GAS FROM ROSIN OIL
OR OTHER
FATTY FLUID MATERIAL.

THE HIGH ILLUMINATING PROPERTIES of Gas from Rosin and oleaginous substances have always made them a favorite material for the manufacture of Illuminating Gas. Many Gas Companies use Rosin in with coal, in order to supply their customers with a Superior Quality of Gas.

ROSIN OIL is entirely free from all dross and refuse substances, and yields at once, its Brilliant Illuminating Gas.

The greater original cost of the apparatus for the manufacture of coal gas together with the attention and expense constantly required, and the difficulty, if not impossibility, of entirely separating the unwholesome, deleterious and offensive gases, generated in coal, render the ROSIN OIL APPARATUS cheaper and more desirable in every way.

R. COATES, of 376 Broadway, New York, has devoted his entire attention to the manufacture and sale of Portable Gas Apparatus, and he respectfully calls the attention of the public to his present complete and efficient machine.

Perfect satisfaction to the purchaser guaranteed in every case. For further information address
