Meeting of the Executive Committee of the Allegheny County Soldiers Monumental Association—The Action of the Committee at a Former Meeting Reconsidered—Former Action Relative to Selection of a Location Adhered to — Dissatisfaction Among the Committee—Personalities, &c., &c.

The action of the Executive Committee of the Allegheny County Soldiers' Monumental Association, at a meeting held April 9th, 1868, at which it was decided to have the monument erected, having been the cause of very great dissatisfaction to a majority of those who took an interest in the matter from the beginning, and being unsatisfactory to the public generally, a meet satisfactory to the public generally, a meet impredictely companied to the lower impredictely companied to the ing was called Saturday for the purpose of reconsidering that action, and if possible have some other location selected. Pursuant to the call the Committee met at the rooms of the Young Men's Christian Association, Fifth street, at three o'clock, and on motion of Capt. Cook was organized by calling Mr. James Park to the chair, and

appointing Miss Fowler Secretary.

The reading of the minutes of last meeting being in order the Chairman directed them to be read, but no minutes having been kept, other than the reports as pub-lished in the city papers, a motion was made pense with the formality, which was

A motion was then made to adjourn, which somewhat plarmed that portion of the Committee who were in the favor of placing the moument in the Cemetery, evidently fearing that it was a dodge on part of their opponents to prevent them from burying the fifty thousand dollars in the grave yard, which was contributed by ple of Allegheny county to erect a the people of Allega Soldiers' Monument.

Capt. Dalgleish moved that the advertise-ment for proposals for the construction of the Soldiers' Monument, published in the city papers, be withdrawn for the present. Mr. Preston then moved that the trianthe site on which to erect the monument.

Col. Bayne moved to postpone the selection of a site until the next meeting. After considerable discussion the motion to postpone was negatived.
The original motion was then taken up

and adopted by a vote of nine to eight. Captain Dalgleish objected to the vote of Mr. Chislett, on the ground that he was not a member of the Executive Committee. He had no feeling in the matter, he said, further than to place the monument at some point where it would be easy of access, so that the public generally might be satisfied.

Mr. Jennings called the gentleman to order.

The Chairman very properly rebuked the General for his exhibition of bad feeling by maintaining the point of order. He said that the remarks of Captain Dalgleish were in order, and he could not continue such personalities as had just been indulged in.

Mr. Chislett said that he had been requested to attend the meeting, and was informed that he was a member of the Committee the continue such personalities as head just been indulged in the prosecutor, shortly after which he took his departure, leaving his employer with about \$1.000 less money than he should have had. configration in the Seventh Ward, Ala legheny—Stuckrath & Co.'s Tannery Burned—Loss \$30,000—Eight Men In-

A very disastrous fire occurred in the Seventh ward, Allegheny, Sunday anorning, by which the extensive tannery of Stuckrath & Co., on Spring Garden Run, was totally destroyed. About five o'clock n the morning the shed in which the furnace and engine were located was discovered to be on fire. The alarm was promptly given from box 53, corner of Third and Chestnut streets, but before the engines arrived the whole establishment was in immediately communicated to the lower story of the main building, in which were stored two barrels of tanners' oil, which took fire, and in an instant the entire structure was one vast sheet of flame. The Grant engine arrived on the ground very promptly and went into service, but so rapid was the progress of the flames that it was impossible to save the fannery, and the firemen turned their attention to the surrounding buildings. In less than half an hour from the time the fire was discovered the entire huilding with its valuable ture was one vast sheet of flame. The

The less cannot be definitely es as there is a large quantity of stock in the vats the injury to which cannot be ascertained until it is removed, but it will not fall short of \$30,000. The building and machinery were valued at 18,000, whi course is a total loss, and there was five hundred cords of bark destroyed which was estimated at \$7,000. The entire stock of hides and leather on hand would amount to \$5,000 to \$5,000, as large portion of which was saved. The insurance will not exceed \$20,000, all of which is in home companies. Pearson. Gen. Pearson wished to know what the Committee could do with the communication, as a site had already been selected.

Col. Bayne moved a reconsideration of the action of the Committee in selecting the Cemetery as the place for the monument.

Grant Street Sewer.

We have noticed the fact that on the petition of Dr. A. Arthurs the Court of Common Pleas granted a rule on the City Engineer, Mr. H. J. National Growth Nothing more astonishingly illustrates the growth of this country during the last few years than the marvelous increase in the business of the railroads. The aggregate of business done by railroads in each decade from 1838 would present an exhibit that would hardly be credited. The statement is made in reference to the lines running into Chicago alone, that in 1854 the railroad receipts from Chicago to the Mississippi river were about \$1,200,000, and in 1866 they were over \$30,000,000. Here in twelve years we have an increase more than twenty. four fold, and the two or three short, inadequate and weak strap rail tracks that then ran into Chicago, are now supple-mented by hundreds of miles of splendid rail, which bring the produce of tens of thousands of square miles which bring the produce of into the local point of Western trade. A railway map of the North to day represents a gridiron, so thickly do the bars cross and recross each other. And yet the system is only partially developed. In spite of war and disorder, and doubt in men's minds, the great work goes bravely on, and every day some new point is reached by the locomotive, and some new facility for trade is added for the development of the exhaust-less resources of the country. The reports of all our railroads show a yearly increase in traffic, and there are many which have doubled their business in the last four or five years. If stock holders do not recognize the immediate advantage of this enhanced business, the country certainly feels

it in every fibré.—N. Y. Advertiser.
