Rabivit Democracy. What a spectacle! An organized most in open rebulion against law, head-ad in spirit by the Mayor of the city himself:

The law under which the new police was under the court of appeals; every movement out of which the opproceeded deduced (legal, and yet, a result, bloodshed, harriendes, and general narrhy in the streets of the nation's netropoint. This is a sad spectacle to be held up to the world! To Europe, New York is the Unite (Bistess of America. They refer every thing to that point, and when that city goes wrong, them all is wrong.

One of the leading papers of New York condemnal Gereror King for the lack of energy while his has discovered in the midst of the true in mid and bloodshed of the city. In every account we need of the riols we find that the "milliary is ready to proceed to the scenes of condict at a moment's warning;" but they never go.

If they would "proceed" and take passession of a warren of "Dead Rabbits" and take the law goes to the marms and ammunition.

The Bessexur Process.—The discovery mounced some time since of making steel and iron by a now and ingendious process, papers to the unitiated explained for the Mayor, and a wholesome exercise of power for the Governor.

with Mr. Bessemer's process all these substances, except phosphorus, are effectually expelled. It would seem that up to the present time this material has resisted all the efforts of Mr. Bessemer It defeat the utmost heat of his furnaces, and has no sufficient affinity for exygen, or any other body brought in contact with it, to consent, for its sake, to let go its tenacious grasp of the iron. Now, phosphorus in iron is, as it hoppaars, fatal to the useful qualities of the metal pit randers the iron brittle and unservice able, and as mo portion of it can be detected in the slag, of, the furnace, it would seem that, so far as its confidence, it would seem that, so far as its confidence, which should be successed by Buchanan to a position as Postmaster in Omaha, Nebraska, said to be worth as a position as Postmaster in Omaha, Nebraska, said to be worth as a position as Postmaster in Omaha, Nebraska, said to be worth as the residence of that Republic had directed his Minister at Washington to meet the demands of our Government."

Grandal, that the President of that Republic had directed his Minister at Washington to meet the demands of our Governmen erned, Mr. Bessemer has as yet altogether failed. But it would surely not be at all philosophical to conclude that the question is finally rest rost, however serious the objection may be to which we have owe called attention. It can hardly be too much to expect that in the resources of modorg science some ingredient may yet be discovered, the results of which, in the instance before us, will be no lear striking than those of sods, borax and potash when used as fluxes in various industrial operations. We should not be surprised any day to hear that some such depurgative had been discovered, and that its asimisture with the incandescent iron in the furnace was found to detach the phosphorus and leave the iron in a perfectly pure state. We wish we could go farther and suggest the existence of some such drug, or metal, or mineral, whatever it may be. We suspect that that the man who could go further than this, and supply Mr. Bessemer with its local habitation and its name, would participate largely in a most lucrative as well as scientifically

GENERAL WALKER'S EXPLANATION. - We have always said that the object of Fillibusterism in America, and eventually add it to the Union as alaveholding territory. The democratic party at the North, pledged as it has been to the support of the Fillibusters, has been compelled in self-defence to deny this; but Gen. Walker, during his present tour at the South, has confessed to its truth. In a speech of his on the 4th at Augusta, Ga., the Constitutionalist says:

"HJ dwell at some lougth upon the course pursued by the Northern press towards him, which, as he expressed, it, recked with all the foul calmines against himself and his followers which inventive brains could create, and attributed its hostility to the Jack that he had, as President of the Republic of Niearsynt, issued a decree legalizing African slave.

Kansas, frightened by the violence which their injudicious friends have inaugurated there, have turned towards Texas. On the other hand, Pre-State emigrants have stopped in Missouri and bought out the great farms of the retreating planters. The result is an exedus of large landholders, and an incursion of small farmers who will make Free State voters.
