extraordinary amounts of eighty-nine and ninety per cent, exceeds any thing of the kind that was ever made. The wheel is one hundred and four and three-quarter inches in diameter.—N.
Y. Post.

The March of Ikerlier in Massachusetts.

The March of Ikerlier in Massachusetts, just published, chapter 206, certain provisions occur which show quite strikingly how the standard of education in the Public Schools of that State has risen within the last twenty years. The Revised Statutes and a subsequent one had provided "that in every town in the State, of fifty families or householders, a Public School should be kept by an instructor competent to teach orthography, reading, writing, English grammar, geography, arithmetic, and good behaviour. The statutes of 1857 add to these studies these of "algebra, the history of the United States, physiology and bygiene." To the studies pursued in the schools of the next grade higher are added "general history, natural philosophy, chemistry, botany, the civil polity of the United States, and Latin;" and those of the next rank, "French, astronomy, geology, intellectual and moral science, and political economy." These are very substantial additions, and speak well for the success of the Public School system of Massachusetts.

IMPROVED SHAKEPFAREAN READINGS.—A tescher in one of the schools is in the habit of giving his pupils in composition, extracts from poems, the Bible, &c., which the scholars are required to transpose into their own language; making all the blind or doubtful passages plain.

One day the anadditional article to the static to find the substantial additions, and speak well for the success of the Public School system of the schools is in the habit of giving his pupils in composition, extracts from section work and and moral contract of the works, "article of the Constitution, to the works, "article of the Constitution, and of the secretal contract of the works, "article of the Constitution, and of the secretal contract of the works, "article of the Constitution, and o poems, the Bible, &c., which the scholars are required to transpose into their own language; making all the blind or doubtful passages plain. One day he gave out the following, from Shakspare's play of "Othello:"

"Trifiss, light as sir, are to the jealous, confirmation strong as proof of holy writ."
One little fellow who stood at the head of his class in philosophy and chemis ry, immediately wrote and handed in the following translation:

"Trifies, meighing fiften and a half pounds to the square inch are as good proof to jealous folks as a verse of the Bible.

Resolved. That this resolution pass. On the first amendment, yeas 23, nays 4. [Extract from the squares inch are as good proof to jealous folks as a verse of the Bible. Aew Bork Adbertisements. GOODYEAR'S PATENT VULCANITE, THE BEACON DAM CO., OWNERS OF ANUFACTURERS AND DEALERS IN
