We paid a brief visit to the office of Alderman Morrow on Saturday, and judging from what we saw there were led to suppose that the worthy dispenser of justice had retired from his position as legal pacificator and set up a home mission for the propagation & temperance after the manner of Gouch When we entered first, we noticed a redface demure looking indiaidual standing in on demure looking indisidual standing in one corner, while the Alderman busied himself in filling up a biank clotted in all the formality of the control of the Poe's treatment of his feathered visitor, the Alder an endeavored to capture the intruder, that he might secure his presence and song to grace his tiny Court, where so often the discordant notes of plaintiff, defendant and wrangling atternices are heard. But just as he was about placing his hand upon the prize, it spread its wings and soared above his head, showing it was determined to escape the dittehes of the custodian of justice. Of all Government securities, Five Twenties of 1854 and 1855, are most inquired for, and are yet cheap, compared with Ton Forties or Seven-Thirties—the latter having so short time to run. Gold has been firm but quiet to day, and unless we hear of more war news, and failures in Europe, especially Central Gormany, the premium will keep about 180. A sudden decline to 186, would bring out large amounts of specie held by parties who seized the opportunity to sell a few weeks since. Exchange on Europe has advanced again, especially short data and advanced again, especially for the service of the ser ecially short date paper.
Our local money market continues very Our local money market continuous very tringent, and the banks discount but little. The most of them have shown by their last quarterly statement a large line of available (unos, either in exchange or each on hand, but the bulk of it is in compound interest motes which are too precious to be parted with at present.

The hold which the Government ioans have taken on public confidence so soon after the termination of the war, and in the face of our immense debt, is surprising to even those most sanguine at the the time of their being put on the market. They are widely scattered allover the country, in the hands of all classes of persons, from the comparatively small savings of the farmer and the mechanic, up to the tens and hundreds of thousands of the large capitalists, and by all the most entire confidence seems to be entertained that the faith of the government will be maintained in fulfilling all its promises—the debt and interest will be most as conditioned.

The Financial Chronicle gives currency to the report that Mr. McCulloch intends to take advantage of the anticipated case in the money market to "put down the rate of interest when the post two or interesting the week to been fair, and within the past two or large size. but as yet unissued."

PITTSBURGH MARKETS. OFFICE OF THE PITTSBURGH GARRITE, }
SATURDAY, July 7, 1866. The produce markets have been dull and neglected to some extent during the past week. This, however, is usually the case at this season of the year. Our business men, generally, are always engaged during the first part of July in quaring their accounts, and no effort is made, scarcely to do anything else; besides the domaint for the leading articles is somewhat controlled, and round lot SATURDAY, July 7, 1806.

The New York stock quotations to-day were as follows: Gold, 1804; 1803, 1805; Five Twentes, 1642,61654; Ton Forties, 973; Seven Thirties, 1653; Cleveland & Plitsburgh R.R., 373; Eric, 67; Western Telegraph, 353; first morteage bonds Fort Wayne, 1012; second do, 373; third do, 874. There is but comparatively little doing in slocks and bonds at present. The sudden advance of all government bonds, except Ton-Portles, provents capitalists, and especially an account of the rise, nor for the purpose of realizing a very handsome profit.
