these, and many of our long time readers have acted upon the suggestion. We doubt very much whether one of them can be found who would part with his hay caps for three or fire times their cost; if they could not be replaced by others.

\*\*Wilsow are they made?\*\* Get a piece of coarse cheap- cotton cloth, the more closely woren the better. Let'lt be 14 yards in width, if you can get that width conveniently, or if it be only 1 to 14 yards in width, it will answer, though not quite so well. Cut it into square pieces, and with a strong twine tie a wooden pin upon each conner, The pin may be about a foot long and an inch in diameter at one end, and sharpened to a point at the other. It may be a little better to hem. The torn one cut edges, but this is not necessary, they will unrawed very little. The necessary they will not square pleetes. These c Advantages.—Every one is familiar with the fact that hay "cured in the cook" is greatly superior to that dried in the sun. By curing in this way there is far less waste of leaves and "scatterings," than when gathered into windrover after being dried. This is especially the case with clover. The average annual loss in thaying from damage by rains and dews, is much greater than is generally supposed. It is a low cetimate to say that this loss is equal to one dollar per ton on all the hay cut in the country.

Other uses of the caps.—The caps provided for hay may also be used for covering wheat and other grains standing in shocks in the field. It will pay to provide them for this purpose alone.

Private Double Education of the covery of the caps.—The caps provided for hay may also be used for covering wheat and other grains standing in shocks in the field. It will pay to provide them for this purpose alone.

MATTHEW LAWTON,
PRACTIGAL HARBLE MASON. Medical.

R. R. R. THERE GREAT LIGHTS!

MANKIND SHAVE LONG BEEN ENschurgh hashin-ridding the human body from disease, and
preserving life. The sick, under the fallacious treatment of
the regular faculty, are subject to a continued practice of
probabilities and uncertainties. There is nothing certain or
land in the treatment of the sick either, in the old or new

sked in the treatment of the sick either, in the one or a school of medicine.

Dr. Radway has succeeded in producing three remedie known to the word as Radway's Ready Hellef, Renovat Resolvent and Regulators. These Remedies are not only tablished facts innament as they have never yet failed their special or combined efficacy in producing fruitful beneficial results—but, they are facts establishing a sci —as they have in all cases, "when tried" succeeded in re-ing to health—and ridding the body from disease afte-other medicinal treatment had failed—and the most ski physicians had given up the sick as beyond the power of man means to cure—and pronounced the drealful mand-incumble.

neurable.

Radway's Remedies are therefore fixed facts in the a
hieves of medical science—they have been "often tried"nover denied"—and are ready "to be tried again."

FIRST ORREST MART!

RADWAY'S READY BELUEF.

As Special Benerals.
