Fire in Lawrenceville.

The several fire companies of the department were afforded an excellent opportumity of testing the speed and metal of their horses as well as the zeal and energies of the men yesterday afternoon, in all of which they acquitted themselves gallantly. At half part one o'clock an alarm of fire was heard from box 34, corner of Canal and Mas heard from box 34, corner of Canal and Liberty streets, and thither all the department how in service proceeded in their asually prompt manner, notwithstanding the thermometer stood at several degrees above seventy in the shade. On arriving at the point from whence the alarm proceeded, they were informed that the fire was at the foot of Ewalt street, Lawrenceville, in the oil refinery of J. C. Kirkpatrick & Co., a telegraphic dispatch having been received at the Allegheny Valley Ralfroad depot to that effect. On arriving at the scene of the that effect. On arriving at the scene of the conflagration the engine room of the oil re-sinery referred to was found to be on fire, and the flames had made such progress before the engines arrived that it was impossible to save that portion of the building,
and the attention of the firemen was directed to the surrounding buildings, all of which

ed to the surrounding buildings, all of which were saved from destruction by their labor. The building destroyed was a one story brick, situated on Ewalts reet, between the Allegheny Valley Rairoad and the river, and was used as an engine room, the boiler and furnace being against the outside of the north wall. On the south and west sides were higher buildings in one of which the north wall. On the south and west sides were higher buildings, in one of which there was a tank containing 500 gallons of refined oil, and on the north side a few feet from the furnace the crude oil receiving tank is situated, all of which were protected from any damage not well that their close proximity to the burning building, and the inflamable nature of the material, they contained. At the time the fire was and the inflamable nature of the material, they contained. At the time the fire was discovered, the men employed at the refinery were engaged in pumping water to fill a tank and the stream was immediately turned on the flames, which kept them partially under subjection until the engines arrived. The loss will scarcely exceed one thousand dollars, on which there was no insurance.

The Relief Engine did not reach the turning the corner of High and Wylie streets, a box in one of the front wheels was broken, the wheel came of and letting the weight of the engine drop on the point of the spindle, broke an axle. The tire on the Neptune Hose Carriage was broken by runing against a stone.

Report of the Districting Committee. Some time since a committee of nineteen was appointed by resolution of Councils tore-district the city, and in accordance with the requirements of the resolution under which it was appointed, the committee met for the purpose of performing the labor assigned them. After several ineffectual efforts to agree upon a report the
committee appointed a sub-committee of
eight, which was instructed to go over the
entire consolidated city and report to the
original committee, and pursuant to instructions said sub-committee made a tour
of the city on Wednesday, and at a meeting of the original committee, vesterday ing of the original committee, yesterday evening, presented their report, which, we learn, contemplates dividing the city into twenty-four wards. We were able to ob-
