this occasion to state for the benefit of all whom
it may concern that our columns are now, as
they have ever been, open to the people. We
have heard of several ambitious demagogues of
the locofoco stripe, who have been making them-
selves busy by proclaiming that the *Gazette* is
closed against the resolutions the people may
pass at their meetings. We take this opportunity
to say that all such declarations are false.
All who read this paper know that it is an article
in our creed that the voice of the people in mat-
ters of public interest must be heard, and to
that end we are always ready to give what pub-
licity we may to whatsoever is proper for pub-
lication.

We may here mention that several delegates
met on Wednesday at the Court House, being
under the impression that a County Convention
was to be held on that day. No announcement
to that effect had been made, so far as we are
advised. Those gentlemen who did come to-
gether adjourned, however, to meet on the 16th
day of February next. In the meantime, all
necessary arrangements can be made to have a
full and free expression of public sentiment on
questions of so great importance as those which
will come up on that occasion for discussion.

PATENT OFFICE REPORT.—We learn from the National *Intelligencer* that the agricultural report of the Commissioner of Patents, contains a num-
ber of interesting papers upon the progress of
agriculture in Russia, Prussia, and the United
States; some interesting facts in regard to vari-
ous animals, reports upon the cultivation of the
Chinese sugar-cane, and a variety of other
information of interest to agriculturalists.

We learn from the report that an agent has
been employed visiting the tea districts of China
for the purpose of collecting the seeds of the
tea shrub and other plants with a view of intro-
ducing its cultivation into the United States.
Investigations into the quantitative analysis of
this cotton plant, and the soils in which it grows,
are being made by an able chemist, and also in
reference to the amount of alcohol and saccha-
rine water in the Chinese sugar-cane, and the
nutritive properties of the yam, the potato,
chufa, and Indian corn. Considerable attention
has been devoted to the native grapes for the
manufacture of wine. Within the United States
there are forty well-defined botanical species,
including upward of one hundred varieties of
grapes, half of them susceptible of being con-
verted into wholesome wine. The cuttings of
sugar-cane imported from Damarara promise to
largely compensate for the trouble. More than
one hundred bushels of sugar-cane from France
have been distributed for cultivation, and suffi-
cient returns have been made to prove that it
will be valuable for feeding stock and other eco-
nomical uses. The cultivation of the Chinese
yam has been a success; so also bald barley from
Tuscany, and wheat from the Mediterranean.
The Commissioner is of opinion that the success
which has attended the experiment of disemi-
nating new and useful seeds, and the collection
and promulgation of facts connected with the
history, progress, and economy of the principal
staples, fully warrant the

...ress of the movements of an impor-
tant personage, who has figured somewhat con-
spicuously in the political history of our coun-
try:

"HON. J. GLANCY JONES.—This distinguished
citizen of Pennsylvania, with his family, will
arrive in town this morning, en route to New
York, from which port he sails on the 5th prox.
for Vienna. He will be accompanied by a large
number of his friends and townsmen, and will
sojourn for a few days at the Merchants', where
he will be happy to see his personal and politi-
cal friends of this city."

The grief of his political friends at the federal
capitol, on the occasion of his departure for a
foreign land, may be imagined, but cannot be
described. But what is our loss will be Aus-
tria's gain—there is a world of consolation in
that reflection! Ungrateful Berks is the cause of
all this woe, and but for her treatment of this
"distinguished citizen," wisdom still have him
in our midst, assisting brother BIGLER in illu-
minating the common mind. We would still
have him at the head of the Committee of Ways
and Means, assisting our "iron men," after
his own peculiar fashion, and sustaining our
venerable President, with all the talent at his
command. Henceforth all his "sweetness will
be wasted on the desert air" of Austria—a coun-
try that has no sympathy with Democracy, nor
love for its exponents. The ship that bears
him from our shores will have a precious freight
indeed, and we trust it may reach its destined
port in safety, and without encountering a single
adverse wind. Farewell, Glancy! Good bye,
John!

THE Washington correspondent of the Phila-
delphia *Enquirer*, in reference to the proposed
canal across the isthmus, uses the following lan-
guage. Monsieur Belly seems determined to
avail himself of the advantages of the much-
talked-of Central American route. We quote
from the *Enquirer*:

"It is stated by the *Courier des Etats Unis* that
M. Belly has succeeded in raising the funds
necessary to construct his proposed canal across
the Isthmus of Nicaragua, so as to open a water
communication for ships and steamers from
ocean to ocean, as had been proposed by the
Transit Company. This looks as if there was
no sham in that transaction, and it may be that
we are destined to see this vastly important link
in the commercial chain which is hereafter to
bind Asia to Europe and Eastern America, in the
hands of other nations than our own. We may
also see a railway completed from Halifax to the
Pacific Ocean through British America, while we
are talking about a Pacific Railroad.

The trade of the East is now the great object of
commercial enterprise. France has her eye upon it as
well as England, and Mr. Belly has taken a step
in advance of all others in securing the only
feasible route for a ship communication from
the Atlantic to the Pacific across the Western
Continent. We have lost our opportunity of
securing possession of this route, unless our Gov-
ernment will take a stand, and insist that the
charter given by Nicaragua to the Transit Com-
pany shall be fulfilled, that it is not forfeited,
and therefore that the grant to M. Belly is null
and void. The Clayton-Bulwer treaty, which
Mr. Cilfagnan is so desirous to abrogate, guar-
antee the fulfilment of this charter on the part
of Nicaragua, and the safety of passengers,
goods, &c. The terms of this charter have not
been fulfilled by the company, because the com-
pany was forcibly driven off by the then govern-
ment of Nicaragua."

...RO MURDERER HUNG.—The Montgomery
...Ala.) Mail learns that the negro who murdered
his master, Mr. Wiley Jenkins, in Pike county,
Alabama, on Monday the 13th inst., was subse-
quently burnt to death. It appears that the
negro attempted to burn a mill in the neighbor-
hood, for which his master whipped him. He
then sought the first opportunity to kill his mas-
ter, which he did, as before mentioned, with an
axe. He ran off, but was pursued and caught,
and dealt with by the neighborhood in the man-
ner above stated.

ANOTHER Pittsburgher testifying to the won-
derful curative powers of Boerhave's Holland Bitters. Mr.
Jacob White, Third street, below Market, says:

"For a year past I have been afflicted very seriously with
dyspepsia, so much so, that my stomach refused to retain
anything; I have tried almost every remedy, and the re-
gimen of several physicians, but without alleviation, until
I began the use of "Boerhave's Holland Bitters," and have
now found relief almost amounting to a cure. I found it
efficacious in removing the extreme debility occasioned by
this disease, and generally as a tonic it has few equals and
no superior."

CAUTION!—Be careful to ask for Boerhave's Holland Bit-
ters. The great popularity of this medicine has induced
many imitations, which the public should guard against
purchasing.
