FINANCE AND TRADE, OFFICE OF PITTSBURGH GAZETTE, MONDAY, August 31, 1868. The local money market is quiet and unhanged; general business continues dull, though we are in hopes that an improvement is near at hand. The crops have already commenced to move, but there is a feeling of doubt and uncertainty in regard to future values which tends very much to

retard trade at present. -The stock of Flour and Grain in Chiago on the 22d inst., was large, much larger than at the same time last year. For stance there were 58,794 bbls Flour against only 2,120 same time last year. Here is the comparison, as clipped from

ALLEGHENY CATTLE MARKET. OFFICE OF THE PITTSBURGH GAZETTE, Monday, August 31, 1868,

CATTLE There was again a very full supply of cattle to-day, and the market upon the whole was a dull one, and a general thing prices ruled lower. As has been the case for some weeks past, prime fat cattle such as first class butchers are in the habit of buying, were in light supply, and holders of this grade of stock experienced no difficulty in selling and that, too, at full prices. On the other hand the pens were full and overflowing with old cows, little thin heifers and steers, and rough oxen and stags; and for these holders, as a general thing, were obliged to take whatever they could get; second and third class butchers found no

second and third class butchers found no difficulty in suiting themselves at very low figures, as holders of this class of stock were only too glad to get clear of their cattle at some price or other.

Prime fat cattle, as will be seen by reference to report of sales, sold at from 7½ to 7½ and extra at 7½. Medium butchers stock sold at from 6½ to 7 and fairish do at 6 to 6½. Stock cattle may be quoted at 4 to 5½ as to quality and condition, and bulls at 2½ to 3½. If Peter Klemen had have been on hand to-day he could have picked up a few of these animals, cheap.

The great proportion of the cattle on sale to-day were from Pennsylvania and Ohio, with some few droves from States farther West. It is really astonishing to witness

SHEEP AND LAMBS. There was also a full supply of Sheep on sale to-day, but, as in the case of Cattle, the great proportion were of an inferior grade and were not fit for butchering. This being the case prime fut these were in degrade and were not fit for butchering. This being the case, prime fat sheep were in demand and sold readily at full prices, while "scalawags" moved very slowly and only at very low prices. The fact is, there is an ever supply of this class of Sheep all over the country, and farmers seem determined to get rid of them at some price in order to avoid the cost and trouble of keeping them over winter. It is evident that there is a disposition among farmers to there is a disposition among farmers to sell off the "scalawags" and keep their best Sheep, in hopes that better prices will prevail after a while; and, besides, it costs as much to keep "scalawags" as it does to keep good Sheep, and the former will al-ways bring relatively better prices than Jacob Rothchilds sold 69 head Lambs at \$1 to \$1,50 per head.

Emmell, Fowler & Walters report hav-ing sold 340 head Sheep and Lambs at from 50c to \$3,50 per head.
