FINANCE AND TRADE,

OFFICE OF THE PITTSBURGH GAZETTE, } Monday, September 28, 1868. The feverish state of gold and governments for the past week, has at least terminated by a decided decline in gold from 144% on Monday last to 140%, this afternoon, and in, a corresponding decline of

onds, especially the issues of 1862's. The cotton and grain crops being larger than anticipated, have aided in sustaining our government bonds in Europe, and as the pending elections promise to be desided without any political disturbances, a considerable decline in the premium of gold is likely to take place before the end of the year. In the meantime, fluctuations must necessarily occur, and as no gold interest is payable by the United States, before the first of November, higher prices may rule from time to time, as cash gold will continue scarce. Private advices from Europe are assuring the war cloud has passed, and any rumors to the contrary are without

foundation. Government bonds have been steady without any animation. Large speculative purchases took place on European account at 1151, which are now covering at 1131/2 to 114. The amount of governments in the market is rather limited, and any material decline would lead to an unusually high market caused by contracts, which exceed the stock in the market-eventually high-

er prices of governments must ensue. With reference to the stock market a fierce contest is now going on between have in their favor an easy money market, and the satisfactory earnings of nearly all their roads, together with a large outstanding short interest, while the bears contend, that most of the speculative stocks are already selling above their real value, and are trusting to the assistance of a more acive money market.

New York Central is strong at 1291/8, and bought up by men of capital. In Erie large short interest is outstanding, and ome of the directors are said to be short; vet it is considered that the stock is very cheap at the present price. Reading is largely dealt in Boston and Philadelphia, and is likely to go above par. Cleveland to about 95, at which figure it is held by to about 30, as which lights to all the lowest point, having just stood a heavy attack of the bear party. North Western shares are entirely managed by Hurrykeep and his friends, and although the stock is selling far above its real value, yet the clique have an object in view. Fort Wayne looks firm at 103% to 110—a 2½ per Wayne looks firm at 103% to 110—a 2½ per Red Wheta is still on the stock is selling far above its real value, yet the clique have an object in view. PITTSBURGH PETROLEUM MARKET. per gallon. OFFICE OF THE PITTBURGH GAZETTE,) MONDAY, September 28, 1868. REMARKS.

Some exceptions it seems were taken to our report of the oil market on Saturday. and some of the dealers affected to be very indignant at that part of it which referred to a bitter feeling existing between the "bulls" and "bears." Now we still stand (By Telegraph to the Pittshurgh Gazette.) the same time the personal relations be- head. tween these parties are pleasant, and all that could be desired. And right here wo | (Special Dispatch to Phisburgh Gazette-1 take occasion to remark that the oil mon as a class, are a highly honorable set of men, upright to the letter in their business

relations, and gentlemen in every sense of the word. Many of them, however, have their capital invested in oil, and it is but their capital invested in oil, and it is but natural that they should work to promote their own interests, even if by so doing they should be classified among what is commonly termed the "bulls" and "bears." We have always endeavored to report the business correctly, and while we may have said things that were not agreeable to some parties, we have done so under the conviction that whatever we said was true, and, therefore, have nothing to take back. In therefore, have nothing to take back. In the oil business as in everything else, "the

truth is mighty and must prevail. The market for Crude was again rather quiet to-day, not a single sale reported. Spot oil may be quoted at 11½ to 12c, the inside figure offered, and the outside figure asked. The offerings at quotations do not appear to be very large, while the demand is by no means urgent. There are doubtless some, as there nearly always are, who are short on maturing contracts of Refined. CRUDE. are short on maturing contracts of Refined, and these parties will have to buy sooner or later, unless they should secure themselves by buying Refined.

REFINED. The Refined market is quiet and weak, with a drooping tendency. Sale of 500 bbls. September at 31½c; 1,000—500 each November and December at 29½c, and it was reported late in the day that there was a sale of 1,500 for September at 30½c.
