We understand the meeting is called in regard to the removing of the cobble stones from Wood street to laying the Nicolson pavement in that portion of the alley, which was commenced yesterday. The young man was thrown partially under the wheels of the locomotive, and was killed, crushing one of his legs and fracturing his skull. His injuries were such as to leave no hope of his recovery.

Homicide at Brownsville, Pa.—The perpetrator surrenders himself. The quiet city of Brownsville was thrown into an intense fever of excitement by a shooting affair which occurred there on the evening of the Fourth. The circumstances of the affair, as near as we could learn, are about as follows: It seems that a notorious character named Jas. Joffice, residing near Connellyville, came into town to spend the holiday. After roaming around during the day about six o'clock in the evening he stopped at the Barr House, and asked for whiskey. The proprietor of the house, Mr. Ephraim Barr, receiving the man, had been drinking freely, refused to accede to his request, which only made him the more bold, and he began to use very abusive language, endeavoring evidently to raise a quarrel. Mr. Barr, after expostulating with him for some time, drew a revolver and fired upon him, the ball entering the left side below the hip, passing through the body and falling out on the floor. Immediately after being shot Joffice started to run, and had proceeded about a square, when he dropped down through weakness from loss of blood. He was carried into the Barr House, and Dr. Duncan called in, but from that time no hopes were entertained of his recovery, and he expired yesterday morning at seven o'clock, after a painful illness of five days.

At a meeting of the Street Committee, held last evening in the office of the City Engineer, Sylvanus for grading (paving) and curbing the streets, the following streets were awarded, as follows: Fourth street from Wylie to Deatur, Townsend street from Wylie to Deatur, and Vine alley to O'Malley street.

There were quite a number of bids, but the above named gentlemen were the low bidder and best bidder.

One More Victim.—For some weeks past the confidence of the citizens here has been doing any business in this locality, and the general supposition was that they had left the city for some new field of labor, but yesterday occurred Monday evening that would indicate otherwise. As the express train on the Pittsburgh, Fort Wayne and Chicago Railroad, neared the city, at the time mentioned, two men passed from the front to the rear car, and approached a seat occupied by Mr. J. H. Morgan, of Clearfield county. One of them addressed him in a friendly manner, but appeared to have forgotten his name. He knew he was from Clearfield county, however, and knew all his friends in that locality. Mr. Morgan gave his name, and after conversing a few minutes about the crops, weather, &c., she introduced him to a man who introduced himself as Geo. H. Joyce, of the firm of R. H. Joyce & Co., Buffalo, New York, at once proceeded to business. He first introduced his companion to Morgan as his partner, and stated that he had come to the city on a speculation. They had two cars loaded with produce, and they would go to receive the cash for them as soon as delivered. The partner, at this stage of the transaction, introduced his friend to Morgan, and they were paid. Mr. Joyce remarked that by an arrangement between the Pittsburgh, Fort Wayne and Chicago Railway Company and the firm of R. H. Joyce & Co., the freight would have to be paid before the cars were taken across the river, and he would have to pay it. He asked Morgan to pay it for him, and he agreed to do so. The partner then took out a check for one hundred and three dollars, and handed it to Morgan. He said he had deposited all his money before leaving Buffalo. He had a check for \$1,200, which he could have cashed, but he preferred to pay it in cash. He then asked Morgan to take the check to the bank and cash it for him, and he would give him the money. Morgan agreed to do so, and he handed the check to Morgan. The partner then took out a check for one hundred and three dollars, and handed it to Morgan. Not only to the rich and the poor apply to him, but being a man of highly cultivated talents, and a scientific and scientific man, he is sought by the medical profession, and soliciting his medical aid.

This Medical Report is not published in disparagement of other physicians of equal business and merit, nor yet to excite the envy of any of those who are engaged in the same profession, and whose qualifications are the reverse of what is above represented; but rather to notice the peculiarities and refer to the health-giving influence of the urine, and many authors now agree that whatever may be the disease, the urine seldom fails to furnish the elements of relief upon which it should be treated.

These facts are now becoming pretty well understood; hence, the more we make the urine the more we seek relief at the hands of Dr. Olds, who is Professor of Urinology, and has written a large work on the subject.
