Annual Meeting of the Stockholders of the Pittsburgh, Fort Wayne and Chicago Railway-Report of the Officers and Board of Directory-Election of Directors.

The stockholders of the Pittsburgh, Fort Wayne and Chicago Railway Company held their Sixth annual meeting, at the office of the Company, corner of Penn and Wayne streets, yesterday morning. The meeting was organized at ten o'clock by calling Hon. John Larwill, of Wooster, Ohio, to the Chair, and appointing F. M.

Hutchinson, Esq., Secretary. The report of the President and Board of Directors was then read, from which we make the following extracts:

The idea of building a wall to prevent slides at that point is simply ab-surd, as nothing but a battered wall from the track to the top of the hill would be of any consequence, and to build a wall of that kind it would be necessary to slope the hill to such an extent as to entirely pre-

vent slides, thus rendering the wall unno-cessary. The railroad company have done all they possibly could to remedy the difficulty, we understand, by offering to pur-cults, we understand, by offering to pur-chase the property owned by Messrs, Ever-son, Preston & Co., at a fair price, which would enable them to vacate the old track where the slides, occur by running nearer was in charge of the train when the acci-dent occurred the inquest adjourned to meet the river. The Ladies Delight,

a special inecting of the Allegheny City Councils is to be held this evening, to take action in regard to the proposed Federal Street and Pleasant Valley Passenger Railway, (without presuming to dictate,) I would like through your columns to süg-gest a liberal spirited consideration of this enterprise. There can be no question (if properly constructed,) of its being a great public accommodation, and it should there-fore be carefully protected from all restric-tions or bindrences which yould islamy its tions or hindrances which would in any de-As it now stands, however, it is in great danger of becoming a nullity, for should it be built and put in running order, under the prohibition of switches on the North A venue section of the line: the delay conse Avenue section of the line; the delay conse-quent on the cars waiting for each other on this section would so seriously impede travel as to make the road practically use-less. We need only refer for proof of this to those roads in our vicinity which have

been compelled to either lay double tracks or place their switches in close proximity. As we have said, however, we don't wish to dictate, having confidence in the wisdom and sagacity of the Councils, and knowing that they only need to have their attentio called to this point, to arrange it to the sat-isfaction of all good citizens, and especially UNINTERESTED. to that of

Justice Ammon, of East Birmingham. We observe that our highly esteemed friend and fellow Republican, August Ammon, Esq., has been re-nominated by his political friends for the office of Justice of the Peace of East Birmingham. This is a deserved tribute to one of the most correct and efficient public officers of Allegheny county. Honest, capable, intelligent and humane, he has discharged the duties of his office, for a number of years, in a man-ner that has won for himself the respect of all classes of citizens. He has made hosts of friends, and we trust that he will receive such a vote at the election to-morrow as will substantially testify to the high merit in which he is held. No better selection can be made for the position he has so long and satisfactorily filled.

The business of the branch is steadily increas-ing, and would appear to be limited only by the particular class of equipment ne-cessary for the trade originating upon it." In comparing the business of the main line for 1867 with that of former years, the

report say "The deductions from the accounts of the company, and a comparison of them with the results of previous years, would seem to establish three different facts bearing on the future income of the road-that the lo feet . cal travel, generally, is steadily increasing in numbers and revenue: that the foreign travel is decreasing in numbers, and to a limited extent in revenue, principally from the effect of competition to Southwestern points, which business has hitherto augpoints, which business has hitherto aug-inented the revenue of the Eastern Division (Pittsburgh to Crestline,) and that the foreign travel still possessed by the Company is yet assuming a more valuable char-acter, in that a larger income is received from a smaller number of persons carried, by reason of their journéyings being for greater continuous distances." material has prevented much of a reduction of the expenses of operating and main-taining the main line. They will, however, compete favorably with other leading rail-ways. A larger volume of business was done, and yet considerable reduction in the several items of expense has been made several items of expense has been made, as will be seen by comparison with 1866. In 1867 the train mileage was 4,725,603, ex-cluding the mileage of wood and gravel trains, and in 1866 the amount was 4,674,204 miles, an increase of 149,399 miles. The ag-gregate expense por mile of trains in 1860 was \$1,12 and 3 mills; while in 1867 it was \$1,03 or a rate of reduction of eight, ner \$1,03, or a rate of reduction of eight per cent. This is the true measure of reduc-tion in expenses. Continued efforts have been made toward the altainment of a more substantial road bed by large expenditures for ballasting. The amount thus expended

and charged to repairs was \$165,269,85. The continued detoriation of the iron rails has rendered necessary extensive renewals. which, for the past five years, has been the cause of so many drains on the income. During past year 116 miles have been relaid with new and re-rolled iron, equal to twenty-five per cent; of the ontire length of the road, at a cost of \$480.127.10. The average renewal of cross-tics has also been continued, 246,801 having been put in the track, equal to about 128 miles. Since and including 1864 there have been 500 miles of including 1864 there have been 500 miles of track renewed with new or re-rolled ralls and 400 miles with cross tics. This is equiv-alent to a relaying of the whole road with new iron every four years and with new cross ties every four and two-third years. The report, after referring to the great wear of rails, and considering the propriety. of adopting steel rails, the condition of the track and road bed, which are reported in

track and road bed, which are reported in better condition than at any former time; speaks of the expenditures for, permanent additions to the railway, and says that the whole amount expended for new work and additional equipment, \$170,025 52, was done under the supervision of the chief engineer, and \$55 550 00 when the limit engineer under the supervision of the chief engineer, and \$4\$7,860 08 under the direct authority of the executive and general superintend-ent. A detailed statement of the expendi-tures is given, from which it appears that the aggregate amount expended was \$963, \$95 60, of which \$676,663 was on Eastern division, and \$387,232 60 on the Western. After referring to the connections and re-lations of the Company with other lines

lations of the Company with other lines, the report concludes as follows: greatest harmony and co-operation

The greatest narmony and co-operation exists in all the various departments of the road, developing to the fullest extent the capacity of the property, and causing it to yield the largest income from its business at the rates which were obtained.
