INCREDIBLE METHOD OF SMUGGLING.—About two weeks since, a man arrived at Ripley, Miss., on a railroad train, having in charge a coffin, which, he said, contained the remains of his brother, who had died several days previous.—Leaving the train and removing the seeming corpse, he engaged the services of two or three men, whom he employed in digging a grave in the woods for the reception of the corpse, which he informed them, he had designed taking home, but found that he would be unable to do so. The grave was prepared, the coffin lowered and covered with earth, and the party left the lonely spot—the assistants for their homes, and the stranger for the railroad depot. He left on the next train, and nothing has since been heard of his whereabouts. A day or two afterward, the men who had assisted in the burial were conversing of the circumstances attending it, when one of them remarked that the coffin was unusually heavy—too much so to contain only the body of a man. This led to further speculation on the subject, and the affair being communicated to several other persons, it was resolved to take up the remains and satisfy themselves. A party repaired to the spot; a few moments hard work exposed the coffin to view; it was taken up, the lid raised, and the party not a little suprised and confounded upon discovering that, instead of a corpse, they had interred a coffin full of rifles. It may be imagined that the discovery created what reporters would call "decided sensation." Who was the stranger? Where had he gone? And what were his objects in practising this extraordinary deception?

FOR FASHION.—The once-despised "mink" taking rank only one step higher than the muskrat, has got into such high favor from its close resemblance to the Hudson Bay sable, that importations have been displaced to a large extent, and now the American sable takes the precedence in comparison with almost any of the rival furs. Stone marten, fitch, squirrel, &c., are less inquired for. Success in winning popular favor results in this case much as it often does in the higher walks of animal life, and whole communities of the mink creation have been brought to sorrow from the effects of extensive adulation. In other words, the demand for mink has tended to surfeit the market, so that prices are about twenty per cent. lower than last year's. In style there is no essential change, except that the half-cape lands, owing to the use of the modernized Arabian hood in cloak making, which does not permit of covering.—The stock of furs on hand is about as usual in quantity, but it will be speedily reduced after the winter fairly sets in.—[N. Y. Journal of Commerce.

MAMMOTH DEER PARK.—The largest modern deer forest is that of the Duke of Athol, which, according to his evidence in the late case of the Earl of Wemyss against Campbell of Monzie, extends to 100,000 acres. The next is the forest of Farquharson of Inverquald, but which is partly under sheep and partly under deer, altogether about 130,000 Scotch acres.—Next to which ranks Lord Fife's forest of Mar about 600,000 acres. There are a number of other deer forests of much smaller extent, but the extent is not much increased of late years; and by comparison it will be found that the extent of ground under deer is now much less than it was one hundred years ago.—[Perthshire (Scotland) Courier.

A NEW MAMMOTH STEAMER.—The Winans Brothers, of Baltimore, are making their arrangements to begin, at an early day, the construction of another steamer after the model and construction of that which, for a year or two past, has attracted the attention of the marine world. The new steamer will be seven hundred feet long, and will be propelled by two wheels driven by eight engines of immense power. She will have a space of two hundred feet long and thirty in diameter. The main shaft will, according to the specification, weigh thirty tuns. The new ship will be constructed with high-pressure engines, and the builders have no doubts of success.

☞ TO ADVERTISERS.—The Pittsburgh DAILY GAZETTE has a large circulation among the business men in this and the surrounding cities—among those who buy and sell—and among manufacturers and producers. It may be found in nearly all the counting rooms, store houses, banking houses, hotels, factories and commission houses, in the two cities, where it is read and carried home to the families for perusal. As a medium for advertising, therefore, it offers inducements which no other paper in Western Pennsylvania can offer, to all who desire to reach this large class of our citizens. The WEEKLY GAZETTE at this time has a much larger circulation in Western Pennsylvania, Ohio and Virginia among substantial farmers and merchants than any other secular paper in this section of the State.

☞ THE DAILY GAZETTE is the oldest Newspaper in the West, and having an extensive circulation among the business men, and reaching all classes, it offers inducements to advertisers as the best medium through which to reach the public.

☞ THE WEEKLY GAZETTE is issued every Wednesday and Saturday, on a large, blanket sheet, and contains in addition to the news of the week, a carefully prepared and valuable report of the Markets, commercial and monetary, of the Four—making it the best Commercial Newspaper in the West.

TERMS:

DAILY—Six Dollars per annum, payable in advance, or 10½ cents per week, payable to the Carriers.

WEEKLY—One Dollar per annum, payable in advance. A copy sent free to persons who get up a club exceeding ten.

☞ Advance payments are strictly required, and no paper will be sent after the time is up to which it was paid.

DR. MOTT'S CHALYBEATE RESTORATIVE PILLS OF IRON.

AN APERIENT AND STOMACHIC Preparation of IRON purified of Oxygen and Carbon by combustion in Hydrogen. Sanctioned by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions indicate its necessity in almost every concourse of persons. Inaction in all maladies in which it has been tried, it has proved absolutely curative in each of the following complaints, viz:

Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhœa, Dysentery, incipient Consumption, Scrofulous Tuberculosis, Bad Blood, Obstructions, Leucorrhœa, Chlorosis, Liver Complaints, Chronic Diseases, Rheumatism, Intermittent Fevers, Pimples on the Face, &c.

In cases or General Debility, whether the result of acute disease or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative has proved successful in an extraordinary degree—no description nor written attestation would render credible.—Invalids so long bed-ridden as to have become forgotten in their own neighborhoods, have suddenly re-appeared in the busy world as if just return-d from protracted travel in a distant land. None very signal instances of this kind are attested of female sufferers, emaciated victims of apparent consumption, sanguineous exhaustion, critical changes, and that complication of nervous and dyspeptic symptoms so sir and sinister for which the physician has no name.

In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation of this preparation of Iron is most speedily to salutary, for, unlike the old calomel, it is vigorously tonic, without being exciting and overstimulating, and consequently aperient, even in the most obstinate cases of costiveness, without ever being a gastric purgative, or inflicting a disagreeable sensation.

It is in bilious property, among others, which make it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms them.

In Dyspepsia, innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most inveterate cases, including the attendant Costiveness.

In unchecked Diarrhœa, even when advanced to Dysentery, confirmed, exhausting, and apparently malignant, the effects have been equally decisive and astonishing.

In the bowel malady, best of flesh and strength, debilitating cough, and resultless hectic, which generally indicate Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Scrofulous Tuberculosis, this inculcated iron has had far more than the good effect of the most cautiously balanced preparations of Iodine, without any of their well known liabilities.

The attention of families cannot be too confidently invited to this remedy and restorative, in the cases peculiarly affecting them.

In Rheumatism, both chronic and inflammatory—in the latter, however, more decidedly—it has been favorably tried in all cases, both of alleviating pain and reducing the swellings and stiffness of the joints and muscles.

In Intermittent Fevers it must necessarily be a great remedy and energetic restorative, and its progress in the new districts of the West, will probably be one of high reputation and usefulness.

No remedy has ever been discovered in the whole history of medicine which exerts such prompt, happy, and fully reasonable effects. Good appetite, complete digestion, rapid acquisition of strength, with an unusual disposition for active and cheerful occupation, immediately follow its use.

Put up in neat flat metal boxes containing 50 pills; price 50 cents per box. For sale by Druggists and dealers. Will be sent free to any address on receipt of price. All letters, orders, etc., should be addressed to

Dr. GEORGE H. KEYSER, Wholesale Agent for Western Pennsylvania.

## Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. If cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ERUPTIVE and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

## Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below publishes, pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

## Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
