At the conclusion of Mr. Kirkpatrick's scenes of the last rebellion, should go to work actively in laboring for their defeat. Mr. Errett said the subject nearest his heart in the present anvass was organization. He was a mem per of the County Committee and he wish ed to urge upon all the importance and ne-cessity of a more perfect organization. He had urged the importance of this in the last campaign in this State, and the Re-publican party owed the loss of the election of their candidate for the Supreme Judgeship to the listlessness in this matter, and it was these and kindred deteats in 1867 which made the Democratic party jublant to-day. The issue was more important now than then. If the Democratic party succeeds in this contest there is great danger to the country. Aiready rebels in the South, in anticipation of triumph for their friends of the "lost cause," are throwing of the mask and boldly saying, backed as they are by their edious platform, represented by Seymour and Blair, that the South remained uncon-quered. In 1868 the same battle has to be cessary. He was glad, however, to see that the same old spirit animated the Republi-can party, and all that had to be done was and no party could succeed without it. There were votes enough to win victory, and all that was necessary was to get them out. Let every man, not depending on his neighbor, go to work himself in this matter and see that the votes come out. Let the State be carried by the Republican party in October and the election in November was sure, and as goes the Old Keystone so goes the Union.

> The Old Methodist Graveyard—Meeting of the Lot Owners-The Commissioners are

Willing to Compromise. A meeting of the lot owners in the old Methodist Gravevard was held Saturday evening, at the Eleventh ward public school house, for the purpose of hearing the report of the Committee appointed at a previous meeting to confer with the Commissioners, and look after the interests of the lot owners. The meeting was composed of about fifty persons, white and black, of both sexes, representing perhaps about one fifth of the lot owners. The proceedings, the business, and the only sensible portions of which we give below, were of a rather unsatisfactory nature. It appears that the Commissioners at present are not as much at fault as some few hard-beaded, ignorant uld have the public believe, but on account of their ignorance and unwillingness to come to any terms and their desire to get the matter into the Courts, the great majority of the lot owners, who are reasonupon equitable terms, are prevented from so doing. Two or three have conceived the idea that the old graveyard is of immense value, and that every lot owner, if he gets his proportion of the to keep this spirit alive to the close. If he was to comprise in one word all that was necessary it would be organize. No party had ever succeeded unless it did this, come to any terms, and insist upon taking the matter to the Courts to test the legality of the act of Assembly vacating the bury-ing ground and authorizing the Commissioners to remove the bodies. The niesting was organized at eight o'clock, when, on motion, Mr. I. D. Gardner was called to the chair, Mr. McKean acting as Secre-

Mr. Gardner, on taking the chair, stated that the meeting had been called by the Committee appointed to confer with the Commissioners, &c., to hear their report.

The minutes of the preceding meeting

were read and approved. Mr. George Wilson, from the Committee, presented a verbal report. He stated that he. in conjunction with the other members of the Committee, had visited Mount Union and Hilldale Cemeteries, and that lots could be obtained in the former for \$15 each, and in the latter at \$40. He further

Mr. Chapman, from the Committee, stated in addition that the price of lots in the above cemeteries had advanced five dollars since the Commissioners had commissioners had commissioned the preceding with the Commissioners.

intention with reference to the proposed sale of the property by the Sheriff, he stated that the Commissioners had been endeavoring to procure money to pay off the sclaims of the city and stop the sale, and Mr. Parker, one of the Commissioners, had informed him that he had raised sufficient

money to meet the claims. He further stated that he had urged upon the Commissioners the propriety of settling with the lot owners upon the terms proposed, viz. The Commissioners to pay the lot owners \$30 each, the lot owners to re-

tent he asked one by one for an opinion; chased for three thousand dollars, and that but all was doubt and fear. Retire to rest they had realized over \$19,000 out of it. The lots owners owned it in fee simple, and no one else had any claim upon it.

He also desired to know what became of

> in the least. He said that he as one of the ounnittee had a conversation with Mr. Vankirk, one of the Commissioners, who expressed himself willing to come to terms with the lot owners. He was willing to ex-pend all the money that could be realized from the sale of the ground in the removal of the dead, and payment of the claims against the gravevard; and suggested that the lot owners appoint a Committee to act in conjunction with the Commissioners, in in conjunction with the Commissioners, in purchasing lots and removing the dead. He said that this was the feeling of the Com-

At this point an old gentleman, who had, during the whole evening been growling about the manner in which the Commis-

sioners had removed the strangers, or as he called them, the "single interments" from the graveyard, and disputing their author-Mr. Henry stated that at all previous meetings a number of outsiders had been run in on them to vote down any resolution calculated to benefit the lot owners, and he

said that the Commissioners should not have possession of his lot while he lived, unless they paid him full value for it. The gentleman who made the motion to amend, then replied that he was not a lot

owner, but that he represented his brother, who owned a lot.

Mr. Kincaid opposed the resolution with

a very forcible argument.
Capt. Miller also opposed the resolution.
He said that he did not think it prudent to take the matter into court, as it would only prolong the difficulty. After some further discussion the motion

was withdrawn.
Mr. George Wilson moved that the Commissioners be requested to call a meeting of the lot owners and ascertain what number of persons desire lots, and also upon what or persons desire loss, and also upon what terms a settlement can be made.

Mr. Chapman moved to amend by re-questing that the Commissioners settle with

he lot owners. The old gentleman who had found fault with the "single interments," opposed the motion. He objected to dealing with such men as composed the Commission, and he moved that they be required o remove the bones of the strangers back to the gravevard and re-inter them "dacently" and let

the property alone.

A young man, whose personal appearance was by no means prepossessing, then took the floor and harrangued the meeting with a five minutes speech, burling insults at the Commissioners, and winding up by saying that the Committee appointed by the lot owners had been "manipulated," and were now acting in conjunction with the Com-The Committee therefore asked to be dis-

charged.
Capt. Miller for the Committee replied to the charge in a pithy, speech, which caused the young man who made it to sneak to the back part of the hall, where he kept quiet during the remainder of the time the meeting was in session.

The motion of Mr. Wilson as amended

there were three smaller boys, one of whom was Willie Sullivan, standing in front of oy Mr. Chapman was then adopted.

On motion the report of the Committee the horse when he started. The first jump he made all of the smaller boys were knocked into the middle of the street and was received and the thanks of the lot owners tendered to them for the faithful manner in which they had attended to the duties of the appointment, and the Comittee continued to attend to the interests of the lot owners.

On motion adjourned to meet this mornback of his head. The buggy passed over all of them, but strange as it may appear inflicted no injury. The boy having hold of the horse held to him until near Tunnel street, when he was forced to let go to preing at the sale of the grave yard.

Stolen Watch Recovered. Some weeks since a valuable watch was stolen from Mr. Hall, on Liberty street,

and notwithstanding every effort was made to obtain some clue to the thief or the whereabouts of the property, both for a time proved unsuccessful. A circumstance recently occurred, however, which lead to the recovery of the watch and will 'probably lead to the conviction of the thief. A few days since a man giving his name as Leslie was arrested in Allegheny, after shooting officer Green of that city, for which he was held to ball in the sum of Br. teen hundred dollars to answer a charge of felonious assault and battery, and in default thereof was committed to jail. In a conversation with Chief of Police Bowden of Allegheny, with reference to obtaining bail, he stated that he had a valuable watch bail, he stated that he had a valuable watch in Pittsburgh which might be taken as sescurity for his appearance. The officer thought nothing farther of the remark until the following day, when in conversation with Chief Green of this city, he was requested by that gentleman to be on the look out for a valuable watch which had been stolen from this city, whereupon he related to Green what Leslie shereupon he related to Green what Lesli had said. Green, like a wise man, kept his own council, and called upon Leslie at the ail, and obtained from him sufficient information to convince him that he was on the right track, and by using the proper means, induced the man to direct him or to go with him and show him the watch. He then ob teined permission to take Leslie out of jail, from the proper authority, and was by him conducted to a board pile on the bank of the Allegheny river, near the Point, where the watch was secreted. The watch was secured, as was also the prisoner, who was recommitted. We learn that a handsome reward had been offered for the recovery of the watch, which will, of course, fall to

Chief Green.
It is unfortunate for Messrs. Bowden and Green, of Allegheny, who were instrumental in securing the thief and indirectly the recovery of the property, that they did not follow the matter further and secure the reward to themselves.

Hair Brushing by Machinery. One of the most novel inventions recently brought to the notice of the public is Camp's patent for brushing the hair by machinery. This nest little apparatus consists of a circular brush, having a rotary motion given to it by an endless gum band or belt extending from machinery attached to the celling, directly over the chair in which the subject sits. The operator then connects the brush to the guin band, which is sufficiently elastic to admit of being moved from one portion of the head to another. The invention although new is coming into general use throughout the country, and in a short time no barber shop will be complete without it. Mr. George Falkenstein, 135 Liberly street, next door to Hare's Ho tel, has the "machine" in complete running order in his excellent and well con-conducted establishment. The sensation experienced while undergoing a brushing y machinery is a most delightful one, and eyond all description: We can only say that it is a "charming new sensation," and would advise all who have not tried it to would advise all who have not tried.
