Sunday.

One more week of care and labor Has barily crept away; To the weary word rest and quiet Are sont down from Heaven to-day

The sun shines with boly spieudor, The wind is little and mild. The trees to and fro heave as gontly As the breast of a sleeping child.

Scattered clouds are pacing slowly Over glittering fields of blue; And often they seem to turn and wait, As church going people do.

The bells are at morning service In the churches all around; They ring not their week-day clangor But a soltened, Sunday sound.

Ab, ring they sadly or merrily, Ring they loud or ever so low, They can not still the struggle That the living spirits must know.

The Scoren Productive Case.—That sudden death means insurfer, and their mirrelar must be committed by poison, are as firm articles of faith in Great Britain now as they are in the United States. There was on trial, in the first week of the month, at Glasgow, a Jian Market of the Alleghous, opening the state of the state of the Alleghous, opening the st

bings, thus releiving himself of the extra weight of moisture. Perhaps he wanted to test the different modes of conveyance, by sending some by water.

Less Martyactering.—The cotton mills of this city have been of late manufacturing one eighth less goods than formerly. The design is to make the cotton they now have on hand has till the late of January, when they will be ableted get new cotton, at lower rates, it is hoped. In a week or two, all but the Manchester Mills will man only five days a weak, not running Saturdays. It is thought that course is better and more satisfactory to the operatives than stopping work in some hands out of employ. Cotton goods are dull in the market, and it would be bad policy to pile them up while the raw material is so high. The Print Works are in full blast, manufacturing all they can, with a stendy demand for their goods, at an afterellent printing. How to Make Tax Properity.—The proper way to make a cup of good tes is a matter of some importance. The plan which I have practiced for those twelve months is thiss.—The teap to it is not entirely with the water and as gradually sink to the bottom; the result is, that the tex-leaves are not scalded, as they are when boiling water; at the late of the proper than a standard or five minutes before it is used; the leaves of the front. The importments are a prot is at once filled with boiling water; then the tea is put in the tea-pot, and is allowed to stand for five minutes before it is used; the leaves of the front.
