There is a charm in the smile of a lady... A spell in her dark, dancing eyes...

There are words that will linger forever... There are thoughts that are born in an instant...

There are shadows where some are the substance... There are glimmers that are a dream...

There are things that are not to be seen... There are things that are not to be heard...

There are things that are not to be felt... There are things that are not to be known...

There are things that are not to be understood... There are things that are not to be explained...

There are things that are not to be described... There are things that are not to be named...

There are things that are not to be touched... There are things that are not to be held...

There are things that are not to be seen... There are things that are not to be heard...

There are things that are not to be felt... There are things that are not to be known...

There are things that are not to be understood... There are things that are not to be explained...

There are things that are not to be described... There are things that are not to be named...

There are things that are not to be touched... There are things that are not to be held...

and Jeff, Davis side by side, and the picture is complete.

During the last three years, Chaney and Henry Rose, two wealthy citizens of New York, undeniably distributed among the various charities of that city, \$1,150,000, or about \$1,000 a day.

Chicago is so hot and dusty that an engaged traveler says it may be all very well to say "See Naples and die," but that if you see Chicago now you probably will die, unless you were brought up in a desert.

If they are not all sea-sick, they ought to be having an entertaining time on board the Ville de Paris, for the entertainments of that vessel, La Grange and Trestre, are well known and they are all three on board.

Andrew Johnson, and John Morrissey had an interview on Sunday. Comparatively speaking Morrissey is respectable, and we don't know what he could have been thinking of to thus endanger his reputation.

Gen. Mac Mahon, the new Minister to Mexico, was Gen. Sedgwick's Chief of staff. He is an out and out Democrat, and an ardent admirer and intimate friend of Horatio Seymour. His home is in Central New York.

An energetic mother, in Cincinnati spanked her darling child the other day until she broke her arm, and the darling child was glad of it, as it rendered it improbable that his maternal relative would soon again be able to use the rod.

The New York Master Masons have formed a protective union of their own and decided not to employ any man who belongs to the Bricklayers' Union. This is an instance of the truth of the old saw—that two can play at any game.

The renowned Maseppist has seen fit to change her name so often that a respectable journalist can hardly be expected to keep track of them all, and the New York Courier evades this little difficulty by speaking of her as "Miss Isaac Menken and others."

Scott, and Graham and Pierce and King were once the rallying cries of the two great parties in this country. Scott is dead and King is dead. Pierce is worse than dead, but what has become of Graham and yet it is only sixteen years since these names were household words.

Two young girls, a Miss Griffin and Miss Costley, both eleven and twelve years of age, were bathing in the Colorado River, some six or seven miles below Austin, Texas, when becoming alarmed by approaching footsteps, they hastily got into deep water and both were drowned. The body of Miss Griffin was found, but no discovery has been made of Miss Costley.

The Philadelphia North American says: Philadelphia is not the centre of the universe, as is Toledo. It does not eclipse everything under the sun, as Chicago does. It is not superior to Paris and London combined, as New York is. The fact is that Philadelphia is a city of exact calculations and mathematical certainties, and its realties are not in an inverse ratio to its pretensions.

A correspondent of the London Telegraph in writing of the ceremonies which took place at Cambridge, when the L. L. D. degree was conferred on Mr. Longfellow, says: "A few well-rounded Latin sentences the Public Orator recited the chains of the distinguished visitor to the privilege of an honorary degree. The names of 'Hiawatha' and 'Enoch Arden' and 'Evangeline' sounded strangely amidst the sonorous words of the Latin. We should like to know why the Public Orator said anything about 'Enoch Arden' just then."

AN ANALYSIS of the new River and Harbor bill shows that of the full amount of \$4,775,000 appropriated, \$3,695,000 is for Western rivers and harbors, including the Mississippi and the tributaries; \$861,000 is for rivers and harbors of the Atlantic seaboard, including Lakes Ontario and Champlain, and \$1,050,000 for the Pacific Coast.

In the discussion of the bill to-day it was asserted in support of the item of \$430,000 toward completing the Louisville Canal around the Falls of the Ohio, that \$398,000,000 in value of tonnage and cargoes passed that point in one year. The item of \$300,000 for the Erie and Rock Island Rivers is therefore a mere drop in the bucket of the fact that the like values passing that channel have reached \$15,000,000 in a single day.

For Des Moines Rapids on the Mississippi River, the bill gives \$900,000, three times the sum given to Rock Island Rapids \$300,000, and yet it was said by a member that these rapids are not passed by one-third the number of steamers that pass the Ohio Falls. Congress has already appropriated \$1,000,000 toward the Des Moines and Rock Island Rapids, and to Hell Gate only \$20,000.

DON PRATT, in the Cincinnati Chronicle, says: Here, in the right of an experienced pilot, permit us to give one word of advice to lovers in general. "Never spend a cent in love-making, if the girl is worth having, you cannot purchase her with bouquets and bougies, serenades, and sonnets. It adds to the agony of the rejected one to know that his beloved not only has his heart, but his dinner. He may do as an old friend of ours once did, make out a bill—"stop, we have it somewhere about"—all here it is: Lizzy Carver's.
