PRESIDENTIAL.

From ordinary circumstances the selection of a citizen to fill the office of President of the United States is a task of high importance. Under the existing peculiar condition of the country that duty assumes a gravity and magnitude which are not to be compared with those of any former election.

It is only through the stomach that either of these conditions can be effected. When it is either overfilled or underfilled, the circulation is impeded, and the system is thrown into a state of disequilibrium.

By the action of poisons on the system, the blood is rendered impure, and the organs are unable to perform their functions. The result is a general debility, and the system is thrown into a state of disequilibrium.

The Republican, the radical organ of the North, has been the cause of the present state of affairs. It has been the cause of the present state of affairs, and it is the cause of the present state of affairs.

Death by lightning. It appears from statistics kept in France, that during the last thirty years more than ten thousand people were struck by lightning, of whom two thousand two hundred and thirty-two were killed outright.

INVESTIGATION—NO. 3.

CHEMISTRY.

The universal analyzer of all substances, and the most accurate and reliable of all the instruments of the kind, has been invented by a chemist of the name of Dr. J. C. Smith.

It is only through the stomach that either of these conditions can be effected. When it is either overfilled or underfilled, the circulation is impeded, and the system is thrown into a state of disequilibrium.
