beneficial: functional derangements and nervous debility. Every attention extended to boarders, to promote their health and comfort.
