The result we said the summer observant men were compelled to hold up their hands, aghast at the wild spirit which was forcing the country into the jaws of ruin. The importations were, for some time, double what they were in the corresponding period of last year, while the exports of produce were as steadily falling off. The result was easily foressen. These importations had to be paid for in gold, and when, a few weeks since, the export of gold from New York ran up to three millions a week, it became apparent that the present crisis could not long be postponed. It has come sooner than we anticipated. The banks could not stand the drain upon them and have succumbed. They had no alternative but to do that or plunge the match in their origin, and the whole difficulty is distinctly traceable to the spirit of overtrading which the low tariffs forced upon us by the democratic party have ongendered. And we are only at the beginning. Manufacturers all over the country will be forced either to esuspend or materially correlated before the suppraction was not corresponded. This Company makes Insurance on lives, on most have been duped into a support of the democratic party—will be the first sufferers and will feel the blow most heavily. We chedder to think of the distress that must fall upon them, this winter. We have already chronicied the scoppage of the Montour Iron Works and the discharge of 2,600 working men in one mass, and daily we are adding to the fearful catalogue. The Philadelphia correspondent of the New York Tribune writes:

"This city is suffering in common with yoursefrom the same chronic evil, the sin of the Government in gorging the nation with every description of foreign goods. Our local industry is rapidly becoming paralyzed under its effects. An extensive manufacturer of wall-paper supponded last week, who paid out \$1,500 weekly far wages. They have now stopped their sale for coal paper, and are in doubt who to trust. Print works and other industrial egglab ishments are suspending, and other crowds of operatives are turned adrift. Chuting down of expenses is the order of the day, as money seems almost impossible to be had. Confidence has departed so generally that those who seemed to have seized both upon the holds charge of laboring men and mechanics will soon become general.

There is no remedy but in a return to the Protective policy. We must, if we would thrive as a nation, foster domestic industry, and take care not to buy from Europe more than we are able to pay for. The South is the enemy of this to buy from Europe more than we are able to pay for. The South is the enemy of this to pay for. The Bank of Pennsylvania was the fiscal agent of the State, and the State Treasurer generally had a large deposit there. The Philadelphia Times of Friday thus hints at heavy losses to the State:

The state Finances.

The effect of the stoppage by the Bank of Pennsylvania spread like wildire, and almost immediately a run was made on all the other banks, which was continued up to the hour of closing—three o'clock. The demand was principally on deposits, the circulation of no one of our banks being large. Indeed, it is quite small. A LLEOHENY VALLEY

"By the last Legislature a law was passed appropriating \$60,000 or upwards to the payment of a certain class of canal claims. These claims have been persented by the holders, and prepared legally for settlement. They, have also been presented to the Canal Board, by whom they must be appropred.

One day last week, the Canal Commissioners met to discharge the duty thus imposed upon them by law. Much to the surprise of every one, they suddenly adjourned without any action, and started from Harrishurg to Philadelphia, in company with the Biate Treasurer. What was the cause of this sudden adjournment? Had they heard financial news which alarmed them? Had the funds of the State which they had been speculating upon been which they had been speculating upon been swamped in some of the financial failures which had been going on? Were the funds of the State adeply involved that it would have embrassed the operations of these gentry to have issued drafts for the \$60,000? Are the funds loaned to banks in this city now known to be insolvant contrary to law? Are those institutions unable to refund at once, and must the honset creditors of the State await the will of one of these insolvent banks for the payment of their just claims? Will those who have waited patiently for years have still tow wil longer, because gentlemen who are entrusted with the finances of the State choose to speculate upon them?"

This is a question that demands and must the finances of the State choose to speculate upon them?
