FINANCE AND TRADE. OFFICE OF THE PITTSBURGH GAZETTE, Tuesday, April 21, 1868. Gold opened strong at 13834, advanced to 1391/2, and closed with a strong upward endency at 1381/s, with little gold offering, The cash gold on the market is considerably reduced, and short sellers may be compelled to pay heavy for their loans on the easy money market; even the payments of May interest may not have the desired effect of lowering the premium; the balance of trade being against us with a large amount of interest dne European bondholders. So long as money was scarce and dear and gold cheap, the Government officer at New York sold gold to tighten up money market still more, and supply the foreign bankers with cheap gold, but now when the market is rising and the money market easier, the Government stopped

Government bonds had advanced 1/2 per ent. from last night's quotations, but towards the close the market fell off about

4 per cent. The stock market was firmer and a general advance took place on the entire list, but at the close there was a slight decline, usual after a sudden rise from any depression of magnitude. Local stocks are not in demand and are rather lower, and quoations favor the buyer.
Closing quotations as received by Ph. R.

Mertz, were as follows: Gold, 139½; 1881 bonds, 112½; 1862 5-20s, 111½; 1864 do, 109½; 1865 do, 110; Consols, 108; 10-40s, 102½; 7-30s, 106½.

and live drones where they should in some form be busy bees.

—We clip the following from the Chicago Tribine, of Monday: In grain circles there has been a good deal of conversion for a day or two, in relation to the dating back of warehouse receipts. The occasion for it grew out of the following circumstance: Mr. A sold Mr B. some 25,400 bushels corn, sellers' option, at a certain price. The corn came by canal on or about the 6th. The party who received it was the seller, and he requested the warehouseman in whose elevator it was stored to date the receipt April 1st instead of April 6th. The storage for the five days was ½ cent, which to him was a clear profit. The buyer of the corn requested the warehouseman to give him a receipt dated April 6th in lieu of the one dated on the 1st—the day the property was received into store—which the latter agreed to do, provided the buyer would refund the ½ cent paid to the consignee. The transaction was a sharp one, and although the receipt was pronounced "regular," the purchaser was out ½ cent. In other words the receipt, if dated April 6, would run five days longer than if dated April 5, and at the expiration of the first twenty days, when 2 cents storage would have accumulated, an extra charze first twenty days, when 2 cents storage would have accumulated, an extra charge of 1/2 cent is made for each addititional five

of ½ cent is made for each addititional five days.

All the rest of the warehouses, save the one alluded to, condemn the operation in the most positive terms; and many go so far as to say that it is a palpable violation of the warehouse law. It certainly is disreputable and dishonorable, and we trust that it may never again be perpetrated. Our Board of Trade does not, and we hope may never resemble Wall street, in the "sharpness" of its operations.

—Save the Philadelphia Ledger, of Mon-

"sharpness" of its operations.
—Says the Philadelphia Ledger, of Monday: The money market at the close of business was easier and rates lower, both here and at New York. This is no doubt in some measure attributable to the improved condition of the New York banks, their statement of averages for the week having obtained publicity early on Saturday afternoon. This drain upon the banks was no doubt caused by the sale of gold from the Treasury. It is evident, however, on the face face of the statement, that money is gradually on its return from the interior, and all the seaboard cities may naturally expect a steady increase of naturally expect as steady increase of naturally expect a steady increase of naturally expect as st day afternoon. This drain upon the banks was no doubt caused by the sale of gold from the Treasury. It is evident, however, on the face face of the statement, that money is gradually on its return from the interior, and all the seaboard cities may naturally expect a steady increase of money and lower rates of interest. It is believed that all chances for a money panic are past, and that there must be a steady return to ease from, this time out. The fact that no failures of any consequence have occurred, notwithstanding the gold fluctuations of the past few weeks, is strong evidence of the conservative position of the community generally.

PITTSBURGH PETROLEUM MARKET. OFIFCE OF THE PITTSBURGH GAZETTE, Tuesday, April 21, 1868. CRUDE-The Crude market was decidedly firmer to-day, and the only cause we heard assigned was that it had advanced at Oil City, which, by the way, is a very good one. and July at 9%c. All the year, in the absence of sales, may be quoted at 12c.
