Pittsburgh, Per I have made a chemical commination of some specimens of W. E. CHILDS & CV8 ROOFING, left at my office, the results of which are as follow:

1st. The materiaft compounded so as to remain pliable for a great length of time.

2d. The consistency is not readily influenced by the temperature, consequently it would not be inable to melt and run.

2d. The composition is not acid but algolity alkalina. It would not destroy the carrass, but on the contrary protect it from the action of the weather.

4th. It is water Proof, and to a large extent Fire-Proof; that is, sparks and fire brands failing upon it could not in dame it. In my opinion such a rows and for years if put on carefully and receiving prompt attention.
