12 Thomas H. Hall,	24 Henry Souther,
	25 John Greer.

FOR GOVERNOR,

HON. ANDREW G. CURTIN,

OF CENTRE COUNTY.

FOR CONGRESS—XIXth DISTRICT,

JAMES K. MOORHEAD.

FOR CONGRESS—XXIIth DISTRICT,

ROBERT McKNIGHT.

THE REPUBLICAN COUNTY CONVENTION closed its labors at the late an hour last night that we have not the room nor opportunity to speak fully, this morning, of the ticket framed. We shall recur to it to-morrow.

THE CATTLE PLAGUE.—There seems to be a perfect panic in Massachusetts about this epidemic, and no remedy or means of deliverance seems yet to have been discovered. The extra session of the legislature now holding in that State may possibly devise some plan for preventing its spread, but if the following dispatch, which we find in the Eastern papers, be correct, the plague has already got beyond the borders of New England:

NEWARK, N. J., Thursday, May 31, 1860.—The cattle disease has appeared in this neighborhood. Out of seven cattle attacked on the farm of Abraham Johnson, near Newark, four have died. Examinations show the disease to be the same as that in Massachusetts. The Agricultural Society held a special meeting at Elizabeth on the 5th of June, to consider the subject. The disease is supposed to have been introduced here by an animal from Massachusetts.

If it has already made its appearance in New Jersey it would seem almost hopeless to attempt to check it; and we in Pennsylvania may well be admonished to prepare for its advent. We are not able to give any advice in the premises; but it seems to us that the course taken by the Governor of Ohio, to which we alluded on Saturday, might very properly be followed by the Governor of Pennsylvania. A commission to enquire into the facts, methods of treatment, character of the disease, etc., has been appointed by Gov. Dennison, and Gov. Packer, if he has the power, would do the State a service by appointing a similar commission. If the plague should spread all over the country for want of the precautions that might have been taken to prevent it, our people would have abundant cause for reproaching themselves with the result. Such a calamity should be avoided, if it can be; and we suggest to the officers of our State Agricultural Society the propriety of taking the matter into immediate consideration.

According to the census of 1850 there were in Pennsylvania at that time 530,224 milk cows, 61,527 working oxen, and 562,195 other neat cattle, including calves, heifers, etc., making a total of 1,158,946 neat cattle in the State. The number has by this time increased to 1,500,000, involving a value of too much magnitude to be risked by subjecting it to the danger of any such calamity as that which is now threatened.

THE FIGHT IN THE HOUSE.—The telegraph did not furnish us, on Saturday, with an account of the disgraceful scene in the House on Friday, although full accounts were furnished to the papers east and west of us.

In the course of debate upon a question relating to the Covode Committee, Mr. Tappan, having obtained the floor, yielded it, as he had a right to do, to Mr. Train of Massachusetts. Mr. Houston of Alabama, in a most unjustifiable way, objected to this arrangement, and continued talking in spite of many calls to order. When Mr. Train was able to make himself heard, he remarked that he should consider himself guilty of gross impropriety as a member and a gentleman, if he insisted on speaking when he had no right to the floor. To this perfectly justifiable remark, Mr. Houston, in that bullying spirit so common with Southern members, chose to take exception, and asked if it was meant to apply to him? Mr. Train replied that what he said he meant, and should stand by it. Whereupon, the other called him a disgraceful liar and scoundrel. A scene ensued which, except that blows were wanting, would be considered anywhere else a row, and one that ought to be suppressed by a squad of policemen. Mr. Sherman at last obtained the floor, and moved a resolution of censure upon Houston for his insulting conduct; and the House indicating its determination to pass it, Mr. Houston promptly apologized. He should have been expelled. It is time some of these Southern bullies were taught a lesson.

VALEDICTORY OF DR. BAIRD.—The *Christian Advocate* of yesterday contains the valedictory of Dr. Baird, who has been editor of the paper for the last four years, and who now retires to make room for his successor, Rev. Mr. Nesbit, lately elected to that position by the General Conference at Buffalo.

The valedictory is a well written paper, and we are sure that the many readers of the *Advocate* feel, as we do, a deep regret at parting with Dr. B. He has discharged his duties with great ability, and the paper has largely prospered under his management.

He was not a candidate for re-election. Some months ago he accepted an appointment as preacher in charge of the Liberty street M. E. Church, upon the duties of which place he has entered. Having, at the time the Annual Conference was held at Blairsville, made up his mind to withdraw from editorial life. He will be a faithful laborer, whatever station he may occupy.

Rev. Mr. Nesbit, who now takes charge of the *Advocate*, is a Pittsburgher, a ripe scholar and a forcible writer, and will doubtless maintain the high character which the *Advocate* has so long enjoyed.

TOO LARGE AN ALLOWANCE.—The New York *Tribune*, in reply to the Philadelphia *Journal*, which paper supports the Union-saving nominations of Baltimore, says:

"It knows that at least three-fourths of all the Opposition journals in the State (Pennsylvania) are for Lincoln and Hamlin."

There are at least 150 Opposition journals in Pennsylvania, and of these, two, or at most three, support the Baltimore nominations. The *Journal*, to which the *Tribune* alludes, can scarcely be classed, however, as an "Opposition" paper, as it generally manages to play into the hands of the Democracy. Nevertheless, we count it as one of the three.

"PUTRID RUBBISH."—Mr. Wm. B. Reed, of Philadelphia, in a late speech to a democratic meeting in that city, referring to Earl Grey's recent speech in Parliament upon the corruptions which have crept into our government under democratic rule, censured the Earl for "raking up the putrid rubbish of our party politics." As Mr. Reed is himself a part of that "putrid rubbish," we do not wonder at his antipathy to being raked up.

NEW JERSEY.—The Newark *Mercury* says:

"We have before us letters from every Congressional District in the State, giving a most favorable account of the reception of the Chicago nominations, and of the spirit manifested in their behalf. From every quarter we have the same information, and undoubting assurances of co-operation from all the elements of the Opposition. There is no third party in the State."

THE ADMINISTRATION CORRUPTIONS.—Mr. Patrick Lafferty, of Philadelphia, finding that he was to be brought before the bar of the House, concluded to answer the question put by Mr. Covode in committee, which he had previously refused to do. He stated that the witness, Edward Power, who had sworn to entire ignorance of any knowledge of a connection with fraudulent naturalization papers, had told him that Collector Baker had taken a trunk filled with them up the railroad in 1856.

A trunk filled with fraudulent naturalization papers! This furnishes a rather indefinite idea as to the number of these fraudulent papers, but the trunk was doubtless large enough to contain thousands upon thousands of them. The men who received them are to-day voters—not in due process of law but in virtue of this gigantic fraud. They decided the election against us in 1856, and they will help to decide it against us in 1860; but, thank Heaven, we are able to outnumber them this year, even against all the assistance obtained in this way. Such a fraud was a fitting precursor of the frauds practised by the administration it elected. Succeeding by a wholesale cheat, it has been a cheat itself, from beginning to end, cheating its party, the treasury and the country without stint, scruple or remorse. Fortunately for the country, "honest old Abe" will soon put an end to an administration of which every one is heartily sick.

THE HARPER'S FERRY COMMITTEE, appointed by the Senate at the opening of the session, has finally closed its sessions, and Senator Mason expects to make a report this week. It will present nothing new beyond what has been published, and will recommend the passage of a law by Congress similar to the one introduced at an early part of the session by Senator Bigler.

This Committee was appointed with the expectation that it would be able to ferret out a terrible nest of treason and identify the leading Republicans of the North with the John Brown raid. The evidence drawn out by it develops nothing not before known, and the efforts of the Committee have resulted in a miserable failure. All the hopes built upon the supposed capital which it was thought this investigation would furnish against the Republicans have been dashed to the ground, and the John Brown affair, in spite of the tremendous fuss made by Gov. Wise, will sink into one of the ordinary events of history. Every effort of the democracy to turn it to political account, has failed, as it was meet it should do.

H. A. BATCHELOR, of Connellsville, Fayette county, held a large and lively ratification meeting on the night of Wednesday, May 30. Hon. ANDREW STEWART, who was on the Fillmore Electoral Ticket in 1856, made a stirring speech in favor of the Chicago nominations, and was followed by E. P. OLPHANT, who served with LINCOLN in the Black Hawk war, and who spoke of him in the highest terms of praise.

CATTLE DISEASE IN RHODE ISLAND.—The Rhode Island Society for the encouragement of Domestic Industry, has taken this subject in hand. At a special meeting of the Standing Committee, held on Monday evening, to consider the best means of escaping a visitation of the pestilence, it was agreed to memorialize the General Assembly in reference to it, and a memorial was prepared and presented. They suggest the necessity of legislation regulating the bringing of cattle into this State, and providing for a strict and rigid scrutiny in relation thereto, either through a board of commissioners or the town authorities, and warning every person to give notice to such board or authorities if any animal in his possession shall be attacked with this disease, and authorizing such board or town authorities to make orders for the killing of any animal so diseased, and for the rigid seclusion and separation of all that have been in contact with a diseased animal, and a proper compensation to the owners.

THE April frosts are developing themselves in their effects upon the fruit crop, and from some sections we hear gloomy accounts of prospects. The apples, it appears, are disposed to drop off in some orchards almost entirely. This does not appear to be the case to any destructive extent in this vicinity, though there is some manifestation of it, and it is generally believed that there will be a very abundant crop of apples—Cherries, especially the common and morrillos, are, however, almost a failure, the more fancy and early varieties escaping the frost much better. Plums of every variety are in the greatest abundance. Small fruits, such as grapes, strawberries and berries generally, are promising as could be desired. These remarks, judging from our exchanges, will apply to a large territory, embracing all our neighboring counties.—*Chicago Journal.*

THE PROSPECTIVE HARVEST ON THE PACIFIC SIDE.—We have before us a recent number of the California *Farmer*—a very handsome and well conducted sheet, by the way, and now in its thirteenth volume—whence we derive the following:

"The stock on hand at the incoming harvest will exceed 100,000 barrels, while the crop of 1860 will give a three years' supply, nearly.—These estimates seem large to those interested; but wait, and see how the account stands by and bye.

The market can still be relieved of a portion of this surplus, and it ought to be relieved.

Those who regret they have not shipped the present year may be wiser at the harvest of 1860; at least we hope so; for the grain must go forward, or the consequence will be—it will remain unharvested.—*Ib.*

DEAD LETTERS.—For the three quarters ending March 31, 1860, the number of dead letters which contained money sent out was 7,448.—Their aggregate contents amounted to $38,356. The number of letters delivered was 6,279, restoring to lawful owners $32,877. Number of letters unclaimed and outstanding 1,172. During the same period the number of letters sent out containing articles of value other than money was 10,075. Of these 9,298 were delivered. Number of letters returned unclaimed 624. Number of letters outstanding only 153. The contents of letters may thus be enumerated: Bills of exchange, drafts, and letters of credit, bonds and notes of hand, checks, orders, and Treasury warrants, certificates of deposit, accounts, and receipts, $2,802,530; deeds mortgages conveyances, and land titles, 651; articles of agreement, powers of attorney, and policies of insurance, 281; passage certificates and certificates of stock, 97; pension papers, land certificates, and patent papers, 126; count papers, 186, daguerreotypes, 852.

SPLIT IN THE ILLINOIS LUTHERAN SYNOD.—At the recent Lutheran Synod of Northern Illinois, the entire Scandinavian portion of that body, consisting of some twenty-four Swedish and Norwegian pastors, representing about sixty churches, withdrew on account of certain decided doctrinal differences which have for several years past been a source of strife and contention. Prof. Esbjorn, of the Springfield University, has resigned his position in that institution, and nearly all the Scandinavian students have returned to their homes. Measures have since been taken to organize a distinct Scandinavian Synod, and a Convention is called for that purpose, to assemble in Rock county, Wisconsin, on the 5th of June. A Lutheran paper now before us, commenting upon these proceedings, gives the opinion that all the difficulties here referred to are attributable to Prof. Esbjorn's *suspicions*, and his want of acquaintance with the manner of conducting literary institutions in America.

OIL MARKET.—There appears to be a disposition on the part of Pittsburgh dealers to drive the largest and increasing oil trade from that city, by a systematic effort to reduce the price below what it should be. Efforts are now being made in this vicinity, by Eastern capitalists, to fix the great depot in the East, and thus control a branch of industry which promises to be highly remunerative. Did the capitalist of Western Pa., fully consider their interests there would be a successful effort made to prepare the oil for market here.

The oil from this section is now about all shipped to New York or Jersey cities.

Over 800 barrels of oil, within a week, have passed down the river to be shipped Eastward from Pittsburgh.—*Venango Citizen.*

CATTLE DISEASE IN ENGLAND.—It is only a few years since the pulmonary contrain has made its appearance in England. It was imported in Dutch stock in 1847, and has prevailed to a fearful extent there. In the valley of the Thames 95 per cent. of all the cattle exposed have died, but in the country only 35 per cent. The disease appears a little different in some respects from what we see it in New England. Hospitals have been established, and it is undergoing thorough investigation; while the most energetic means in the power of the government are being put forth to arrest its progress.

STRUCK BY LIGHTNING!—A man named Richard Mackey of Adams township, Guernsey county, was struck by lightning last Friday. The lightning struck him on the right shoulder and passed round his body to the ground. His body was quite badly blistered and he was stunned for a short time, but as it was raining the water soon restored him to consciousness. He will doubtless recover.

Humphrey's Specific Homœopathic Remedies have now been before the public for five years, and have every where won golden opinions from the many thousands who have used them.

Simple, free from intricacy, technicality, or danger, they have become the ready resource and aid of the parent, traveler, nurse, or invalid, and have become the family physician and medical adviser of thousands of families. So where have they been tried without having been approved and their highest appreciation among those who have known them the longest and most intimately.

N. B.—A full set of Humphrey's Homœopathic Specifics with Book of Directions, and twenty different Remedies in large vials, in morocco case, $5; ditto, in plain case, $4; case of fifteen boxes, and book, $2. Single boxes, 25 cents and 50 cents.

These Remedies, by the single box or case, are sent by mail or express, free of charge, to any address, on receipt of the price. Address, Dr. W. HUMPHREYS & CO.,

No. 562 Broadway, New York.

Sold by J. M. FULTON, Fifth street, second door from the Post Office, Agent for Pittsburgh. my16-d&wlm

DIARRHŒA.—The most common causes of this complaint are, irritating matters in the stomach, such as worms, indigestible food, &c. The use of WILSON'S PILLS, in small doses, affords a safe and sure remedy. If caused by worms, the cause will at once be removed, by the use of B. L. FAHNESTOCK'S well known VERMIFUGE.

These Pills are prepared and sold by B. L. FAHNESTOCK & CO., Wholesale Druggists, and Proprietors of B. L. FAHNESTOCK'S VERMIFUGE, No. 60, corner of Wood and Fourth streets, Pittsburgh, Pa. my31-d&wlf

MRS. WINSLOW, an experienced Nurse and Female Physician, has a Soothing Syrup for children teething, which greatly facilitates the process of teething by softening the gums, reducing all inflammation—will allay all pain, and is sure to regulate the bowels. Depend upon it mothers, it will give rest to yourselves and relief and health to your infants. Perfectly safe in all cases—See advertisement in another column. 6-d&wlyT

F. S. WILSON,

Successor to JAMES M. CRAW & SON,

101, 103 and 105 River St.—107, 109 and 111 Dock.

W. V. CRAW, Inspector.

TEN THOUSAND PACKAGES of LAKE FISH on hand and receiving weekly from the fisheries, consisting of

WHITE FISH,	SISCAWIT,
PICKEREL,	TROUT,
HERRING,	CAT FISH,
SHAD,	BAY FISH,
BASS,	PIKE & PERCH.

Heading a large portion of the time at the fisheries in the upper country, and having every facility for taking, curing and shipping them to this port, with Mr. W. V. CRAW, Inspector of fish, at Chatelaux, (with an experience of 25 years as one of the oldest men of J. M. Craw & Son,) we are determined not to be undersold in price, quality or quantity. We call the attention of all former patrons of Messrs. J. M. Craw & Son, and all other dealers who want a good article of Fall or Spring caught Fish at most reasonable rates.

We would call your attention to those NORTH BAY WHITE FISH. They are superior to the Detroit River White Fish, both in season and flavor; are mine caught, and taken in the deep pure cold water of the North. The meat of the Fish is a clear white, and fatter than any other White Fish caught on the Northern Lakes. They are very desirable for broiling on a table one. my-2-3tm W. V. CRAW.

M'CORMICK'S REAPER AND MOWER.

20,000 Sold in the Last Five Years!

Being a Larger Number than is Manufactured by any other single Establishment in the World.

THE MACHINE for 1860 will be found so greatly improved as fully to meet the wants of farmers, both as a Reaper and as a Mower—so modified in its construction, as now to be

THE ONLY COMPLETE MACHINE

For both purposes. While cutting a swath several inches wider than the Two Horse Machine of past seasons it is as a whole, narrower, lighter and stronger, and will run much easier—with no material side draught. We present, therefore, for the coming season, a machine one foot wider than those of most makers, with a light draught for two horses, in Reaping or Mowing—LIGHTER THAN IS REQUIRED BY MUCH NARROWER MACHINES. By the perfection of balancing of this machine, in connection with a patented sent [illegible] tongue, (with the wheel frame,) the cutting apparatus, when mowing, is now easily thrown over obstructions while in motion, simply by the weight of the driver in his place, thus dispensing with all levers and complicated arrangements to effect the same object.

The machine of 1855 will be found superior as a MOWER, presenting some peculiar features *not attainable by other machines.* The Two Horse Machine, though cutting about five and one half feet wide, is of light and easy draught, accomplishing a *greater amount of work with a less expenditure of power* than any machine made.

A WARRANTEE is given to every purchaser, and in addition, the following offer is made: Any farmer, who may desire it, is at liberty *to work this machine through the harvest* with any other, and PAY for the one PREPARED.

For further particulars, as also for patent claims under which this machine is built, we refer to our annual pamphlet, which will be furnished on application to us, at Chicago, or either of our many agents.

Sample machines can be seen at all prominent points.

Price of machines delivered in Chicago, St. Louis, Indianapolis, Cincinnati, Louisville, Pittsburgh, Cleveland and Baltimore—charges following from these points:

For Four Horse, complete	$155
For Two Horse, complete	140

Save Your Carpets!

THE great enquiry has been made for a number of years by housekeepers, What shall we put under our carpets to protect them from wear and moth?—This grand and valuable discovery was effected and patented April 1st, 1856, by J. K. HARRINGTON, and is called

Harrington's Patent Carpet Lining.

This article having proved its utility has now come into general use, so much so that scarcely a carpet will be put down with out it, and its cheapness puts it within the reach of every family. It is warranted to add fifty per cent. to the durability of Carpets, Oil Cloths and Matting. The details of its merits are too numerous to mention. It can be obtained at any of the principal Carpet Stores throughout the United States, and is manufactured only by the NEW YORK CARPET LINING COMPANY.

Also, extensive manufacturers of MAMMOTH COTTON BATTING AND COMFORTABLES, the best and cheapest that have ever been introduced in the market.

Office 11 *Dey St., Salesroom 440 Pearl Street* NEW YORK.

☞ All orders or information requested will be attended to with promptness and dispatch.

Under the supervision of the patentee

J. K. HARRINGTON, Agent

Manufactory, 448 & 450 Water St., N. Y.

Prince Imperial Champagne.

FROM EPERNAY, FRANCE.

DE VENOGE & CO.

Sold by all respectable Dealers throughout the Country.

THIS fine brand of CHAMPAGNE, which until the past year was confined exclusively to the best tables of the Continent of Europe, has now obtained the most unbounded success with the fine connoisseurs. It is recommended by some of the first Physicians of the city of New York, over all other wines, on account of its extreme purity and delicacy, and those who once try it rarely use any other brand. Although one year has elapsed since its introduction into this country, the demand is enormous and constantly increasing. Our arrangements are such as to ensure the quality of the Wine being maintained at its present high standard. The Prince Imperial is imported solely by us, we being the sole agents of Messrs. De Venoge &
