

ble continuance, the financiers of the country should be filled with well-founded apprehension and alarm.

The question recurs, what is the ability of the banks to stand the drain upon them which is inevitable, as compared with 1857. At this time two years ago the banks in New York held \$12,000,000 in specie, while now they hold \$21, 100,000; they are therefore much stronger than then, and there is that much the less reason to that all have been violated, thus rendering the Bridge not only an obstruction to the navigation of the river, but one matched of 1857, and are going on so recklessly has the excess is sure to be largely swelled:

The Proposed Attack of the stream for the same reasons as those stated in the second principle, and because they thus render the passage of boats and rafts less difficult.

4. In designing a bridge over a river having and spans should be of the greatest practical ble width.

In applying these principles to the Rock Island Bridge the Board is constrained with extreme regret to report that all have been violated, thus rendering the Bridge not only an obstruction to the navigation of the stream for the same reasons as those stated in the second principle, and because they thus render the passage of boats and rafts less difficult.

4. In designing a bridge over a river having and spans should be of the greatest practical ble width.

In applying these principles to the Rock Island Bridge the Board is constrained with extreme regret to report that all have been violated, thus rendering the Bridge not only an obstruction to the navigation of the river, but one may be a supplying these principles.
