DEMOCRACY IN GREAT BRITAIN.

The maxim that "Revolutions never go backwards," is frequently contraverted, but never in the large or totality. That is the minute and special. It is conceded by all observers that the ebb and flow of the life of nations hold analogy, in some particulars, to the constant rise and fall of oceanic tides; or, rather, to the current of a mighty river, that now rushes down a precipitous incline, now disappears underneath the sand, now winds around the base of an declivity, now makes a torturous path through the soft alluvial of a broad valley, now falls into an eddy and seems to turn back upon itself, now sweeps majestically onwards for many a league in direct and full flow, and now divides, seeking the sea by many outlets. Whatever temporary or incidental appearances may indicate to the contrary, there is, on the whole, a constant though not uniform progress.

This idea may readily be verified and its accuracy demonstrated by a careful study of British history. To superficial cogitiles, it appears that what was gained during the protracted parliamentary struggle which resulted in the overthrow of the monarchy and the Protectorate of CROMWELL, was lost at the Restoration. But whoever searches beneath the surface finds indubitable evidence that, notwithstanding the seeming vicissitudes of the reaction, most of the essential ameliorations that had been accomplished actually remained. Not a branch that had been lopped from the tree of feudalism was ever so replaced as to be vitalized by the parent sap and start into renewed efflorescence. The austerity of Puritanism was, indeed, contemned, and the rein given to a wild and delirious license, but this touched no more than the rough rind, while the pith and substance remained secure. Since then, particular periods may be noted in which Prerogative seemed to gain upon Liberty, but these retrogressions were of short duration, and when the stream of events, escaping from incidental hindrances, resumed its normal flow, its velocity was so increased as to afford abundant compensation for its previous backwardness.

During the last hundred years the progress made towards the full enfranchisement of the masses has been steady and surprising. This progress has been felt in every department of activity—in politics, in religion, in education, in business, and even in pleasures. At first the nobility succeeded in wrenching the government out of the exclusive control of the Crown; then the gentry disputed the authority of the nobility, and at length the larger share to themselves; and now the laboring classes are loudly demanding a recognition of their rights in the premises, and cannot for a considerable period be resisted.

So far has this movement been carried that the necessity for a thorough revision of the educational system is generally felt and will soon be carried. This revision, when it shall come, will recognize the right of each child to a good primary education at the expense of the whole. This is not a small matter, nor does it stand disconnected and apart as many foolishly imagine. The system of education adopted in each particular country must and will comport, in the long run, with the form of government prevailing therein. The Papal government will concern itself chiefly in the education of priests; and this because it is a theocracy, ruling in the name of God, not for the benefit of the people, but for its own. Russia is a military despotism, and its system of instruction is designed to furnish forth soldiers; a few to command, and the many to obey. So long as Great Britain was an oligarchical State, its instructional scheme was devised and directed to develop and equip an aristocracy. In these several instances the systems of education are logical; that is, they are suited to the nature of the case. It is apparent, therefore, that whenever a government takes the education of the masses in hand, with the intention of furnishing each for the duties of life at the cost of all, it has passed under the control of the democratic element. The men who direct it may not see this distinctly; may entertain the notion that by making concessions they are gaining time and power, to throttle the popular aspirations; and may even delude themselves [illegible] are actually pushed from their [illegible] education of all implies [illegible] and on equal [illegible] stools; but the current is [illegible] that all are to participate [illegible] terms in the management of national affairs.

The Trade Unions present another indication of the same tendency. Not that we justify or excuse all that these organizations have done. That they have adopted arson and murder as regular instrumentalities had been proved beyond the possibility of cavil or question. It is absolutely makes the blood run cold to read the narration of the atrocities systematically resorted to by them to intimidate or punish such as refuse to submit to their exactions. Let it be hoped that this is only the frenzy of their newly acquired strength, and that experience will instruct them into wiser and humaner methods.

But, into whatever terrible excesses the Unions have run, they are certainly disciplining the laboring classes into many of the attributes of self-government. In these bodies the [illegible] elements may be crude, imperfect, direful, wild, or cruel; but vast and beneficial consequences have proceeded from causes still more unpromising at their inception.

How powerful these Unions have become is seen in the fact that though constantly resorting to most brutal crimes against innocent individuals, the government does not dare lay its interdict upon them. The Courts make some inquisitions. Parliamentary Commissions search into the very depth of the offences and spread the horrible evidence before the nation; but the authorities do not dare put forth their hands and crush up the combinations. The Unions have become formidable to the government.

It has happened, from the beginning of the world, in almost all lands, that the civil administration has been in alliance with the ecclesiastical. As best they could, the powers of this world have entered into treaty with the powers of the world to come, for mutual profit. The known have wished the sanction of the unknown; and the spiritual have delighted to be armed with the carnal might of the physical. Even in exceptional cases, as in the United States, where this tendency is formally repudiated, it is not difficult for practical observers to detect traces of it, latent indeed, but ready upon inducement to spring into surprising activity. BYRON coolly averred that most of the churches in England had shammed on this question, and all but the Church, as by law established had made a "damned poor bargain of it." But scarcely was he laid in his grave when Lord GREY, speaking in Parliament, as Prime Minister, gave the pulsings of that Church solemn warning to "set their house in order." He was not heeded; but looking from the light of intelligence that he accepted he discerned the future.

[illegible] elements shall coalesce upon a common basis of action, they will become irresistible. Whatever may be the issue in this respect, it is apparent that the spirit of genuine democracy is rapidly gaining on caste and privilege, and that the day of complete political emancipation may suddenly arrive.

NEW PUBLICATIONS.

MILITARY HISTORY OF ULYSSES S. GRANT, from April 1, 1861, to April 1, 1865. By Adam Badeau, Colonel and Aide-Camp to the General-in-Chief. Brevet Brigadier General U. S. Army. Vol. I. New York: D. Appleton and Company, 443 and 445 Broadway. 1868. For sale by Davis, Clarke & Co., 85 Wood street, Pittsburgh.

The late war will furnish abundant resources for increasing the historic lore of this country. History was made during that struggle, the interest of which will reach far beyond the bounds of this continent, and such as never thrilled the world with so many thrilling aspects as our great rebellion. Quite a number of books have already appeared touching the war, but most, if not all, were hastily prepared and lack unity and completeness. Col. Badeau, however, has taken time, and sifted well the abundant materials at his command, so that we have in this volume an authentic history of some of the grand battles of the late war, under the lead of that great military chieftain, General Grant. The intimate relations of Col. Badeau to Gen. Grant, as a member of his staff, enabled him to do what he has done, not to state only substantial facts from personal observation or obtained from reliable resources. This history not only traces the wonderful military genius of Grant, but shows his ability as a statesman. The volume has a fine portrait of Gen. Grant, engraved on steel, and seventeen maps and plans of battles of much value. It brings the history down to the 9th of March, 1864, when Gen. Grant received his commission as Lieutenant General. A valuable Appendix, containing important correspondence, fills about seventy-five of the closing pages. Appleton's have brought out the book in elegant style, morocco over, clean, white, substantial paper, bright type, and every way worthy of that house.

DUFF'S BOOK-KEEPING, BY SINGLE AND DOUBLE ENTRY. By P. Duff, formerly mercantile, founder and proprietor of Duff's Mercantile College, of Pittsburgh. Twentieth Edition, enlarged and revised. New York: Harper and Brothers. Pittsburgh: Henry Miner, No. 71 and 73 Fifth street.

The author of this work is well known in this community, and is still the honored head of the Commercial College bearing his name, established over a quarter of a century ago. As the organization it was a new field of venture in this department of business education. By dint of perseverance the necessity for such institutions steadily grew in favor, until they are now regarded almost as an indispensable help to securing a proper knowledge of book-keeping. With the roll of years Mr. Duff has attained a wide fame, both as a teacher, and an author in the science of book-keeping. This new edition has been carefully revised and enlarged fully two hundred pages, in which are included a full set of joint stock bank books, showing how bank accounts must be managed under the National Banking Law. An entirely new system for the use of private banks, etc, and also the forms of modern railroad accounts are given. The book is finely printed, and it will be found valuable to students and a useful book of reference to adepts in book-keeping.

THE ADVENTURES OF OLIVER TWIST. By Charles Dickens. People's Edition. With illustrations by George Cruikshank. Published by T. B. Peterson & Bros., Philadelphia. For sale by W. A. Gilchrist, Fifth street near Wood, Pittsburgh.

This volume makes the tenth of the "People's Edition," which are the cheapest and most portable editions of the many now before the public. The explosion here before expressed of its excellencies we have no reason to change, believing that for compactness and neatness, as well as for being well printed, it commends itself as being truly the "People's Edition." Objections have been made that some of the characters are chosen from some of the "veiled ones" of degraded London's populations. Oliver Twist, the central figure around which so much interest clusters, despite his associations, triumphed at last over all the adverse circumstances of his life. Our readers will find it an interesting work.

FOLKS AND FAIRIES. Stories for Little Children. By Lucy Randall Comfort. With Engravings. Published by Harper & Brothers, New York. For sale by Henry Miner, 71 and 73 Fifth street.

Twenty-eight stories and twelve illustrations are embraced in this little volume. These charming stories are woven together by one who has shown rare talents for such a difficult role. The "wee folk" will find much in the book that will amuse and interest them. The fair author may well be proud of her success.

HAROLD THE LAST OF THE SAXON KINGS. By Sir Edward Bulwer, Lytton, Bart. Complete in one volume. Philadelphia: J. B. Lippincott & Co. For sale by Davis, Clarke & Co., 85 Wood street.

This forms one of the series of "Globe Edition," of which reference has heretofore been made. It contains the whole of "Harold," and is regarded as one of the most popular creations of the talented author. The book is printed in good type, on a rich creamy paper, and elegantly bound.

A PANTHER WOMAN. By Seymour Mall, Lt. S. N. New York: Sheldon & Co. Pittsburgh: Davis, Clarke & Co.

This little volume, of less than a hundred pages, is addressed to those who heard him speak in this country, and especially to those who have not sought an interest in Christ. The address is worded in the plain, earnest style of the distinguished minister.

THE YOUNG FOLKS IN SCIENCE. Translated from the German of Emma Seiler by J. Sweetman. Illustrated by the American Philosophical Society. Philadelphia: Scientific character. By diligent study and patient research she has made herself entirely acquainted with all the facts and theories concerning the productions of the voice. It treats of vocal music, as follows: physiological, physical, and esthetic, with an appendix in regard to the vocal organs. Doubtless this volume will be valuable to those in the higher walks of this delightful art, but to the majority who are lovers of music, it may lack the practical elements to make it popular to the masses. It is, however, a valuable contribution to this branch of science.

THREE LIVES. A Novel. By Sidney Lanier. New York: Hurd & Houghton. Pittsburgh: Davis, Clarke & Co.

This well-told story breathes the balmy air of the South. It fairly glows with this type of our countrymen. The author clearly indicates the feelings of a Southerner, and yet the work has merit as well as interest to all classes of readers. The brusque style, piquant and fresh at times, shows the keen talents of the author. The chapters touching some of the incidents of the war will give edge and interest to the story. The publishers have performed their part well.

POEMS. By James R. Eversharp, author of a Volume of Miscellanies. Philadelphia: J. B. Lippincott & Co. Pittsburgh: Davis, Clarke & Co.

This volume contains thirty-seven short poems, a number of which possess decided merit. We select "The Land I Love," "The Harvest Day," "The Kearsarge and Alabama," "Campbell's Lodge," "The Old School-House," "The War," as noteworthy. The patriotic strains which abound indicate full well the author's feelings on the live questions of the day. One whose judgment in such matters is valuable says the author's poetry has a natural segue of melody and thought.

RECREATIONS IN ASTRONOMY. By Petersen & Kendrick. Illustrated by Thomas Nast. Boston: Lee and Shepard. For sale by Henry Miner, 71 and 73 Fifth street.

This singular and amusing work proposes to be "a perfect record of the speculations, and experiences of the Dimocracy, during the eventful year 1867, as the Dimocracy of the United Kentuckian." The

[illegible] to troops of persons. The admirers of Nasby will be pleased to have these inimitable papers put up in such an attractive form.

NAPOLEON AND BLUCHER. An Historical Novel. By L. Muhlbach, author of "Daughter of an Empress," "Marie Antoinette," "Joseph II. and his Court," etc. Complete in one volume. With illustrations. New York: D. Appleton and Company, Pittsburgh: Davis, Clarke & Co.

There is such a fascinating influence about the writings of Louisa Muhlbach that the reader is borne gently along as by magic. Coupled with this charming style, there is considerable of the dramatic element in her writings. There is, too, much of luxuriant grouping of language of the French school of writers, which renders her writings popular and fascinating. This volume depicts Napoleon in Germany, in which many notable characters are prominently brought out in weaving this delightful romance. The simple fact of the publication of a new work by this author is sufficient to attract buyers.

SELECTIONS FROM THE KALEVALA. Translated from a German version. By John A. Porter, M. D., late professor in Yale College, with an introduction and analysis of the poem. New York: Leypoldt & Holt. Pittsburgh: Davis, Clarke & Co.

This volume is the fourth of a series of great foreign poems. First was King Rene's Daughter, from the Danish, followed Fritdiof's Saga, from the Swedish. The third is Lessing's immortal Nathan the Wise, recently noticed. The present volume of selections from the Kalevala is a remarkable production, an epic poem, with as much unity of plot as the Iliad, yet made up from songs collected from different mouths, and actually pieced out after it had been once published; by new additions to almost every part. In the story of the Kalevala there is a certain unity of plot. It can be briefly described as a struggle between the good and bad powers of the universe. It is written in eight syllabled trochaic verse. That is the peculiar and characteristic metre of Finns, and nearly all their poems are in this form. The analysis of this remarkable poem is of thrilling interest, which we would like to reproduce. The poem represents Wainamoinen's Sowing; the Rival Minstrels; the Encounter; Youkahainen's Song; the Enchantment; the Betrothal; the Wooing; the Consolation, and the Flight.

HISTOIRE D'UNE SOURIS DE PARIS. L'Home Par Jean Mace. With a French and English Vocabulary, and a list of idiomatic expressions. New York: Leypoldt and Holt. Sold by Davis, Clarke & Company, No. 85 Wood street, Pittsburgh.

The author has a wide reputation, as a writer of fine ability in his native land, especially for youth. Translations of his writings reveal the secret of his popularity at home. Doubtless this work will be highly valued by those conversant with the French language. The vocabulary of French and English, and the list of idiomatic expressions, greatly enhance the value of the work.

COMMERCIAL FRENCH INSTRUCTOR. Consisting of grammar and exercises, with copious references. By C. J. Delille. New York: Leypoldt & Holt. For sale by Davis, Clarke & Company, No. 85 Wood street.

This little volume presents the "Elements of French Grammar" in such a plain and simple form that young beginners will find it valuable in obtaining a knowledge of the French language. A cursory examination of the work demonstrates this fact.

THE AMERICAN LAW REVIEW. Vol. II. No. 2 Boston: Little, Brown & Co., subscriptions received by Kay & Co., No. 62 Wood street.

This number, like previous ones, discusses questions of great importance to lawyers, and such as are essential to him. If he desires to keep pace with the onward steps of the law. Some of the papers of this number contain valuable information to non-professional persons. The leading articles are Liability as Partner; Anomalies in the Law of Bailments; Marriage, as affected by the Conflict of Laws; Sunday Laws; the Internal Revenue System, Cases of Ring Salvage.

HARPER'S SELECT NOVELS: "The Brother's Bet," No. 805 of the series, is quite readable, by Emilie Carlen, the popular Swedish author. It is the story of two brothers falling in love with a charming young widow, so a bet is made. "Playing for High Stakes," No. 306, like all her novels, is well written. She has drawn some of the characters with a master hand, and, unlike many such works the characters are natural, and are found every where in society.

D. APPLETON & CO'S POPULAR EDITION OF CHEAP PUBLICATIONS. This series of cheap publications by Petersen & Brothers, Philadelphia, of the great novelist's works. We have commended previous numbers, still wondering that so much reading matter can be secured for 25 cents. Gildenfanney will supply copies.

THOMAS ALEMAN'S LIFE OF MATEO ALEMAN. This valuable compilation has become standard, owing to its reliable statistics and facts it contains outside of such publications. For sale by Miner, 71 and 73 Fifth street.

A monster in Cuba at different times enticed three young girls of tender years from home to meet in the singer's obliging apartments, where he first ravished and then murdered them, afterwards throwing the bodies into a deep well. He was at last detected, and upon suspicions had plenty of another young girl, who, but for timely interference, would have shared the fate of the others. When the bodies were drawn from the well the populace became infuriated, handed him over to the civil power to be given over to them for punishment. They surrounded the jail for the purpose of executing their intention, but the authorities finally managed to disperse them.

In Springfield, Massachusetts, landlord, it is reported, has voluntarily reduced rent by 20 per cent, the rents of a block of stores he owns.
