Sometimes they even rede upon windmills, or made desperate battle upon the blind agencies of nature. Chiralry in all these and many other valorous forms, we find depicted on the page of history or romance. But our own day, rinh in new developments and new phases of character presents us chiral-ry in new aspects—chivalry ferocicus, chivalry cowardly, chivalry frightened. However, men may misbehave, however much they are overcome, it has accorded with all our vivers of maniness as it has with all the dictater of humanity that, by the victor they reserve to ancient chivalry, as we have intimated above. Among the score of manden as Harper's Ferry there was one named Thompson; who he was, manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded Hunter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserve and manded thurter, who was examined in the reserversion of the serversion of the man, and manded thurter, who was examined in the reserversion of the serversion of the men, and manded thurter, who was examined in the reserversion of the serversion of the men, and manded thurter, who was examined in the reserversion of the serversion of the men, and manded thurter, w and we have learned it from the lips of a man named Hunter, who was examined in the recent trials, viz that after Thompson was captured, put in chains, desperately wounded and convey-ed to a room in the prison, this Mr. Hunter went in where he lay, and with a hunter raging cowards at his heels, and in spite of the plead in the name of humanity for the prisonor's life, dragged him forth and, helpleas as he should of the rush was partially fercious. Of the cowardly kind of chivalry, the above ing talks serve, perhaps, as an example, but the following, which we take from the examina-tion on the trial of Brown, will do beller refers. Mr. Sennot — "You say that when II" Livet, Green — "You way that when II" Livet, G

upon the skirts of his band? What messenger ould cutride the knight of the green plume! And so was it also in the wars for Holy Land Wherever the blows foll thickest, and ponderous mace or fearful battle axe was crushing the greatest number of skulls, there yon found the bravest knights of chivalry to protect the help less or crush the strong. Richard could try titles of strength and skill with Saladin. Front de Boeaf could knock the brains from a bullock with a blow of his fist, or meet hosts of many ensmise on the bloody field, but he never, scord-ing to history, pounced upon an enemy when that enemy was down. Fair play was a jowel among the ironsided champions of chivalry. Some-times, like Don Quirotio, they riked their pro-clous pates by courting danger for its own make. Sometimes they even rede upon windmills, or made desperate battle upon the blind agencies of nature. Chivalry in all these and many other valorous forms, we find depicted on the page of
