WEDNESDAY MORNING, DEC. 19.

TO GOV. WISE AND HIS RIBBUTE-MEN.

Here's a health to you all, gallant Mingo-Men,
While the Union you guard and stay in it, men;
But if, "by the Powers!"
Disunion—you dare to begin it, men,
We'll sound you by script, brave *Mingo-men*—
And then don't you see you'll be sure?
New York, Dec. 12, 1860. "R. F. Unum."

WOMAN KEEPING SECRETS.—A new doctrine is being promulgated by "All the Year Round." Hear it:—We laugh at the woman's tongue, and wonder when a woman keeps a secret; but every true woman keeps a box of choice reserves for her own private indulgence. The man's mysteries are not hers; if he cannot keep them to be blown abroad. Her own secrets of love, of loss, of self denial, of unexpected suffering, no woman exposes altogether, even to her nearest friend. There never lived a husband happy in the true love of his wife, who fairly knew all the depths of her mind about him. Every man profits stupidly by the wise little preceptions except in deeds, of which we vaguely ascribe the fitness to a special faculty called woman's tact. Women, in short, keep to themselves four-fifths of the secrets of society, and do it with a winning air of frankness all their own.

A man with a secret will be stony, or protentious, or provokingly suggestive; he will keep his mouth ostentatiously shut. A woman is too absolutely secret to set up a public sign over whatever may lie buried in her mind. She gossips, prattles, pours out what she does not care to hold, with such an air of unreserved simplicity that all mankind is mystified, and says in friendly jest, "woman only hides what she don't know. Among the uneducated poor this difference between the woman and the man is most conspicuous. The innate powers of her sex place her at once upon an eminence which man can only reach by education. She does often be tied to one in whom there is little but the grain of understanding requisite to the formation of true sympathy. By far the greater number of the wives of unskilled laborers and mechanics, live more or less happily, and more or less conscious of hidden life within them, having such a seal upon their minds and heart."

MIGRATION OF THE BUFFALO.—There is a feature in the migratory character of the buffalo not generally known, except to hunters, and that is, that the vast body of the herd is never found in the same district of country two seasons in succession. The buffalo of North America form an immense army, marching in one continuous circuit, perhaps three fourths of the entire number of which are found within a range of from two to three hundred miles.—Thus where buffaloes are abundant one year they are fewer the next, until the great body, having completed its circuit, again makes its appearance. This circuit is completed in about four years. Its western limit is the eastern base of the Rocky Mountains, and its eastern is bounded by a marginal settlement of civilization, extending from the British settlements on the North to northern TEXAS on the South. The range of latitude traversed has for many years been about twenty degrees, extending from the Cross Timbers of Texas to the Tributaries of Lake Winnipeg on the North. The band travels southward on the eastern line and northward on the western, never crossing the Rocky Mountains. The comparative proximity of these lines, being at some points not over five hundred miles, accounts for the presence of buffaloes, in relatively small numbers, throughout the entire area embraced within the lines of travel.—[San Francisco Alta California.

A writer in the London "Chemical News" says that the new Houses of Parliament, which are built of Magnesia limestone, are already crumbling into decay. He also states that the rain which falls in cities is more destructive to buildings than that which falls in the country, owing to the solvent properties of the impurities which are washed out of city air by the rain.

On a mango tree, under which General Havelock is buried, a rudely cut piece of tin is nailed, bearing the following words scratched upon it: "On this spot lie the remains of General Havelock. May he rest in peace." This is all that marks the grave of the hero of Lucknow.

☞ To ADVERTISERS.—The Pittsburgh DAILY GAZETTE has a large circulation among the business men in this and the surrounding cities—among those who BUY and who SELL—and among manufacturers and producers. It may be found in nearly all the counting rooms, store houses, banking houses, hotels, factories and commission houses in the two cities, where it is read and carried home to the families for perusal. As a medium for advertising, therefore, it offers inducements which no other paper in Western Pennsylvania can offer to sell wares desire to reach this large class of our citizens. The WEEKLY GAZETTE at this time has a much larger circulation in Western Pennsylvania, Ohio and Virginia among substantial farmers and merchants than any other secular paper in the section of the State.

☞ *THE DAILY GAZETTE is the oldest Newspaper in the West, and has an extensive circulation amongst the business men, and reaching all classes, it offers inducements to advertisers as the best medium through which to reach the public.*

☞ *THE WEEKLY GAZETTE is issued every Wednesday and Saturday, on a large blanket sheet, and contains in addition to the news of the week, a carefully prepared and valuable report of the Markets, commercial and monetary affairs, making it the best Commercial Newspaper in the West.*

TERMS:

DAILY—Six Dollars per annum, payable in advance, or 12½ cents per week, payable to the Carriers.

WEEKLY—One Dollar per annum, payable in advance. A copy sent free to persons who get up a club exceeding ten.

☞ Advance payments are strictly required, and no paper will be sent after the time is up to which it was paid.

DR. MOTT'S
CHALYBEATE RESTORATIVE
PILLS OF IRON.

AN APERIENT AND STOMACHIC Preparation of IRON purified of Oxygen and Carbon by combination in Hydrogen. Prescribed by the highest Medical authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of Iron can be compared with it. Impurities of the blood, fragments of vital energy, pain and others are sickly symptoms indicate its necessity in almost every conceivable form. Indeed, one to all maladies in which it has been used, it has proved absolutely curative in each of the following complaints, viz:

Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhœa, Dysentery, Incipient Consumption, Scrofulous Tuberculous Salt Rheum, Ringworm, Intermittent Fevers, Pimples on the Face, &c.

In youth or General Debility, whether the result of acute disease or of the constitutional disturbance of nervous and sexual energy from chronic complaints, one bottle of this restorative has proved successful to an extent which no description has ever written. Attention would render sufferers liable so long bed-ridden as to have become forgotten in their own neighborhoods, have suddenly reappeared in the busy world as if just returned from protracted travel in a distant land. Some very signal instances of this kind are recorded of female sufferers, wrecked victims of apparent nervous complaints, or emaciation, critical chlorosis and that complication of nervous and dyspeptic aversion to air and exercise for which the physician has no name.

In Nervous Affections of all kinds, and for remote family or hereditary taint, the operation of the preparation of IRON is remarkable. Persons who, for months, had cold cheeks, ill in vigorously tonic, without being exciting and prostrating; and gently, regularly aperient, even in the most obstinate cases of costiveness, without ever being a gastric purgative, or inflicting a disagreeable distension.

It is the latter property, among others, which makes it so reliable family effectual and permanent a remedy for PILES, upon which it also appears to exert a distinct and specific action by discovering the local tendency which forms them.

In Dyspepsia, Indigestion take no are to assume a single box of these (Mott) Iron Pills has often suffered for the most inveterate cases, including the attendant Constipation.

In unchecked Diarrhœa, even when attended by Dysentery, the same benefit, and consequently, and apparently malignant, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debilitating cough, and remittent hectic, which generally indicate Incipient Consumption, this remedy has always the balance of friends and physicians, for several very gratifying and interesting cases.

In Scrofulous Tuberculous, this medicated iron has had for more than the good effect of the most cautiously balanced preparations of iodine, without any of their well known inelicitous.

The attention of families cannot be too confidently invited to this remedy and restorative, in the cases peculiarly its own.

In Rheumatism, both chronic and inflammatory—in the gouty, lymph, nervy dentinoid—it has been invariably useful, and in the latter, in which the most excruciating pain and sickness of the joints and muscles.

In Liver Complaint, Jaundice, it has commonly been a great remedy and remarkable restorative, and in progress in the new countries of the West, will probably be one of high value and confidence.

No remedy has ever been discovered in the whole history of medicine which, in every case prompt, happy, and fully reparative action, with so prompt distinction as to prove and essential existence, "the beneficial influence of IRON."

Put up in neat flat metal boxes containing 50 pills with directions for use; for sale by Druggists and dealers. Will be sent by mail to any part of the country on receipt of price. All letters, &c., should be addressed to

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. What ever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must rennovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S
Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the extirpation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as FAVUS and SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, or ERYSIPELAS, PIMPLES, PUSTULES, BLOTCHES, BLAINS and BOILS, TUMORS, TETTER and SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYPHILITIC and MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "*impurity of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

Ayer's Cathartic Pills,

FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. A few doses of these pills properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. Many of these will be pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: *Costiveness, Heartburn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Inaction of the Bowels, Flatulency, Loss of Appetite, Jaundice*, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

Ayer's Cherry Pectoral,

FOR THE RAPID CURE OF

Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and when its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

Monetary.

DOLLAR SAVINGS BANK
No. 65 Fourth Street.
CHARTERED IN 1855.

OPEN DAILY FROM 9 TO 2 O'CLOCK, also on Wednesday and Saturday evenings, from May first to November first, from 7 to 9 o'clock; and from November first to May first, from 6 to 8 o'clock.

Deposits received of all sums not less than one Dollar and a Dividend of the profits declared twice a year, to June and December, commencing last June. Dividends made semi-annually, in June and December, since the Bank was organized, to the rate of six per cent. a year.

Interest, if not drawn, is added to the credit of the depositor as principal, and bears the same interest from the first days of June and December, compounding twice a year, with a trebling of the deposits in all cases where the interest has been built. At this rate, money will double in less than 12 years, making in the aggregate many additions to the original sum.

Books containing the Charter, By-Laws, Rules and Regulations furnished gratis on application at the Bank's office.

President—GEORGE ALBERT.
