THE DRAIN OF GOLD TO THE SEABOARD. referred yesterday to the drain of gold to Europe, and to the corresponding drain from the interior to the seaboard. Three conclusions ar inevitable from the facts there presented. First-that we are losing at the rate of abou \$52,000,000 a year, in colu, over and above the amount produced in California, to Europe, to pay the balance of trade against us. Second that the banks of New York, which supply this coin for export, draw the principal part of the difference between the import and the export from the other banks of the country,

and these in turn from the people. Third-that so long as the interior continues to supply the New York banks with the means of keeping up this export, so long will enormous importations go on; and that as soon as th supply from the interior ceases, the New York banks will become alarmed, will shot down the gates upon the importers, who are their largest borrowers, and that consequently the large im- the Commissioner of Patents for copies of the portations will then cease

shouling the conterty with foreign goods, prices must go veen lover than they are now. The west must pay her debts to the east, and he must pay them either in gold or in produce; and every day that she holds her produce back contributes more and more toward depressing the market value of it, because that which takes its place helps, in the present state of things, to hild op foreign manufacturers who buy nothing of us, at the esponsed our home manufacturers, who are the only buyers we have left.

We look forward with anxiety, therefore, to the active recomption of shipments of produce eastward. Nothing but that will chack the five decion, and the flow of coin once checked, the importing manin must necessarily be observed with it.

We dould that prices are not necessarily be checked with it.

The Post attained some notoriety, lately, and astonished the whole country, by nominating old Buck for re-election; but having become disgusted with the cold refueal of that gentleman to accept the compli-ment thus offered him, it will now, it is understood, become the organ of the Douglas men.

The official returns elected Mr. Anderson, the Opposition candidate, by three majority. This operation is just as legal and creditable as that of the Oxford and Kickapoe swindles, or of the Noccasinites' in Minnesots. For many months my hair had been falling off, until I was fearful of loaing it entirely. The akin upon my bead became gradually more and more inflamed, so that I could not touch it without pale. This irritated condition I attributed to the upon of versions affectable habe works which which. By the advice of my physician, to whom you had shown your process of purifying the Gil, I commenced its use the aut work in June. The first application allayed the tiching and irritation; in throo or four days the radness and tender. ners disappeared—the hair cased to full, and I have now a thick growth of new hair. I trust that others, jamiliarly tilticad, will be induced to try the same remady.
