REANDRETI'S PILLS.

Not only purily, but they make the blood sicher, and add those principles upon which its power to resist discurse descends. depends.

Spring the form when its price are the precisionity of Brandrichs price. Now that we may some expect section of Brandrichs price. Now that we may some expect sections by the wise. Our row are religious to a resundancy of vitiated bile at this season, and it is as dangerous as it prevaient; but Brandrich's Fills afford an invaluable and efficient protection. By their creational use, we prevent the collection of these impurities, which, when in sufficient proteins cause on such danger to the fire organization on the support of the fire organization on the fire organization on the support of the fire organization and the support of the fire organization and the support of the fire organization of the support of the fire organization of the support of the support of the fire organization and the support of th the collection of those impurities, which, when in sum-ciant quantities, cause or much danger to the fire organs of the stemach and bowsis. They soon cure lier com-plaint, dyspepsis, less of spellie, pain in the bend, heart livro, pain in the breast bone, unden faintness, and cars thereness. In brief, firandreth's Pills work their way thereness. In brief, firandreth's Pills work their way to the very roots of the disease, cleaning in their passes removing every unhealthy accumulation; till the blied is Briffied, the whole graters removated, and the function² and duties of his become a pleasure, where before they had been ned and weary brights. and duties of life become a pleasure, where before they had been and and weary burdens.

We have thousands of similar testimosphels to the follows leveling, and such evidence can be had from living witnessess all account or on severy side. It is from a greatenant of high respectability, whose letter can be seen at the Frincipal cline, he writes:

"I am now fitty two years of age.
"Cut wenty years I have need your Pills as my family medicious, and I wish no other! and have never had any consider to call a bryichen in my family, (save in the pickness of my wife with children) during the twenty years."

The Paics of Hides and Learner.—As the price of leather is exciting much interest, we quote the following from a New York circular:

"The market has been without animation throughout the past week. The trade bave purchased only to rapply small orders from their tanners and the transactions have consequently been more limited than hitherto and amount only to 18,946 bides, embracing 1,500 G S, and 1,000 to 1,500 dry domestics for export.—Soms holders exhibit more willingness to meet buyers at lower rates; but the condition of the leather market, for the precent, affords no encouragement to dealers to make extensive purchases, except at considerably greater reduction than importers are willing to submit to. The stock in first hands be qualito only a half month's supply, and with small receipts for the remainder of the month must come be absorbed by necessary concumption. The receipts of sole leather the past week have been smaller than in the provious weeks of the month. Sales during the same period have been a little more extensive at prices favoring purchassers."

Provissor Clark, of Amberst College, while performing the experiment of making electrical light, one day last week, was very nearly blinded by the intensenses of the light, since which he has been obliged to confine himself to a dark room. So painfully intense is the impression left upon the retine of his eyes, that though the roots is so dark that his friends and attendants pannot see can other in it, to him it seems to be filled with the most darling light. Permanent and serious results are feared from the affection, but hopes are entertained from the affection, but hopes are entertained from his present see clusion from daylight, that his excited and inclusion from daylight, that in terminal transfer of the same seminated with the most light, since the same seminated in the part of the same seminated in the same seminated in the part of the same seminated in the same seminated in the part of the same seminated in the same semina but hopes are entertained from his present se-clusion from daylight, that his excited and in-flued organs will shortly recover from the shock and be restored to their normal condition.

Callathungians.—The Brooklyn Times tells of a newly-married couple, who, hearing that the Callathungians were about to visit them; prepared for their entertainment a splendid ised cake, in which ipecae enough had been stirred to give an operative dose to each slice. The Callathungians came, were invited in, and fed liberally. The doctor of the village laid the foundation for a fine fortune, within the naxt week, and we are informed that it so completely cored the Callathungians of their musical propensities, that the price of homesteads in the vicinity has gone up twenty five per cent already.

the whest crop of this year. The extraordinary cold and unfavorable season has destroyed many handred thousand acres of wheat that a few weeks since was promising enough. We understand that some very heavy wheat consuming prophet in St. Louis is predicting that "good white" will soon bring \$2 a bushel. It will be time then for the comet to come!—

Ft. Louis Intel., 20th inst. THE Boston Traveller says: "The Constitu-tion confers jdriediction upon the Supreme Court in controversies between a 'State or the citizens thereof, and foreign States, citizens or subjects.' Negroes, according to Judge Taney, cannot be citizens of the United States. But

obnot ob current or union States. But they certainly can be clissons of foreign States, for instance, of England. And thus a British negro can sue in our United States Courts while an American free negro, born and bred on the soil, is excluded from the privilege." THE Grand Duke of Tuscany has "for the Tim Grand Duke of Tussany has "for the present" declined to concide with the Papal Chair a concordat like the Austrian. The King of Naples positively refuses to give Rome a documental right to infringe on his Sovereign rights, but he assures his Holiness that the Church has no more faithful son than himself, and none more willing to make voluntary concessions to her. The fact is, that King Ferdinand shows as bold a front to Rome and Austrians he does to England and France.

MARRIAGE POSTPONED.—The London Court Journal announces that the marriage of the Princess Rayal of England is postponed till January next. One of the ressons assigned for this postponement is that the rasidence preparing for the Prince and Princess in Berlin will not be completed and fit for occupation till the end of the year. An unassigned reason is that the Princes will only be 17 years of age in November next.
