The facts in the case, as the Buffalo Courier learns them from a gentleman who came from the Falls on Saturday, are as follows:-The man came from Montreal, and while crossing the Suspension Bridge inquired of the driver if any one had ever been known to go over the Falls and live. The Jehu replied that no case had come within his knowledge, and that the probabilities were very strongly oppased to the occurrence of such an event. The passenger as-sured the driver that he should accomplish the feat.

This Carse or THE OUTDERAM IN INDIA.—The English papers are just beginning to realize the fact that it is not religion but a desire to restore the Mohammedan empire that has caused the outbreak in India. Intelligent Englishmen in India have noticed this feeling among the Mo-hammedans for years, and it is said-it was the practice to have daily prayer offered in the mosques for the re-establishment of the King of Dalhi. The revolution of the whole Mo-hammedan population in India. The govern-ment felt so secure that it only haughed at these initiations; and it was not till the army seized on the pretext of the graned dartridges to ma-tiny that it began to realize the extent of the danger. The rapid aprend of the mutiny haves that it was a work of concert. A German paper, in a letter from Calcutta, says the revolution was to begin in Calcutta and not Delhi. The plan Whole system. COTTON CARP.—The New York Shipping List has prepared its annual statement of the cotton crop. It appears that the total receipts at the shipping ports for the year ending, August 31st, were 2,230,519 bales showing a decrease of 6688,326 bales fix compared with the crop of last year. The total exports from the United States to foreign ports during the year ending, Aug. 81st, were 2,252,657.

in a letter from Calcutta, says the revolution was to begin in Calcutta and not Delhi. The plan was to murder all Europeans and Chrstians, and to restore the ancient Mohammedau empire. All the plans were well laid, and the object must have been attained, if it had not been for the JOHN, WETG 2,202,007. JOHN MICHEL, the Irish patriot, said some-time ago, that, if he were a fool he would be happy; and, as if acting upon that conviction, he has been making one of himself ever since. And, to tell the truth, it has not been with him a pursuit of happiness under difficulties.

a pursuit of happiness under difficulties. SOROHO SUGAR.—One of the finest samples of sugar we have seen, says the Austin (Texas) Gazette, is a sample made from the Sorgho cane, by Mr. Studor, near Austin. It is of a fine grain and color, and would command the high-est price in New Orleans. We have also seen a sample of his syrup made from Sorgho, which is a very superior article.

Is a very superior stucce. CRIME IN NEW ORLEANS.—There has been fity-two murders and homicides in New Orleans during the past eighteen months. A great many persons have also disappeared, who are supposed to have been murdered. Thirly of the number killed were foreigners killed by foreigners. oreigners.

h the plans were well laid, and the object must have been attained, if it had not been for the precipitancy of one of the native regiments, which commenced the outbreak too soon. Last FOND LOOKS.—When a lady (we are talking of a lady in the full height and breadth of fashion.) This got her bonnet and gloves on, and is perfectly ready with her parasol in hand, she always goes back to the looking glass to take a last fond look. Upon our asking "s dear, handsome duchees," if this was not the truth, which and the charming candor to state: "Yes, my dear Punch, it is the truth, but not all the truth. No woman, take my word for it, is satis though she was pleased with herself and all the world.) I don't mind telling you, *I invariably lake jour-four good ones.* The first look in tho glass is for myself, that's fair; the second is for my busband, that's nothing but just. the third is for my friends, that's numan nature. If the lad look satisfies mo, then I know it is all right, and, I assure you, I never take any more!"-*Punch*. LETTERS from Syris report the total destruc-tion in the Desort of a caravan. The latter con-sisting of 500 persons and 4,000 camels, ladon with merchandize, started from Damasous on the 29th of June, and by some mismanagement lost its way. The entire caravan perished, with the exception of some 20 persons.

CUTER AND STATE-A COLLISION IN AUS-THAT-The Archbishop of Milan lately met-so goes the story-the Empress of Austria on the staticase of the Duome, and the robes of the former got so caught by the hoops and orinoline of the latter, that a tearing of garments be-came necessary to effect a separation. This is not the first instance of a collision between Church and State more the first instance - base LLENESS OF THE KING OF PRUNSIA.—The Subset of Berne says: Reliable accounts received from Prussia state that the health of the Kinginspires serious unessiness. He had an attack of apo-plexy some time ago at Pilnitz, and a second one only a few days since at Pottsdam. This we learn by private letters."

"WE HAVE MET THE ENEMY."--- No. WE not the hrst instance of a collision between Church and State, nor the first instance where the parting of them has damaged both parties. In regard to the present entanglement, it is said the diversion of "the young and august victim was immense." How could it be otherwise than immense, considering the extent of the circum-ference that must have been shaken by the royal cacchination ? wrong; we started out yesterday 'to meet him and he had fied, or rather had not nustered suf-ficient strength and courage to fairly enter it.— When is the caliant Damogracy of Maine going to prove izelf a forman worthy of Republican steel '-Portland Adv.

company has been formed in Northfolk. CL., to manufacture castings for sugar cane mills. There is estimated to be 400,000 acres planted with the Chinese cane this year. Otcourse the most of it is planted merely for curiosity, and, for want of proper means for grinding, and hnowledge of extracting the julce, a great num-ber of failures will be reported. But a single successful demonstration; that the cane will produce sugar enough to be a profilable crop, will set off against all the failures resulting from ignogance as to its cultivation.
