In regard to production, a telegram from a reliable party at Titusville says that the daily yield during April was 3,650 barrels, and 9,100 barrels at present, and increasing. This telegram of course is only the only in a telegram, of course, is only the opinion of one man, but it is generally regarded as being as near correct as it is possible to get being as near correct as it is possible to get at it. This shows that the production is steadily increasing, and while old wells are continually giving out, new ones are more than making up for the deficiency. is also very firm and somewhat excited, and prices are firm and well sustained, notwithstanding Antwerp is reported off a quarter of a franc. We can report sales of 500 bbls for the last half of May, at 31c; and 500 bbls on spot, at 25¼c, delivered free on . board of cars here.
