

SHIP CANALS.

For some years past, and particularly during the last few months, the project of enlarging the Illinois canal, which extends from Lake Michigan at Chicago to the Mississippi river at La Salle, has been persistently urged upon the attention of Congress.

It is a well known fact that the Illinois canal, which extends from Lake Michigan at Chicago to the Mississippi river at La Salle, has been persistently urged upon the attention of Congress.

Upon the same considerations the enlargement of the Illinois canal, which extends from Lake Michigan at Chicago to the Mississippi river at La Salle, has been persistently urged upon the attention of Congress.

THE BALANCE OF POWER.

For a number of years at least, it has been said and written by French and British statesmen and journalists, about the Balance of Power in Europe, its necessity, its nature, and the means of maintaining it.

Of course this continued discussion has embraced the existence of small states, their dependence, the consequences thereof upon the political equilibrium, and whether they hinder or help the progress of society on that continent.

All this talking and writing has been permeated with one idea, which is that it will not do to let France and Germany become too powerful, and that the progress of society on that continent will be hindered.

The recent days of Prussia from a second or third rate nation to the very leadership of Europe has disturbed the old Balance of Power very decidedly.

It is a well known fact that the Illinois canal, which extends from Lake Michigan at Chicago to the Mississippi river at La Salle, has been persistently urged upon the attention of Congress.
