It has succeeded ments and new schlovemients. The manmanificure of war, the strengthening of the slave-holding interest by new accessions of Territory—Gubs, Mexico and Nicarogus—as openly avowed in this convention, points plainly to their programms for the future. It is true that they have not yet succeeded in securing the slave-trade, but this follows as an almost necessary consequence of the plan for reopening the slave-trade, but this follows as an almost necessary consequence of the adoption of resolutions in favor of securing Central America and of "introducing slavery there." They plant them selves upon the doctrines of the Ostend Manifest from Their idea of the object of this government is that of an organized force for grasping slave territory.
