The bint was also added that the Supreme Court was ready (in case the party should direr of take such a sitep) to decide that all our State banks are unconstitutional. There hints, however, do not seem to have challenged much attention. The party hesiface to approve such a measure, shall the public has not taken any alarm at the possible countingency threatned.

The language of the Constitution of the United States to which allouison is made, reads thus:

"No State shall shall not is made, reads thus: or if they could and which they are not to be allowed to vote upon at all, is to be hid before Congress and the administration is to ask that body to freedit, and that the States, in chartering banks to issue them, have done what the constitution for bilds.

The whole very such as the theory is that, bank notes are bills of credit, and that the States, in chartering banks to be under the state of the Dred Scott decision, to say what the present U. S. Supreme Court will or will not do; but it may be well to put on record and keep in mind what it has decided. In the 1st volume of "Peter's Digest" the celebrated case of Britce or the Commenceality of Kennedy will be found, the facts in which are thus summed up by the Court: "On the 20th of November, 1820, the Legis ture of Kentucky passed an act establishing a bank by the panel of the part of the par onstitutional, regarding them as "bills of sent on from the Edgefield District to maul into credit," which the States are trobiblied from silence the man who would dare speak and to

The bank had authority to receive money on deposite, to make leans on good personal security, or on mortgage; and was prohibited increasing its debts beyond its capital. Limi-tations were imposed on leans; and the accomincreasing its dens beyond its capital. Limitations were imposed on loans, and the accommodations of the bank were apportioned among the different counties of the State. The bank was, by a subsequent act, authorized to issue three millions of dollars; and the dividends of the bank were to be paid to the treasurer of the State. The notes of the bank were issued in the common form of bank notes in which the the common form of bank notes, in which the bank promised to pay to the bearer on demand the sum sated on the face of the note. The pleadings excluded the court from considering the sum stated on the face of the note. The pleadings excluded the court from considering that any part of the capital had been paid by the State; but in the argument of the case it was stated, and not denied, that all the notes which had been issued, and payment of which had been demanded, had been redeemed by the bank. By an act of the Legislature of Kentucky it was required that the notes of the bank should be received on all executions by plaintiffs; and if they failed to endorse on such executions that they would be so received, further proceedings on the judgment were delayed for two years. The lank of the Commonwealth of Kentucky instituted a suit against the plaintiffs in error, on a promissory note, for which the notes of the bank had been given, as a loan, to the drawers of the note.—

This was a much stronger case than could be made now, for this bank was not a mere chartered corporation of individuals, but a State in stitution, the managers of which went into the treasury of the State. In the early history of banks it seems their notes were generally denominated 'bills of credit; but in modern times they have lost that designation, and are either called 'bank bills' or 'bank notes.' But the inhibitions of the Constitution apply to bills of credit; which includes all classes of bills of credit emitted by the Colonies or States, is a paper issud by the Sovereign power, containing a pledge of its faith, and designing to circulate as money.

The lecturer took strong ground against the Common School System, as a ignoring religion and the morality which flows from religion, and exhorted his hearers to have nothing to do with them, beyond paying the prevalent immoralities to the godless character of these schools, and arged on the Catholics the propriety of patronizing only such educational institutions as those conducted by the Christian Teothers and Sisters of Mercy, under the immediate supervision of the Catholic Church.

This would be decisive, if the Supreme Cour had a decent respect for its own opinions; but if the party demand a reversal of it, no doubt the demand will be complied with. THE Washington correspondent of the Balti-

The question upon which have disapprore. The question upon which parties in Kanasa are now arrayed is whether the people shall have the right of self-government. Whether Governor Walker will be able to impress his own viewsupon the administration in regard to the subject is its be seen.

It is entirely certain, however, that any attempt by the federal government to force the constitution of the Convention upon Kanasa will be uterly abortive. No State government formed under that Constitutions."

KARSAS GOVERNORS.—The fate of Governor Walker reminds us how unform is the history of Kansas Governors! They all set out with a great flourish of trumpets, and commence their career by an affiliation with the Border Ruffians. They all become disgusted with their party, and one after another straggles down the Missouri River, coming home to embarrass the Administration, and to tell tales out of school, to the great injury of the Democratic party.
