Prof. Dickson thought that the prosperity of the school depended more upon the efficiency of the teacher than upon anything else. An efficient, energed in such an office; but if such men cannot be chosen, it would be better to abolish the office. If certificates should be cancelled he thought an appeal should be allowed. Prof. Bates remarked that he slways gave complainants a re-examination when desired.

The window shutter on the east side was bored and unlocked and the east forced up by means of a chisel. All intelligent reders will remember the horrible tale told by the dry detail of figures from that report as it appeared in the metropolitan journals. The writer of this book has seized upon the facts there disclosed and used them to "point a moral" in the present book. A mass of respectable testimonials has from time to time appeared in reference to the character and objects of this volume, from which we have present space for the following from Rev. Samil Osgood of the Church of the Messiah, New York:

"R. M. Du Wirr:—Dear Sir, I have read with interest the story just from your press, entitled "The Tenant House." It treats with great power and paths the theigh fact of our modern city life—the fact of rent and rented houses for the poor. It is written in a Christian spirit, and with obvious marks of an observing mind, a large experience, and vivid imagination."
