proper plan would seem to be to erect military posts on the American side of the border and seise the robbers as they come over. This plan would be as effectual as the other and is open to no objection; and the marvel is that any other, upon the reasons given, should have been thought of.

But such a course would not suit the purpose disclosed in another part of the article from which we have quoted; and the extract we give below will show that the professed desire to protect those provinces is all bosh:

"The recommendation in the message of the President that the United States should assume a temporary protectorate over Sonora and Chinabanus, is founded not only in just right of reprival for aggravated and long continued outnages upon American citizens, but upon principles of self preservation, and upon humanity for the people of those frontier States."

And according to the Washington Union the President justly recommends that for this conduct of assassins sheltered by the United States, we shall make reprisals, not upon the assigning, but upon their victims! This is Presidential and organ-grinding logic.

The Union further contends that, as Mexican Indians commit outrages in Arizonia, and the Mexican government does nothing to prevent them, we ought to seize Sonora and Chibushun. So that, whether our Indians commit outrages on Mexican citizens, or Mexican Indians commit outrages on our citizens, we are equally justified in taking possession of Mexican territory! Mexico mest bear the penalty of the wrong, whether she is the victim or the doer of it.
