HARMONY'S NEPHEWS & CO." I have made a chemical examination of some specimens of W. E. CHILDS & CO'S ROOFING, left at my office, the results of which are as follows:

1st. The material is compounded so as to remain pliable for a great length of time.

2d. The consistency is not resultly influenced by the temperature, consequently it would not be liable to melt and run of from a roof is Summer, or crack in Winter, i. e. actrumes of natural heat and cold would not injure it.

3d. The composition is not acid but slightly slixible. It would not destroy the canvass, but on the contrary protect it from the action of the weather.

4th. It is Water Proof, and to a large extent Fire-Proof; that is, sparks and fire brands falling upon it could not inflame it. I my opinion much a roof will last for years if put on carefully and receiving prompt saturation. J. C WILD, ESQ., RAPID BUSINESS WRITING, Cashier Union Bank of Md.,.... Baltimore, Md. The composition is no scale one single year.

The composition is not scale one single year in the section of the weather.

It is Water Proof, and to a large extent Fire-Proof; that is, sparks and fire brands falling upon it could not in.

In my opinion such a roof will last for years if put on carefully and receiving prompt attention.
