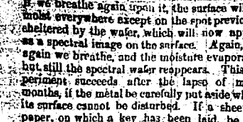
THE UNIVERSAL METAMORPHOSIS.—If a wafer be laid on a surface of polished metal, which is then breathed upon, and if, when the moisture of the breath has evaporated, the wafer be shaken off, we shall find that the whole polished surface is not as it was before, although our senses can detect no difference; for if we breathe again upon it, the surface will be moist everywhere except on the spot previously sheltered by the wafer, which will now appear as a spectral image on the surface. Again, and again we breathe, and the moisture evaporates, but still the spectral wafer reappears. This experiment succeeds after the lapse of many months, if the metal be carefully put aside where its surface cannot be disturbed. If a sheet of paper, on which a key has been laid, be exposed for some minutes to the sunshine, and then instantaneously viewed in the dark, the key being removed, a fading spectre of the key will be visible. Let this paper be laid aside for many months where nothing can disturb it, and then, in darkness, be laid on a plate of hot metal, the spectre of the key will again appear. In the case of bodies more highly phosphorescent than paper, the spectres of many different objects which may have been laid on it in succession will, on warming, emerge in proper order. This is equally true of our bodies and our minds. There are cases on record, of ignorant women, in states of insanity, uttering Greek and Hebrew phrases, which in past years they have heard their masters utter, without, of course, comprehending them. Those tones have long been forgotten; the traces were so faint that, under ordinary conditions were invisible; but these traces were there, and, in the intense light of cerebral excitement, they started into pre-eminence, just as the spectral image of the key started into sight on the application of heat. We are involved in the universal metamorphosis. Nothing loses us wholly as it found us. Every man we meet, every book we read, every picture or landscape we see, every word or tone we hear, mingles with our being and modifies it.

CRIME IN ENGLAND.—The judicial statistics of England and Wales, for the year 1859, have just been published, and they afford the London journals a fruitful subject of remark. It appears that there are in the kingdom no less than 39,930 professional thieves; 37,688 suspected persons, constantly under the eye of the police, and 23,352 vagrants, having no visible means of support—or, in all, 104,985 criminals at large.

These figures make little impression on the mind, as they are written on paper; but if the reader will imagine the whole of them brought together, as one of the London journals suggests, he will get an idea of the number of depredators at whose mercy the subjects of her Britannic Majesty hold their property and lives. Organized in military fashion they would make more than seventy regiments of the line—placed together in a row they would extend over twenty miles of ground—and a good walker would require four or five hours to inspect the troop. Their direct cost to society, supposing each man to consume two hundred dollars worth of value a year, is over ten millions of dollars.

But this is only a part of the expense to which society is put on their account. The police and constabulary forces are supported mainly to watch over their delinquencies, and the greater part of the prison and judicial expenditures have the same origin. Putting these together, it is estimated that the rogues cost the United Kingdom about one hundred and fifty millions of dollars, or about double the sum spent upon the Royal Navy.

McDONNICK'S REAPER AND MOWER.



20,000 Sold in the Last Five Years!

Being a Larger Number than is Manufactured by any other single Establishment in the World.

THE MACHINE for 1860 will be found so greatly improved as fully to meet the wants of farmers, both as a Reaper and as a Mower—so modified in its construction, as now to be

THE ONLY COMPLETE MACHINE

for both purposes. While cutting a swath several inches wider than the Two Horse Machine of past seasons it is as a whole, narrower, lighter and stronger; and will run much easier—with no material side draught. We present, therefore, for the coming season, a machine one foot wider than those of most makers, with a light draught for one horse.

IN REGARD TO MOWING—LIGHTER THAN IS REQUIRED BY HIGH NARROWER MACHINES. By the perfection of balancing of this machine, in connection with a patented spiral fluted tongue, (with the wheel frame,) the cutting apparatus, when mowing, is now easily thrown over obstructions while in motion, simply by the weight of the driver in his place, thus dispensing with all levers and complicated arrangements to effect the same object.

The machine of 1860 will be found superior as a MOWER, presenting some peculiar features not attainable by other machines. The Two Horse Machine, by cutting about one foot and a half less at a time, is of light and easy draught, accomplishing a greater amount of work with a less expenditure of power than any machine made.

A Warrantee is given to every purchaser, and in addition, the following offer is made: Any farmer, who may see in the field, or at liberty to work this machine through the season, with any other, and fail for the one PREFERRED,

For further particulars, as also for patent claim under which this machine is built, we refer to our annual pamphlet, which will be furnished on application to us, at Chicago, or either of our many agents.

Sample machines can be seen at all of the principal points.

Prices of machines delivered in Chicago, St. Louis, Indianapolis, Cincinnati, Louisville, Pittsburgh, Cleveland and Baltimore—charges following from these points:

For One Horse, complete.....$155
For Two Horse, complete.....140
For terms, see pamphlets and bills.

Quack Nostrums.

THE NEW YORK DAY BOOK SAYS:

The majority of Hair Washes, Hair Dyes, Hair Tonics, Hair Oils, and the numberless preparations which are now before the public under such extravagant, hyperbolical and fantastic titles as we see practised in show windows, and in newspaper headlines, as hair preparations, are all humbugs of the first water; their real merit, if they have any, is that they do no harm. HOG'S LARD, WHALE OIL, LARD OIL, SWEET OIL, scented and colored, make up, when in beautiful wrappers and with gilt glass bottles, the richest character of tonics; and when thus costly, are lauded with more inflatable bosh, and often caught at by verdant young and old of both sexes. Such is not the character of Professor Wood's Hair Restorative. This gentleman comes before the world without any high-sounding "Kephalonian, or any other astounding and startling catchpenny terms; he simply advertises his *Hair Restorative*—what it expresses precisely—and as a restorative it acts. Buy Professor Wood's Hair Restorative, and as you value your scalp, your very brains, apply nothing else; for it may be that you will get some worthless substance than perfumed lard oil on your crustum. Remember, Wood's Restorative for the Hair is the best article extant.

It Will, by Nature's own Process,
Restore Gray Hair to the Original Color;
Will make Hair Grow on Bald Heads;
Will restore the Natural Secretions,
Which prevent scurf and dandruff;
Will remove all dandruff;
Will cure all eruptions—even Scald Head,
Will make the Hair Soft and Glossy,
Will make the old appear young again,
Will preserve the Color of the Hair to any age,
Will always Fasten it and stop its Falling,
And is one of the best Toilet Articles for the Hair now in use.

Manufactured by O. J. WOOD & CO., and Sold Wholesale and Retail, at 444 Broadway, New York, and 114 Market st., St. Louis, Mo.
