change of the Na

b the Honorable the Select and Country Councils, City of Allepheny: The undersigned having been appoint d a Committee to examine the Sewe WATER LINES.

Is a committee to examine an especi-laws of Allegheny City, or more especi-ly that portion relating to the manner of assessment, and report whether any assessment, and report whether any WATES LANSA. Mr. Megraw presented a communica-tion from Major Wm. Wade, which had been addressed to Mayor Morrison, staling that earth and cinders are placed outside of the established water lines in a state of the stablished water the state new of assessment, and report whether any altorations or suncedments were prese-sary, made examination of the points in that ascened due the importance of the subject and as the result of their labors by leave to submit the following report. In arriving at a plan of taxaiton for seweringe purposes, the first thing to be considered is the nature of the benefits derived by the construction of the sewers contemplated. It must be admitted that whatever can be done towards improving the asnist v condition of the sewers and aspatbilly for busies purposes, as well as for places of residence, benefits the whoiler services and considered that whatever can be done towards improving the sanistry condition of the severs wells for places of residence, benefits the whatever and the accuration of the severs well as for places of residence, benefits the whole city. The construction of the first severe the whole city. The construction of sorm waters collecting there, and to surrounding atmosphere, as well as to carry off all the accumulations incident is howing at mosphere, as well as to carry off all the accumulations incident surrounding atmosphere, as well as to busing the basis to indice the set prosent as a fermed to the basis to indice the set prosent and inform would arise thereform, and infect the saturation of the size to proyes a remedy. Strukt on grates to increate the set of the saturation of the size to proyes a remedy. Struct the subsoli of the arrow and property of the city is the set of the communication to provent the subsoli of the arrow through which it passes to in science as the source of the communication through which it passes to in science as the source of the source of the source of the communication the communication and pay in a diagont through which it passes to in science as the source of the source of the communication the commonice of the source of the source of the source of On assessment, and report whether any alterations or sancedments were neces-sary, made examination of the picints in question with the care and consideration that seemed due the importance of the pay ick, and as the result of their labors bey ick, and as the result of their labors bey ick, and as the result of their labors bey ick, and as the result of their the bey ick and as the result of their the there is a set of the result of the result of the result of the result of the considered is the nature of the result contemplated. It muts be admitted that what ever can be done towards importance

ith now. saturation of how through which it passes to have discharge, not improvements of a pentr-character and affect directly the welfare if and properity of the sity at largo Any-thing, further than this in the way of drainage seems to confer special juster than general hencit-and assumes a strictly local character, affecting only the the sewer for the the sewer for the seven for the the sever for the seven for the strictly best for the seven for the the sever for the seven for the seven for the the sever for the seven for and Sewers. Mi.- Drennan presented a remon-strance from residents of Taylor alley, against placing curb stone on said alley, it being oaly twenty feet wide, and the the change not desured by the property holders on that throughing. Redered to Committee on Streets and Sewers. THE CANAL ST. WAR AGEN.

The resolution of the second of the property abutting on it, a construction of a several form the property abutting on it, access the in-indice on second and several second data in the second data is the second data in the second data in the second data is a second data

of the ground, and also the present and prospectives improvements, as wells as what has already been done in the way of assessment of proporty for such pur-poses. -It must be concoded that in any plan of soverage each district or draining ba-and lateral severa, and as these districts and lateral severa, and as these districts and lateral severa, and as these districts of their improvements, and the value of their improvements, and the value of their improvements, and the value of their property, to main the districts of property is the several the district is property in the Seventh ward, the sever ments ary made, it would be mailfost-then for first or the several as the several of the several district is property in the Seventh ward, the sever-ments ary made, it would be mailfost-then for several district is in the case of lateral severas a different property is the Seventh ward, the sever-ments ary made, it would be mailfost-then for several district is in the case of lateral severas a different is of the first, and vice-sersa. In the case of lateral severas a different property is the Seventh ward, the sever-ments ary made, it would be mailfost-then first own in the district. These several of local severs as different with and perfecting the domestic ar-rangements for dwellings, removing all fits, ordures and refuses water thereform These severs set as improved vicing and for carrying away what would otherwise the order server capable of carrying and cost of a sever capable of carrying and cost of a sever capable of carrying art for a block's lengti, and appor-t of this house drains on and the several the form the several bard for carrying away what would otherwise the host of a sever capable of carrying art for a block's lengti, and appor-t of this house drains of construction. The protect pay the cost of construction for carrying away what would otherwise the property shutting, and take this rate and filly which he allows to re-main there to the great danger of tho-the property shutting, and

Water and fitth, which he allows to re-tion this cost on tho fool front of all proposed pay the data this rate is not hore to the great danger of the health of those living, in the neighbor-howed, pay the cost of construction. The rate should be set at a fraction gabore the actual cost to allow for contingencies. Shok made information before Justice Constructed. Underships han for payment allowance for construction, imaking allowance for construction, imaking andorn to cover the cost of the main as these main sewers also handler is descent for home sewer-age and drainage of all improvements

Delicate Females, Ciergyinen, 2 charts, Lawyers and persons of see tary habits—particularly those who weak and suffer with mental depress are greatly benetitted by these Bitter
