an embodimens of the construction; that is, from judgment and sympathy, he construed and enforced the Military Governments Acts in the spirit in which they were framed. As those Acts were passed first arisinst the President's recommendation, arisinst the President's recommendation, and without definite assurances as to the manner in which he will employ to the manner in which he will employ griwith which the General gave them exemplification in his District, was regarded by that functionary as a constructive personal effect. He has Indeed onal affront. He has, indeed, in a telegraphic note to GRANT, in which remarkable for suavity, as the occato get rid of him. The appearance of the note was the opportunity, and the

bedful to giving effect to the plans that had been matured. We are not admir ers of Mr. Stanton. How he main

bad been ansured. We are not admirer of Mr. Starron. How he maintained his foothold is the Cabinet after the passage of the Office Tenure act, we know and approve; how the kept it before we also know, but do not commend. When he held by courtey of the President he made concessions of principle whan we shed by courtey of the President he made concessions of principle whan we should have been more manly in him to have thrown up and gone into prirate life. His friend, and the war of the moral and the was actuated by High public consideration; but as we could not take that view of his case, we were compelled to dissent from their, pyerments. But, this is plain, that in the progress of events Mr. Sawano can be frequent in the War Department obedience to the lawre, and in that position his removal was an insult to the loysity of the nation. It is now said that Mr. Sawano has continued by no same fallen under the dipleasure of the President, and in the propersion of the body? And is that not a natural law which controls the various functions of the body? And is that not a natural law which occurred the propersion of the body? And is that not a natural law which occurred the propersion of the body? And is that not a natural law which occurred the propersion of the body? As an incellent of the control of the natural law is a control of the natural law and law are not received the natural law, you will not such the present time shall have passed away, this, we think it, is the rank be will be sufficient to

public questions, and particularly such as are of gravity, and that those opinions should be known of all men. How else can the fundamental idea of representations in the first degree, in the killing of ban iel Hoppess. If he is executed, it will be the first instance of expital punishmen

as are of gravity, and that these opinions in the first degree, in the shining of the should be known of all men. How else iel Hoppass. If he is extended, it will can the fundamental idea of representatended when from the control of the control their proxies in the government upon any man without definite assurances as to the manner in which he will employ them, they are fast verging to the point where they will be ready to take the yoke of despotiam upon their necks, because fitted for nothing better.

Another and final point to be attended to, is to take care that the elections about to be held do not give the President will be readily and the same of the greatest appeties, but the same of the properties that is the same of the properties that the same of the properties that is the same of the properties of the properti

sion of his displeasure. But that note was private and unofficial, and up to this hour has not taken authentic form.

The stand of the Democrats encouragement, for the Republicans to allow the Democrats to carry Pennsylvania the Democrats to carry Pennsylvania the Sweatness the whole country knows the Fresident was out of patience with Smeatness long before that note was written, and was hunting for a pretest would be used as solid proof of reaction among the people against the course of their Representatives in Conthe note was the opportunity, and the President has used it. He would have made the removal all the same, if that note and none of like import had ever been written.

Secretary Pranton was, also, in the President's way. His displacement was

tion, by immediate and vigorous efforts

to make assurance doubly sure. Boscher on Natural Laws.

Men divide laws into different classe:
They say that there is a law which relates to the feath, to the body, and a law
which relates to the mind. But the body
is not more astract than the

places when his most chariabed principles were to receive their vindication. He is lacking in physical hardhood or courage. When the hour of trial came, he qualled, and passed under a cloud, from which he will emerge accurance. He now belongs to the past, and it is of little consequence to the nation what disposition is made of him. For a long space he was the evil genius of the Cabiast, and now he is about to be can addift chiefly because the few who remain of his old Espablican adherents will not follow him or the President into the Democratic rank.

Mr. Raydall, never was of special moment. A fluent and pleasant talker, plausible but not strong, ornate rather than convincing, companionable in personal relations, and complying when an advantage is to be gained by stooping, he deserted the Republican party and went ever to the Administration when it was of importance for it to gain recruits from that side and few were offering. His ducility gained him a place is the Cabinet. The grand Conservative party shet up in a day, and doceived and were extractive party shet up in a day, and doceived and were any contractive party shet up in a day, and doceived and were depressed of the contractive party shet up in a day, and doceived and were depressed in the Cabinet. The grand Conservative party shet up in a day, and doceived to the account of the cabinet and the cab

ing. His ductility gained him a place in the Cabinet. The grand Conservative party shet up in a day, and doceled many, Mr. Ramball among the number. But, unfortunately for him, like Joxan's gourd, the Conservative party withered over night. Now he wants to work back into his old position. He thinks it will help his case to roam about, with his head under his arm, in testimony of martyrdom. But martyrs have grown stale. There is no such enchantment in them as there was of yore, especially in marityrs of this pettern. It may be an interesting problem to Mr. Ramball, what shall become of him, but nobody would grieve were he buried politically dity inhoms deep.
