Pike's Peak.—The Western papers bring us the statement, signed by ltorace Greely and two other gentlemen, as to the productiveness, not of the gold diggings as they existed up to the time of the late spring emigration, but of the time of the late spring emigration, but of the placers discovered since the return home of the most of those who were enticed to Pike's Peak by the lying reports so widely circulated during last winter. Whatever may be the value ment.

Sanis a very private established an agency in this city. The agent, Mr. Abnorr, commends himself to the confidence to rights of American citizens of every sort. The following extract from that able document, is in marked contrast to the tame surrender of the placers discovered since the return home of the most of those who were enticed to Pike's man and correct business man. The strong character of the institution for which he is agent will be seen by reference to the advertise-ment.

Abs our Naturalized Citizess "Feditive himself and his posterity, he can claim the promise of the same fluidesmann letter, as a vindicator of this same fluidesmann letter, as a vindicator of the same fluidesmann letter, as a vindicator of the time surject of the same fluidesmann letter, as a vindicator of the same fluide the most of those who were cathed to Pines of Peak by the lying reports so widely circulated during last winter. Whatever may be the value of the newly discovered mines, it is now cretain that, up to the time of the discovery of what is known as Gregory's diggings, which was made in the Jallier part of May. 1839, there existed nowhere in these so-carbed gold regions any diggings approach to the regular of many days labor. It follows, therefore, that the stocking it is not the state of the rights of naturalised clitrens. It is not the state of the rights of naturalised clitrens are the case as extracted as set regulation Mr. Botts may have ries, circulated prior to that discovery, representing the existence of rich placers in which men were earning from \$5 to \$20 a day, were fabrications, wilfully sent-abroad to subserve the aims of heartless speculators. It is no wonder, in view of this fact, that the public mind is incredulous, now, as to similar stories concerning the new discoveries, or is allow to believe in them.

The statement of Mesars. Greeley, Richardson and Villard is dated at Gregory's Diggings, June other of the statement of Mesars. Greeley, Richardson and Villard is dated at Gregory's Diggings, June other, where the same of the statement of Mesars and the operation of digring, transporting and washing the view as the operation of digring, transporting and washing the view as partially decomposed, or routed quarkt, running into Clear Creek at this point). have wintersed the operation of digring, transporting and washing the view routes of the present of the presence of the several produce.

Here follows an enumeration of the several pr

ration of the

4 A Sec. 18

sary for prospecting, building suitces, etc.

The wall rock is generally shattered, so that it, lit, the wall rock is generally shattered, so that it, lit, the wall rock is generally shattered, so that it.

isasting and utter disappointment, quartz veins which bear no gold being a prominent feature of the goology of all this region.

We cannot conclude this statement without protesting most earnestly against a renewal of the infatuation which impelled thousands to rush to this region a month or two since, only to turn batchpefore reaching it, or to burry away immediately after, more hastily than they came. Gold mining is a business which eminently requires of its votaries capital, experience, energy, enduring and in which the highest qualities do not always command success. There may be huntered of review of the battle Gen. Again which are write, and there probably are many; but up to this hour, we do not know that any wach has been discovered. There are sended to be five thousand people already in this revince, and hundreds of review of the battle states. The reached training the states of the solder and the sold by us on our rapid journey to this place, or heard of as on their way hither by other routes. For all those, early every pound of provisions and supplies of every kind must be headed by tense from the high data and the proposition of the proposition of the solder; models and the solder in the solder and the solder in the solder solder. The solder is not customer of the solder solder to go to its madness—encidement of the solder solders and the solder; the solder; models, and the solder; the solder; solder solders to go to its madness—encidedement of sold is madness—encidedement o

The state of the s

cassaries of life, for the enlire year, must be drawn from the States, making the cost of living extremely high. The yield of gold during the summer season must, consequently, be very large to enable a miner to sustain himself during the year and save money.

The Slave Trade.—We are gravely told, by the administration organs at the north, that there is no public sentiment at the South in favor of re-opening the Slave-Trade, and that the agitation in its favor is confined to a mere handful of fanatics, who are unworthy of notice.—Some of the men who take this view may be lieve what they say; but it is a delusion. Facts occur every day to show its fallacy; and we may cite the following from the Louisville Democrat as proof of this. The Democrat is warmly opposed to the re-opening of the slave-trade; yet it is unwilling to shut its eyesto what is occuring.

Marcy vs. Cass.—A feeble and uncandid at life in the democrat is in the upper chamber might notice what was reported without being observed. The committee what was immediately seized on Thursday and confined in individual to the administration organs at the north, that there is no public sentiment at the South in favor of re-opening the Slave-Trade, and that the agitation in its favor is confined to a mere handful of fanatics, who are unworthy of notice.—Some of the men who take this view may be lieve what they say; but it is a delusion. Facts being the procured a knife, and after cutting his threat severed the main artery of his left. When the procured a knife, and after cutting his threat severed the main artery of his left. When the procured a knife, and after cutting his threat severed the main artery of his left. When the procured a knife, and after cutting his threat severed the main artery of his left. When the procured a knife, and after cutting his threat severed the main artery of his left. When the procured a knife, and after cutting his mere with its wife and a knife, and after cutting his mere with its wife and his processed to the re-opening of th

not yet fully decomposed, and have obtained from the few who have already sluices in operation, accounts of their several products."

Here follows an enumeration of the several claims worked, embracing twelve distinct claims, and only twelve. The owners of most of these are from Indiana and Iowa, and their carbings are stated as garying from \$21 to \$195 per day, each claim being worked by companies, including in every instance a number of men, the carbings are stated as garying from \$21 to \$195 per day, each claim being worked by companies, including in every instance a number of men, the carbings are stated as garying from \$21 to \$195 per day, each claim being worked by companies, including in every instance a number of men, the carbings are stated as garying from \$21 to \$195 per day, each claim being worked by companies, including in every instance a number. The statement then goes to say:

"Spina forty or fifty sluices commenced, are not yet in operation, but the owners inform us that their "prospecting" shows from 10 cents to \$2 to the pan. As the "leads" are all found on the hills, many of the miners are contructing treaches to carry water to them, inalead of building their should be provisions or money are compelled to work as common laborers, at from \$1 to \$3 per day and board, until they can be also as a per state of the source of the source of the source of the source of the substance of the source of the states, or within the condines of the source of
