Lightning Rods

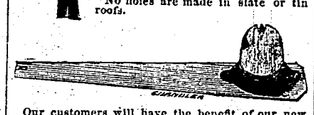
Munson's Copper Tubular Lightning Rod,

WITH

SPIRAL FLANGES,

Has been erected on thousands of buildings in all parts of the United States, and in a test of ten years no instance of their inefficiency has occurred. This Rod has received the First Premiums at the Fairs of nearly all the States, and every place it was ever exhibited. It has been endorsed by over five hundred Professors in Colleges, and other scientific men, as the best Rod ever invented, possessing all the elements necessary to protect buildings from lightning. It is made of copper, because this is the best metallic conductor, except silver, and does not rust. Its spiral flanges and rough edges dissipate electricity and double its conducting power. Electricity uses only the surface, never the heart of a metal. One flange of this Rod being open, the inside surface is available as well as the outside; altogether, its power surpasses twenty common iron rods or a solid copper rod an inch and a half thick, and has the additional advantage that it is continuous, and can never become disjointed or otherwise get out of order, but will endure as long as the building stands on which it is erected. Our points are made on the most approved method, and our Insulators are unsurpassed.

No holes are made in slate or tin roofs.



Our customers will have the benefit of our new Insulator, patented in 1867. The price is thirty cents per foot, and three dollars for each top; this includes the cost of putting the rod on buildings—there are no extra charges of any kind. Within the past few years we have erected this rod on many churches and other public edifices in Pittsburgh and vicinity, and upon thousands of dwellings and barns. For the superior character of this rod we are permitted to refer to Rev. I. C. Pershing, D. D., President Pittsburgh Female College; Philotus Dean, Esq., Professor Natural Sciences, Pittsburgh High School; Geo. Woods, LL. D., Pres't. Western University of Pennsylvania.

Thankful for the liberal orders of past years, we solicit a continuation of public patronage.
