Utant.—There are stories of dreadful out rages committed upon persons in Utah. The following are some of the reports:

At this time, cir, there are five young men lingaring out a wear; lite of misery and wretched and any and dismal cells of the Utah Feniteritary; for no crime known to the laws other than expressing opinions: of disapprobation of the doctrines of Mortaonizm, which here is the blackest chime a man can commit. It is wortby for remark that these young men are not Mortaonizm, which were passing ou their way to California, to fit is not possible to survive such brutal treatment very to g.

Quite recently a young man by the name of Lowie was convicted of analytic and battery, and sentenced to five years impresoment in the Paoistenitary; and while on the way to the prison to die. There things are too common to be endured much longer; and unless the Federal government appealing library, the missrable ends of both Mormons and officers of the government on the following from the Louisville Journal of Monday last:

Since writing the above we observe that a new Manufacturers of and Doalers in ALCO. KTIERRAL, CAMPHIND and FINK OILS, UAS predicte a good dividend. He says that slavebbling in New Origans. It is to aid Walker by deep are anxious to take stock in the opport, oresting a diversion in his favor. The attack is miting, required, Registing and Fink Outs. The attack is made on Versgue, New Granda. and that there is no doubt of its success.

WHEN SEALL THE END COMP!-In reading over | The New Orleans Delta, whose former editor, | a detailed account, written by an eye witness of Heiss, is to speak for the administration in a most he describes, of matters in Micaragua past new papers at Washington called "The States" and present under Walker, the question forced is the organ of these fillibusters, and urges on itself upon us—when shall these horrors find an the recruits for the purpose, as it alleges, of end? There is not a more painful chapter in securing new territories for the South and her history than this. The retreat of the French army from Russia is worse only in the amount whole matter. not in the degree of misery. Among the poisonous marahos of the tropics, disease in its most

mito, or seek death in the most revolting excess-es. Above all a correspondent of the N. Y. These writes that Valker never relaxes his grim the point:

that it has not been collected, argues either that there has been gross negligence on the part of the State officers, or that many of these balances against public officers are merely opparant, and not real; unless, indeed, we adopt the hypothesis, that, both of these assumptions are true, which we are inclined to believe.

Many of these balances have been standing for at least a quarter of a century. We notice at the beginning of the list the name of "Wm. MicCandless, Prothonotary of Allegheny county," which has not been prothonotary of this county within the last twenty-five years, and that is as far back as our recollection goes. If the bal-

suan del Sur, which being deducted from 1,670, shows a loss of 880 men, wemen and children in 90 days—a little less than sixty per cent of all the population, or twenty per cent monthly, as before stated.

In all this array of misery, this cambral of the population of the populatio

immaculate leader of the Fillmoreites last fall, owes \$264. That amount appears to havestuck to his fingers as Chairman of the Joint Legislation about to the dying, but to robbers and the last academic year,

another 90, and in another 50. We have neither the space nor the heart to trace this wretched man further along his Columbia road. The roll of these defaulters is path of blood and desolation. We have, howa long one, and the amount of their indebtedness ever, as we think, a glimpse at the answer to the question in the caption in the following:

is large.

The balance of the list consists of the unsettled accounts of county treasurers and prothonctaries. From the formidable array of names
presented, the settlement of such accounts appears to have been the exception instead of the
rule.

The duty of the members of the legislature
with respect to these accounts, is plain. They
ought to appoint a committee to examine them,
with directions to inquire into the facts fully.
If there are any of the necounts that ought to
be honorably closed, at once, let them say so; if
there are any that are unterly worthless, as we
are sure there are, let them say so; and if there
are any that are undealably just and can be collected, let them be exparated from the rest, and
their cellection pressed with all possible vigor.
It is time that this frightful list should be curtailed of its proportions; and while justice is
thus done, on the one hand, to those who have
been miplastly classed as "defaulters," let justice
also be done to the Commonwealth in securing
to her treasury what is proporly her due.

We want hink, a glimpes at the answer to
the question in the caption in the following:
The entire native force investing Rivas, and by
this time occupying Ban Juan del Bar and the
Transitic Road, may be estimated as follow:—
The duty of the members of the legislature
with respect to these accounts, is plain. They
ought to appoint a committee to examine them,

What is Iodine Water? - A great deal of excitement pression regard to this new medical discovered and properly say. Why, Iodine is net new certainty pote. Iodine was discovered as long as forty-dry years ago, by a Soda manufacturer of Paris named Courtois. It is not a mineral subtaine. It is found in spongs, orsters, seaweads, in various minaral springs, and many persons attribute the medicinal properties of Cod Livar Oil to Iodine. Which it contains in small quantities. The trouble hitherto with it has been that it would have dissolve in pure water, without combining with something size, which injured its medical properties. The Iodine Water then it a scintion of Iodina in pure water, and nothing size. It was discovered by Dr. Anders, of Newlforts, and is used in the same diseases as Iodina would be used for. It is a great diluraties or purifier of the blood-drives of bad humor; makes Rheumatisca let so its hold on the Joints, and drives it out of the marrow of the bines. It braces up the weak nerves, and cures it for the load-drives of bad humor; makes Rheumatisca let so its hold on the Joints, and drives it out of the supers abundant hile. It cures dropy and diseases of the blod-der and kidneys. It does not pretend to cure every discusse, but only those where an alterative medicine would cure.
